

2013 Wisconsin Annual Transit Report

Transit Section

Bureau of Transit, Local Roads, Railroads, and Harbors

Wisconsin Department of Transportation

December 2014

TITLE VI

It is the policy of the Wisconsin Department of Transportation to ensure compliance with Title VI of the Civil Rights act of 1964, as amended, which protects any person in the United States on the grounds of race, color, or national origin from being excluded from participation, be denied the benefits of, or be otherwise subjected to discrimination under any Wisconsin Department of Transportation service, program or activity receiving Federal financial assistance from the U.S. Department of Transportation.

To this end, the Wisconsin Department of Transportation will ensure compliance with the related civil rights and nondiscrimination statutes and regulations which prohibit discrimination on the basis of race, color, national origin, religion, sex, disability and age in all programs, service or activities.

Any person who believes his /her Title VI protection has been violated may file a complaint with the Wisconsin Department of Transportation. Information on WisDOT's Title VI complaint procedure is available at:

<http://www.dot.wisconsin.gov/business/civilrights/titlevi/complaint.htm>

For additional information regarding Title VI complaint procedures and/or information regarding WisDOT's non-discrimination obligations, please contact Demetri Fisher, WisDOT Title VI Program Officer, Office of Business Opportunity and Equity Compliance, Fax: (608) 267-3641 demetri.fisher@dot.wi.gov

This annual report is available in electronic format only. It can be downloaded and printed from: <http://www.dot.wisconsin.gov/localgov/transit/documents.htm>

INTRODUCTION

PURPOSE OF THE ANNUAL REPORT

The Annual Report is prepared by the Wisconsin Department of Transportation (WisDOT) Transit Section to provide citizens, transportation providers, public officials and other stakeholders an overview of transit in Wisconsin. The report provides a summary of federal and state public and specialized transportation programs along with detailed operational and financial data.

ORGANIZATION OF THE ANNUAL REPORT

The Annual Report begins with a brief overview of the Transit Section with the main part of the report being organized into two sections: Public Transit and Specialized Transit. The appendix of the report provides a county listing of both public and specialized transit service contact information. All contacts listed are current at the time of publication.

The Public Transit Section includes information on programs and services, statewide statistics, trend data, performance measures, major accomplishments and detailed fact sheets of each transit system. There are 81 public transit systems in Wisconsin, which are divided into Tier A1, Tier A2, Tier B and Tier C. The Tier A1 and A2 systems are grouped by operating expenses and Tier B and C systems are grouped based on population served. The Tier A1 system has operating expenses of \$80 million or more, and Tier A2 system has operating expenses between \$20 million and \$80 million. Tier B systems operate in areas greater 50,000 in population (excluding Tiers A1 and A2) and Tier C between 2,500 and 50,000 in population. For the purposes of this report, Tier A1 and A2 will be combined and referred to as Tier A. Tier A has two systems, Tier B, 24 systems and Tier C, 49 systems. These tiers will be used to present and organize information within the report. Statewide statistics and trend data are divided by tier and the fact sheets are grouped by tier and then listed alphabetically.

