US 12

Hudson - Baldwin

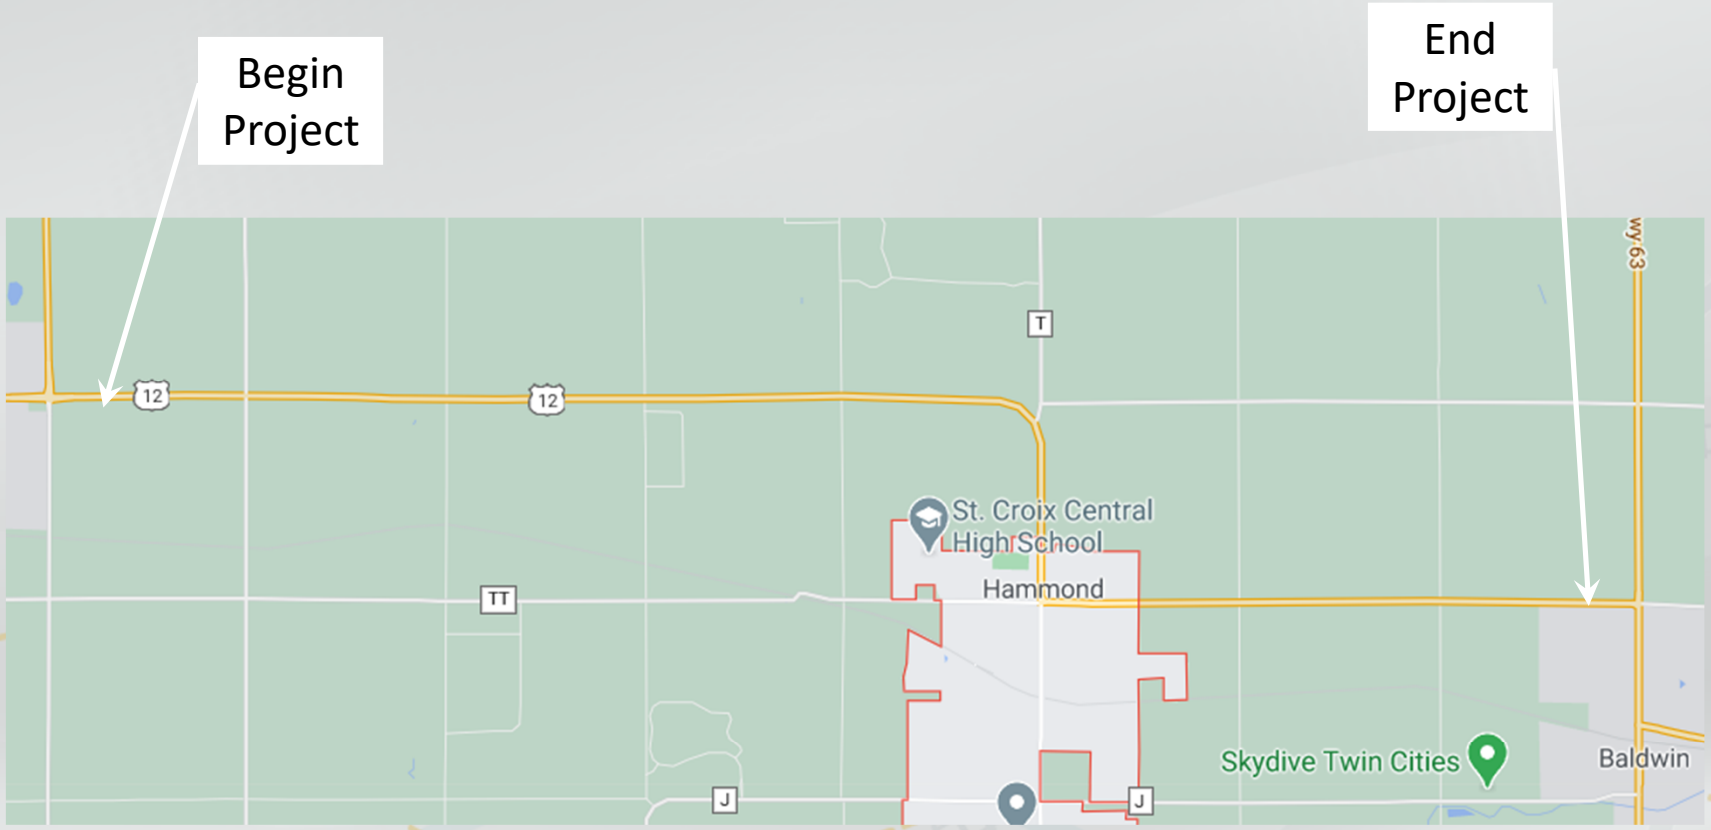
STH 65 North to USH 63 North

Project Update

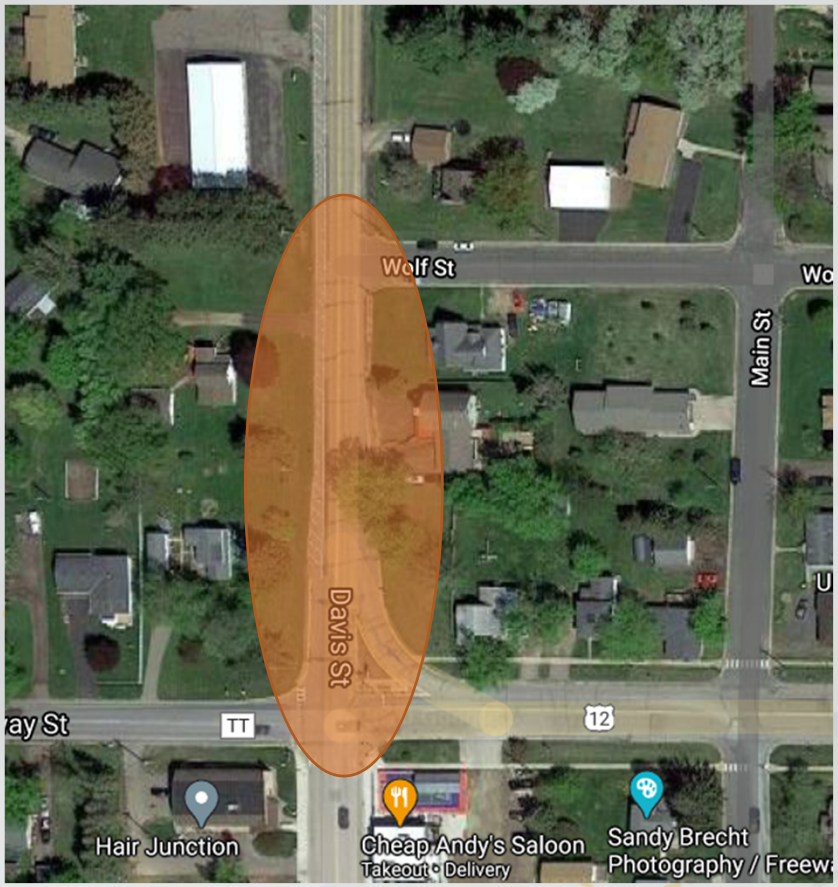
St. Croix County

November 2020

Project Overview | Location

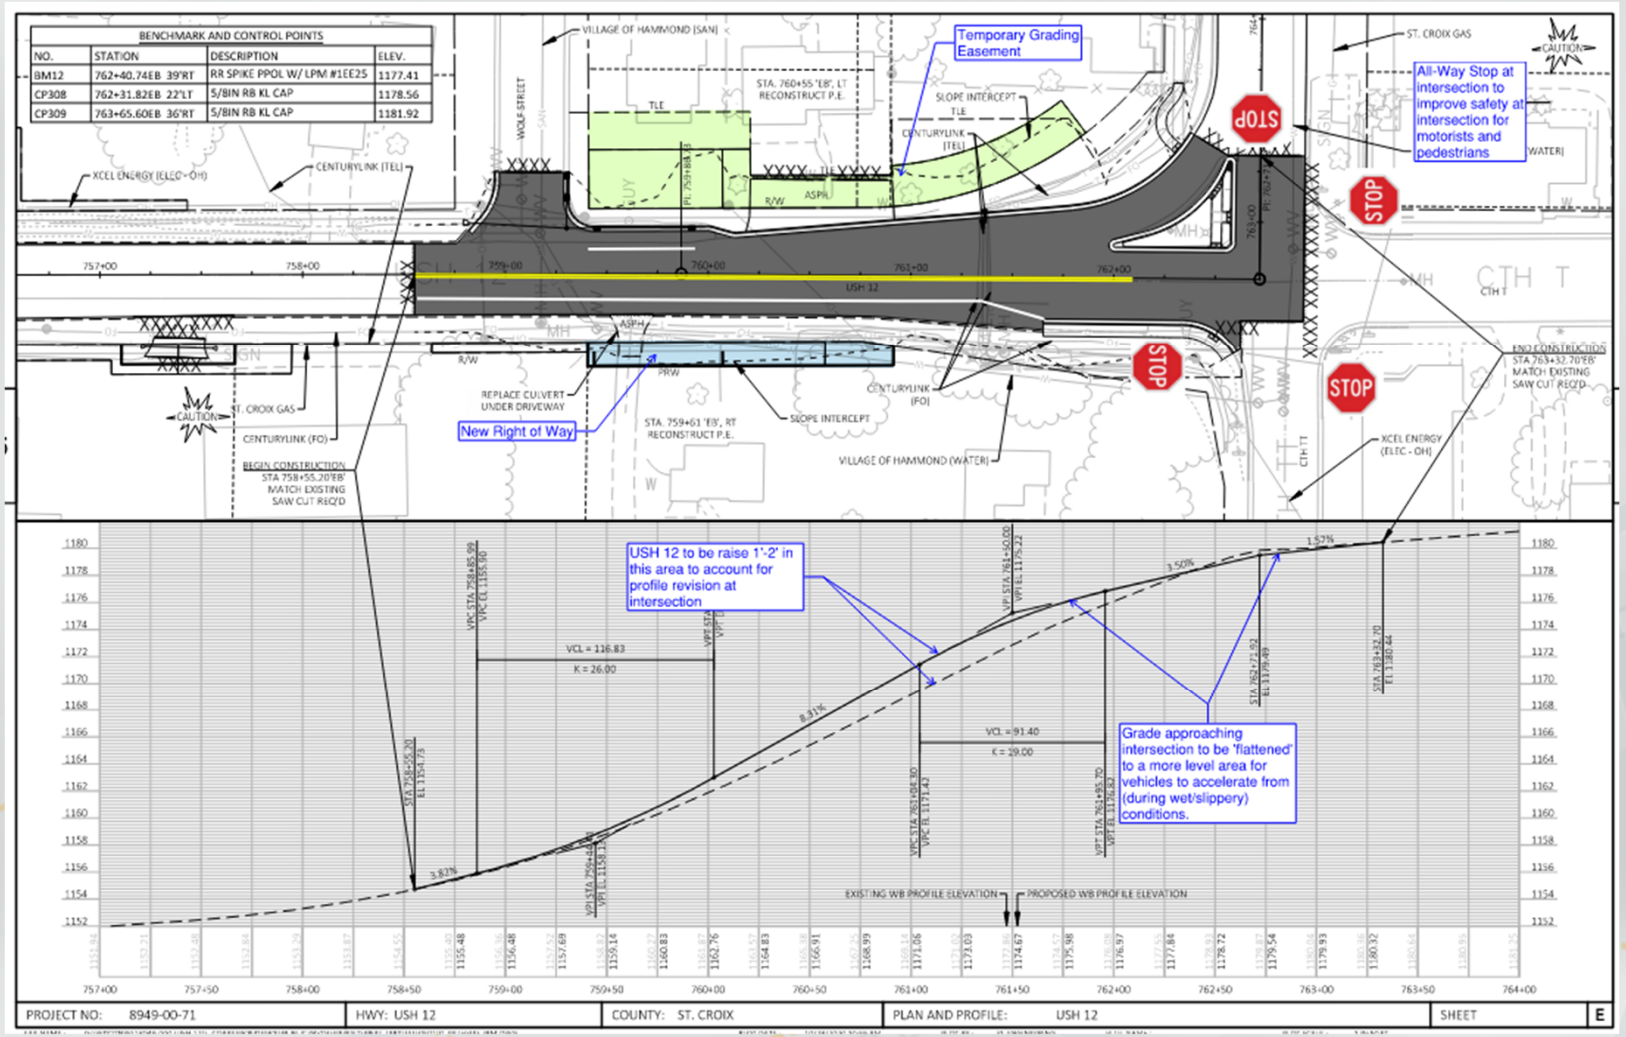


Project Revision | Intersection Improvement Area



WisDOT recently completed a study to investigate the safety and crash history at the US 12/County T/County TT intersection in Hammond. Highway safety improvement funding was approved to make improvements to this intersection as part of the 2021 rehabilitation project.

Project Revision | Intersection



It is proposed to reconstruct this one-block segment of US 12 in order to create a flatter approach grade to the intersection. In addition, the intersection will be revised to four-way stop for added safety.

Project Schedule

- Construction remains on schedule for 2021. The project is scheduled to be let in May with construction likely to start in early summer.

- During the one-block reconstruction in Hammond, along with the box culvert replacement northwest of the village, a detour route will be established for through traffic.

- During the pavement rehabilitation portion of the project (milling and overlaying existing pavement), most work will be completed under flagging operations and some short-term lane closures.

Thank You!

Your comments on this proposed project are much appreciated!
