

## WISCONSIN DEPARTMENT OF TRANSPORTATION September 2013 Design Solicitation

---

### **Revisions / Updates**

The following packages have some changes, as updated on 'Statewide Project list'. Solicitation documents have been updated accordingly.

Added: None  
Removed: None  
Revised: None

### **Question and Answer**

*Some questions are not published to eliminate redundancies, and some are deemed unwarranted*

#### **North Central Region**

No questions were asked.

#### **Northeast Region**

No questions were asked.

#### **Northwest Region**

No questions were asked.

#### **Southeast Region**

No solicitations.

#### **Southwest Region**

##### **SW01, 3270-02-01, 3021-02-02**

- Q: The NOI mentions that Ch. 88 Drainage of Lands knowledge and experience is needed although that is intended for drainage districts. Perhaps that is a typo and you actually mean Ch. 87 Flood Control (with 87.30 and 87.31 pertaining)?
- A: *The intent is to have the consultant design the storm sewer for the project, complying with all of the state and local requirements. There is no mention of Ch. 88 in the NOI.*

##### **SW02, 1670-00-32, 1674-00-02**

- Q: Experience in structure design is the second item listed under the Consultant Requirements; however, the project description states that WisDOT Bureau of Structures will be doing the design work associated with the 2 bridges over the Baraboo River. What structure design tasks is the consultant responsible for?
- A: *The consultant will be responsible for all design coordination requirements with the WisDOT Bureau of Structures designers.*
- Q: The Consultant Requirements list knowledge and experience in the Section 106 process, but no Section 106 document is listed under the deliverables. Is the consultant responsible for providing archaeological and historical investigations and completing the Section 106 documentation?
- A: *As part of the environmental process the consultant will be responsible for all section 106 documentation including archaeological and historic documentation if the project is not included on the screening list.*

## WISCONSIN DEPARTMENT OF TRANSPORTATION September 2013 Design Solicitation

---

### **Bureau of Traffic Operations**

#### **BTO 02, 0697-30-XX**

Q: The solicitation states that firms NOT on WisDOT's Roster of Eligible Consultants may submit. Does this also include out-of-state firms?

A: Yes

Q: The Project Description identifies traffic data collection using MANUAL methods. Would the use of video data collection be permitted instead?

A: *The method for data collection will be identified in each work order depending on need.. Data collection method may include video data collection but that will be identified & must be agreed by WisDOT project manager during initial scoping of the project. .*

### **Bureau of Technical Services**

#### **BTS 01, 0697-20-XX**

Q: Our firm is only able to provide a portion of the services described in the Project Description. Are firms, like ours, that can only provide a portion of the services for the project encouraged to submit or does the WisDOT desire to contract only with firms that can provide all services for the project?

A: *Firms that can provide all services would be given a degree of preference. However, WisDOT, in the past, has chosen several firms that can only provide a number of biological services needed. This choice is dependent on what they can provide and their location.*