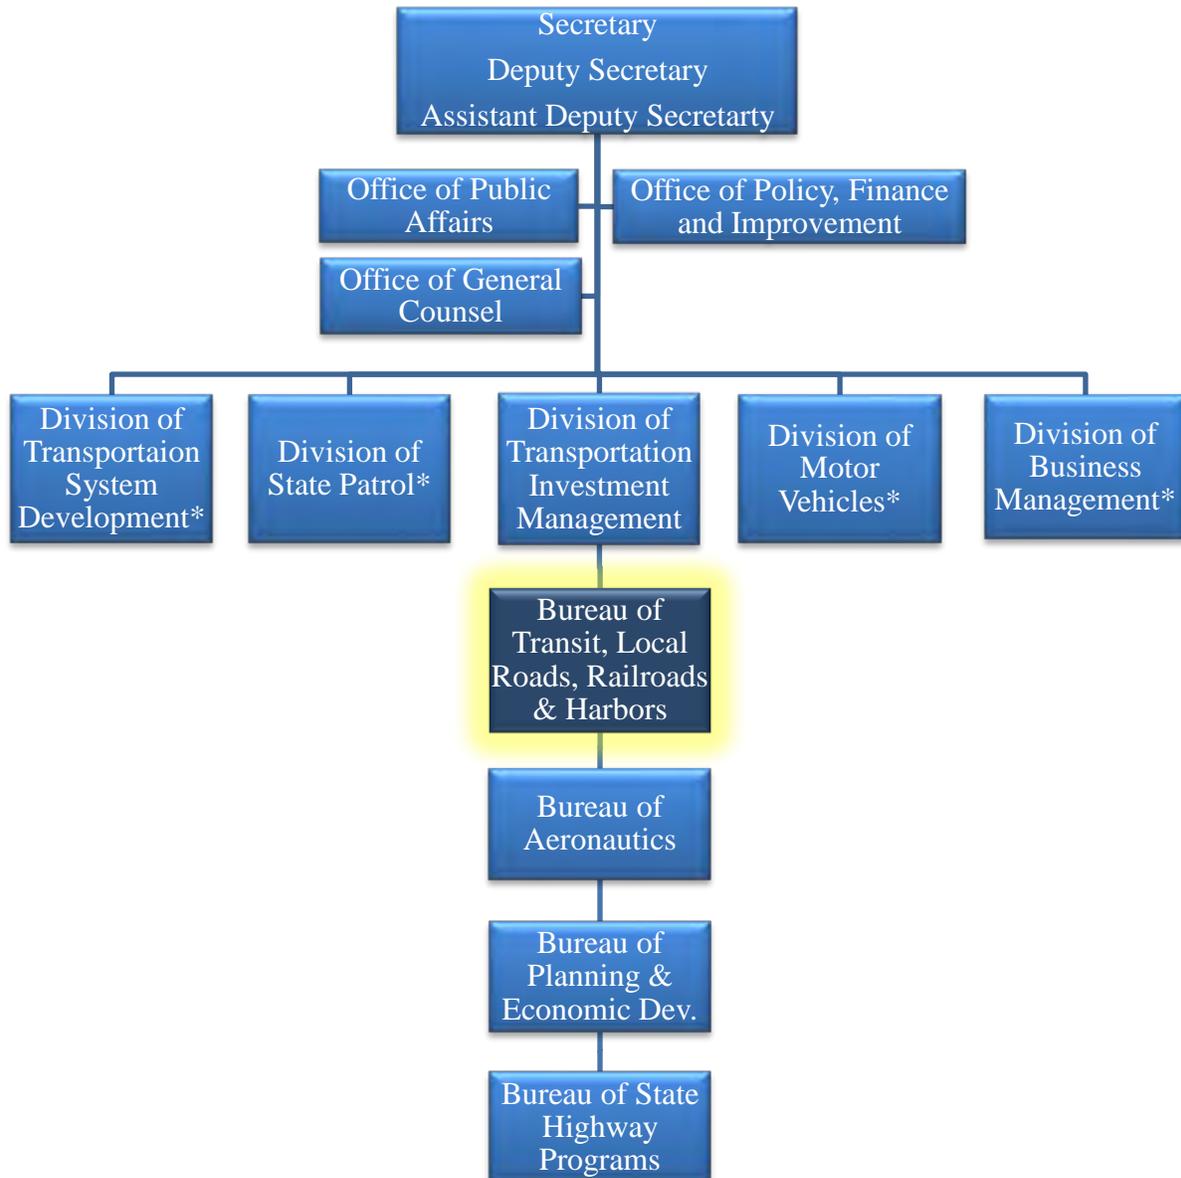

The Specialized Transit Section includes information on programs and services, major accomplishments and detailed fact sheets. The information that is presented on the detailed fact sheets is dependent on each specialized program and is organized into statewide statistics, county or tribe.

