

## January 2024 Solicitation Questions and Responses

| Solicitation | Project    | Question   | Response   |
|--------------|------------|--|--|
| BPD-01       |            | Will separate design and construction full-service master contracts be awarded via BPD-01? If yes and consultants desire both design and construction master contract awards, should key staff and projects be included for both design and construction in the NOI? | Separate contracts will not be awarded. One contract will cover all services.  |
| BPD-01       |            | While paper supplemental materials are not required, are digital supplemental materials still required/recommended?  | Supplemental materials are not required.   |
| NE-01        | 6190-18-00 | Will the consultant identify culvert replacements?<br>Will the consultant identify secondary structure improvements?   | Consultant will be responsible for field reviewing the pipe culverts and preparing a memo to document their condition and need for replacement. WisDOT BOS will provide recommendations on any secondary structure improvements, but there may be minor coordination effort involved with BOS staff.   |
| NE-01        | 6190-18-00 | Who will complete structure plans?   | Structure plans will be completed by WisDOT BOS. Consultant will need to submit SSRs for any structure work. Consultant to review structure plans and complete any necessary coordination with BOS.  |
| NE-02        | 1009-39-46 | How many hours per week are anticipated? Is one part time maintenance engineer required to complete all tasks, or can support staff be used to assist for tasks?   | Approximately 15 hours per week is anticipated. However, there may be weeks when hours are much less or more based off the number of right of way permits under review. It is expected that one part time maintenance engineer be dedicated to process the work on right of way permits, however, support staff could be utilized for the design aspect of the solicitation. |
| SE-02        | 3180-07-01 | Please clarify the need for a Storm Water Report as one of the deliverables.   | Storm Water Report to document the existing condition.   |
