STUDY OVERVIEW

US 18/151 Corridor Study

The US 18/151 Corridor Study is being conducted between the US 18/151 interchange east of Dodgeville and County PD (McKee Road) in Fitchburg.

The study corridor is approximately

35 miles long

and travels through Iowa and Dane counties

The corridor includes

12 existing interchanges

&

20 existing at-grade local crossings

Corridor Importance

US 18/151 is a primary east/west route for vehicles and freight connecting communities in Southwest Wisconsin to the Madison area. The corridor is a:

- National Highway System (NHS) Route
- Oversize/Overweight Truck Route
- Designated Expressway *(west of Verona)*
- Designated Freeway *(Verona area)*
- Long Truck Route