FACT SHEET LIMITATION

The transit system fact sheets provide overview information. The hours are from the earliest time all routes begin to the latest time all routes end. There may be breaks in service and all routes may not run these hours. Detailed information can be found on the websites or by contacting the transit service.

TRANSIT SECTION OVERVIEW

In the organizational structure of WisDOT, the Transit Section is located in the Bureau of Transit, Local Roads, Railroads, and Harbors within the Division of Transportation Investment Management (Fig. 1).

*Bureaus in Divisions are omitted for image clarity

Figure 1: WisDOT Organizational Structure

The role of the Transit Section is to administer federal and state funding programs, provide oversight for regulatory compliance and develop policies. Program and Policy Analysts fulfill roles in Administration and Finance, and Program and Policy Development. The list provides current, at the time of publication, staff contact information and specific responsibilities.

PUBLIC TRANSIT

FEDERAL AND STATE PROGRAMS

The Wisconsin Department of Transportation (WisDOT) Transit Section administers federal and state transit funds for capital, operating, planning and training expenses to support public bus, van and shared-ride taxi systems.

STATEWIDE PLANNING PROGRAM (5304)

This program provides assistance to support work and activities resulting in balanced and comprehensive intermodal transportation planning for the movement of people and goods. Examples of projects that have been funded through this program include transit development plans, feasibility studies, strategic plans, and ridership surveys. Recognized public entities in Wisconsin are eligible to apply for funds under this program. This includes, but is not limited to, cities, counties, tribes, transit commissions, metropolitan planning organizations and regional planning commissions. This program covers up to 80 percent of eligible expenses incurred on the project. The remaining 20 percent of expenses are covered locally. The local match must come from a source other than U.S. Department of Transportation dollars. Applications are reviewed for this program on a rolling basis throughout the year.

FEDERAL FORMULA GRANT PROGRAM FOR URBANIZED AREAS (5307)

This program provides assistance with capital expenses, including bus replacement and capitalized maintenance, for transit systems in large urbanized areas (population > 200,000). In Wisconsin these systems include Green Bay Metro, Madison Metro, Milwaukee County Transit System and Valley Transit in Appleton. The grant amounts for each system are determined directly by the Federal Transit Administration (FTA). This program also provides capital and operating assistance for small urbanized areas (population 50,000 – 200,000). For the 24 small urban systems in Wisconsin, the grant amounts are determined by formula.

FEDERAL FORMULA GRANT PROGRAM FOR RURAL AREAS (5311)

This program provides assistance with capital and operating expenses for public transportation in non-urbanized areas (population < 50,000). There are 49 bus or shared-ride taxi systems across the state that receive this type of funding. The annual funding amounts per system are equalized via formula statewide, combining grants from Federal Formula Grant Program for Rural Areas, Federal Formula Grant Program for Urbanized Areas, and the State Urban Mass Transit Operating Assistance Program.

RURAL TRANSIT ASSISTANCE PROGRAM (RTAP)

Federal funding from the 5311 program is set aside to support this program. The funding is used to further the development of skills and abilities for persons involved in providing transit services to rural areas.

SUPPLEMENTAL TRANSPORTATION RURAL ASSISTANCE PROGRAM (STRAP) (5314)

This was a pilot project created and authorized under the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) to determine the degree to which rural and non-urbanized area mobility options could be increased by reducing the required non-federal share. It provides funding for starting, expanding or continuing rural transit projects in 2011 or later. Eligible applicants are local public entities including counties, municipalities, agencies, transit commissions, and Native American Tribes.

BUS AND BUS FACILITIES (5339)

This is a federally funded grant program within the Moving Ahead for Progress in the 21st Century (MAP-21) Act that began in 2013. It provides capital funding to replace, rehabilitate, and purchase buses and related equipment and construct bus facilities. Grants are awarded to urban systems through a competitive application process with evaluation criteria based on consistency with local transit priorities, age and deferred maintenance of vehicles or facilities, and a demonstrated commitment of the local share. Eligible applicants include public agencies and private non-profits engaged in public transportation, including organizations that provide services dependent on age, disability or low-income.

STATE URBAN MASS TRANSIT OPERATING ASSISTANCE (85.20)

The state funds from this program are combined with federal 5311 or 5307 funds to provide operating assistance to transit systems to alleviate local tax burdens. Eligible applicants include municipalities or counties with population greater than 2,500 and transit or transportation commissions or authorities. Non-public agencies are not eligible for these funds. The grant amounts are determined by the Tier System as defined in the state statute and described earlier in this report.

INTERCITY BUS PROGRAM

Intercity bus service plays an important role in Wisconsin's coordinated transportation network. The subsidized routes shown on the map (Fig. 3) connect large urban centers, but more importantly, stop in rural areas to ensure residents there can reach those urban areas for work-related, personal, and leisure trips (facilitating multi-modal travel via airports and rail stations), as well as trips to universities, other educational institutions, and major medical facilities.

WisDOT contracts directly with providers to operate the intercity bus routes, awarding the contract through a competitive process. The FTA requires that 15 percent of Wisconsin's funds from the Federal Formula Grant Program for Rural Areas (5311) are used for intercity bus routes unless needs are met. FTA funds cover a maximum of 50 percent of the net operating losses of those routes, plus any eligible capital costs from adjacent unsubsidized routes that feed into the overall intercity bus network.

Wisconsin began providing Intercity Bus Program funds in 2011, fully subsidizing the seven routes listed below so the program could cover a majority of the state.

- Duluth-Hurley (Indian Trails)
- Duluth-Eau Claire (Jefferson Lines)
- Minneapolis-Green Bay-Milwaukee (Jefferson Lines)
- La Crosse – Madison/Milwaukee (Jefferson Lines)
- Green Bay – Madison (Lamers)
- Wausau – Madison (Lamers)
- Dubuque – Madison (Lamers)

WisDOT has a partnership with Michigan DOT to support intercity bus travel between the Upper Peninsula and the Superior / Duluth area as well as Green Bay and Milwaukee. This arrangement should help U.P. and northern Wisconsin residents meet their regional and national travel needs in the future.

Figure 3: Wisconsin Intercity Bus Routes

STATEWIDE PERFORMANCE MEASURES

This section provides an introduction to two performance measures that WisDOT uses to evaluate the efficiency of the department: the Mobility, Accountability, Preservation, Safety and Service (MAPSS) Performance Improvement Program and the Cost Efficiency Report.

MAPSS PERFORMANCE IMPROVEMENT PROGRAM

The MAPSS Performance Improvement Program is a department-wide initiative led by the Secretary of Transportation, Mark Gottlieb, and implemented in December 2011. It provides five core goals/performance measures to guide WisDOT in providing safe and efficient transportation. The five performance measures are defined as the following:

- **Mobility:** Delivering transportation choices that result in efficient trips and no unexpected delays.
- **Accountability:** The continuous effort to use public dollars in the most efficient and cost-effective way.
- **Preservation:** Protecting, maintaining and operating Wisconsin's transportation system efficiently by making sound investments that preserve and extend the life of our infrastructure, while protecting our natural environment.
- **Safety:** Moving toward minimizing the number of deaths, injuries and crashes on our roadways.
- **Service:** High quality and accurate products and services delivered in a timely fashion by a professional and proactive workforce.

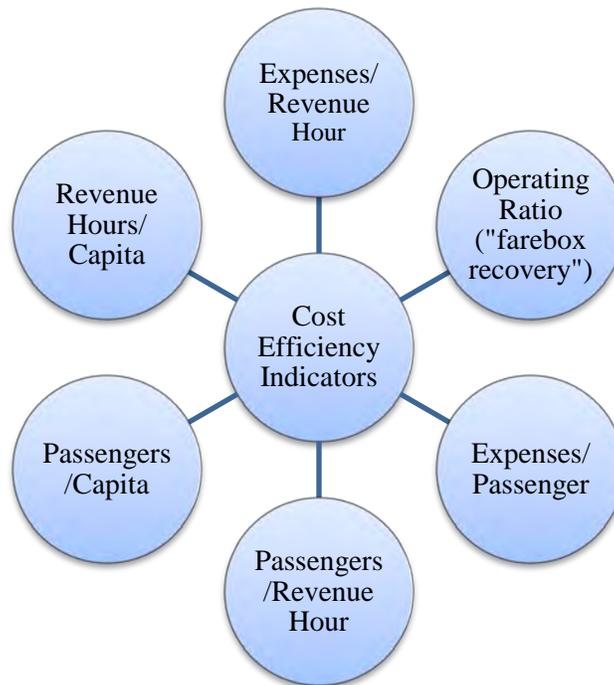

WisDOT releases a quarterly progress report to inform the public and policy makers on the progress in meeting these goals. This quarterly progress report also provides transparency and accountability, creates a results driven environment, and assists with the national performance measures that are required under MAP-21.

In addition to the quarterly progress report, an interactive website (<http://www.mapss.wi.gov>) provides scorecards on each performance measure. These scorecards list the performance measure, how it is measured, the current reporting period, the goal, a check mark if the goal is met, the trend and comments. An example for the Transit Section is the performance measure of mobility which evaluates the percent of the population that is served by transit.

Transit Procurement Process Lean Project which was completed January 31st, 2013, was implemented by the Transit Section to address performance measures. It specifically addresses the performance measures of service and accountability with goals to reduce turnaround time on reviews and approvals, reduce staff time on each SRT procurement and enable local communities to complete the process more efficiently and accurately. The outcome of the project was a reduction in average duration of SRT procurement and staff hours and implementation of procurement toolkits.

COST EFFICIENCY REPORT

WisDOT is required to have cost efficiency standards for the state’s transit systems, as specified by Wis. Statute 85.20 and Administrative Rule TRANS 4. The cost efficiency report considers the six performance indicators which are used to compare the relative efficiency of transit systems.

Wisconsin transit systems are broken into seven categories for the purposes of the report: small-community bus, medium-community bus, commuter bus, shared-ride taxi services, county-wide taxi services, as well as Madison and Milwaukee County peer groups. Dividing the systems in this manner allows for fair and reasonable comparisons. Madison Metro, Milwaukee County Transit System, and medium-sized bus systems are compared to a group of nationwide peers, all of whom report their statistics to the National Transit Database. The analyses for the small-community and commuter bus systems, as well as shared-ride taxi services, use a statewide peer group for comparison, since comparable national transit data are not available.

MAJOR ACCOMPLISHMENTS

NEW SERVICES

SMRT Bus

The Scenic Mississippi Regional Transit (SMRT) began offering commuter bus service between Crawford, Vernon and La Crosse Counties in late 2012/ early 2013. The SMRT bus offers commuters a way to get to work, medical appointments, shopping, classes, etc. with scheduled stops at hospitals/clinics, shopping centers, large employers and technical colleges/universities.¹

Source: <http://www.ridesmrt.com/>

Lac du Flambeau

The Lac du Flambeau Tribe received a STRAP grant in 2013 to assist with starting-up a demand-response and deviated fixed-route service on the Lac du Flambeau Reservation in Vilas County, with service to Minocqua and Woodruff. This is the only public transit service in the area and provides increased mobility for community residents.²

Source: http://www.ldftribe.com/files/news/11-27-2013-LDF-Transit-Begins-on-Dec-2_177.pdf

Madison Metro

Madison Metro Transit expanded service in 2013 to underserved neighborhoods and increased levels of service along the University Ave corridor. These areas of service concerns were identified by passenger and neighborhood input.³

³ <http://www.wurta.com/legmadison.pdf>

FACILITIES

There are a number of benefits to constructing new facilities, including, but not limited to modernizing facilities for efficiency and providing more vehicle storage. Five facilities were completed in 2013. These facilities are: Bay Area Regional Transit (BART), Bad River Tribe, Ozaukee County, Sawyer County and Stevens Point. The ground breaking also occurred for a new facility in Janesville.

PLANNING

Bus Rapid Transit (BRT) Study

In 2013 a BRT Study was completed for the Madison area. BRT would alleviate overcrowding on buses and reduce travel times with frequent all-day service, fewer stops, transit signal priority, dedicated bus lanes and off-board payment systems.⁴

⁴ <http://www.wurta.com/legmadison.pdf>

Transit Development Plan

Washington County, with the help of the Southeast Wisconsin Regional Planning Commission, created a short-range, five-year Transit Development Plan. It includes recommendations for transit service and capital improvements for the Washington County Transit System.⁵

VEHICLES/EQUIPMENT/TECHNOLOGY

Ozaukee County implemented a new “Notification Module” in their scheduling/dispatch system for Shared-Ride Taxi Service that calls scheduled riders the night before and allows riders to obtain their pickup times and to cancel their rides if they choose.

Washington County implemented Automatic Vehicle Locators (AVL) and Mobile Data Computers (MDC) on their Shared-Ride Taxi Service. The benefits of this technology include increased efficiency and productivity of the service, along with improved travel information for riders.

Green Bay Metro completed the installation of a new bus wash with State of Good Repair dollars and updated their radio system.

STATEWIDE STATISTICS

The statewide statistic graphs and charts present a comparison of operational and financial data for Tier A, Tier B, and Tier C. Operational data includes revenue/vehicle hours, revenue/vehicle miles and total trips. Financial data includes funding in categories of revenue, federal, state and local, as well as expenses.

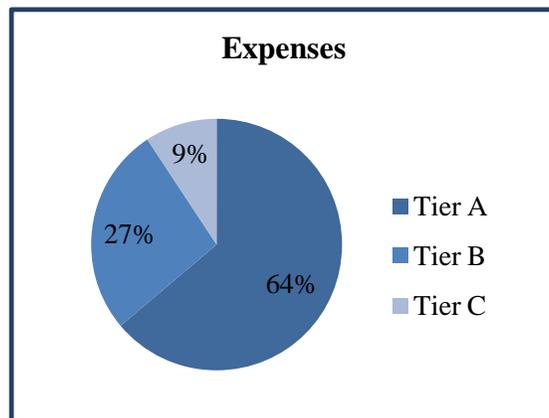

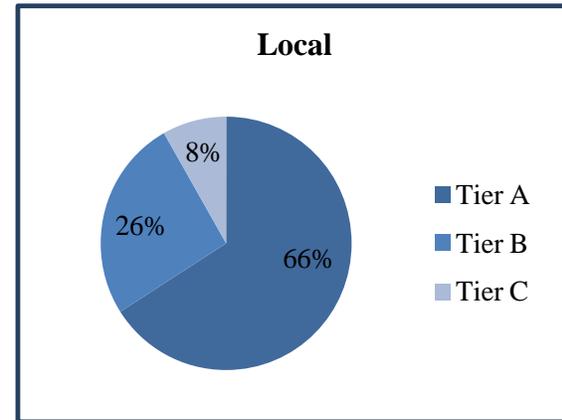

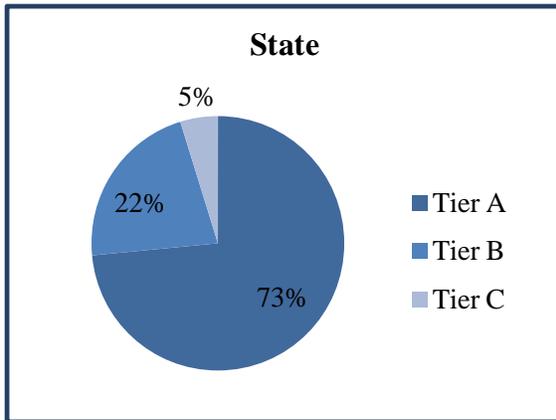

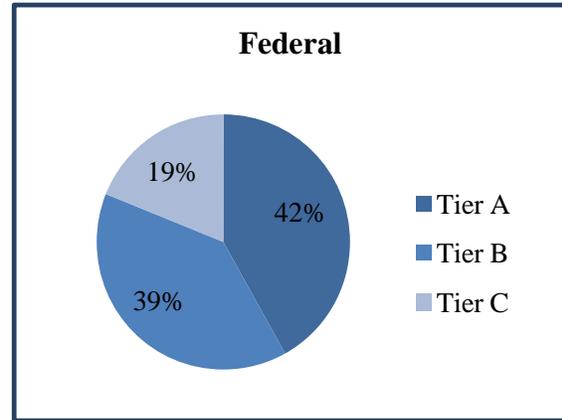

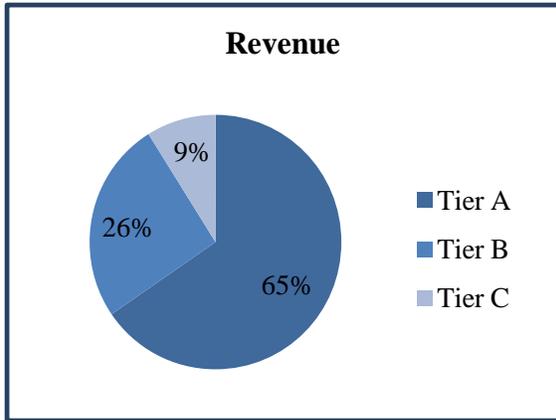

OPERATIONAL STATISTICS

Tier	Operations		
	Revenue/ Vehicle Hours	Revenue/ Vehicle Miles	Total Trips
Tier A	1,910,448	25,061,870	58,555,041
Tier B	1,115,842	16,875,150	13,381,506
Tier C	744,093	9,675,449	2,939,385

FINANCIAL STATISTICS

Tier	Funding				Expenses
	Revenue	Federal	State	Local	
Tier A	\$44,542,161	\$24,516,881	\$77,944,100	\$38,976,080	\$185,979,222
Tier B	\$17,542,862	\$22,925,229	\$23,082,275	\$15,258,343	\$78,587,261
Tier C	\$6,046,387	\$11,007,259	\$5,066,914	\$4,874,907	\$26,995,467

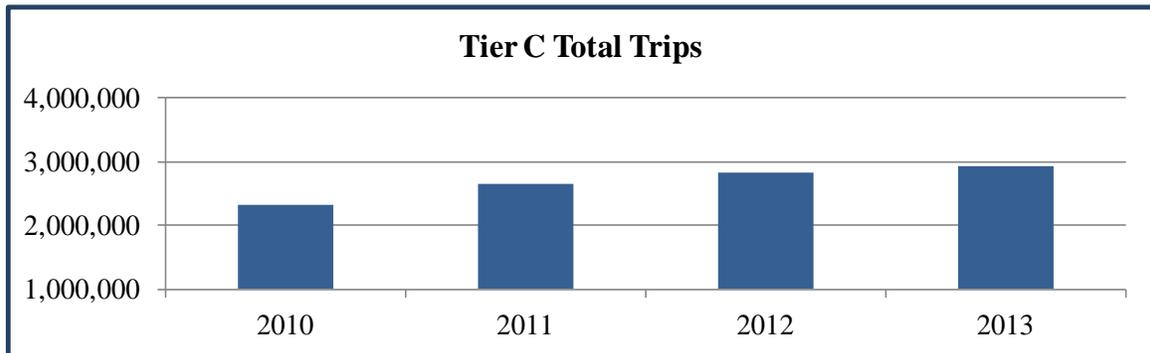

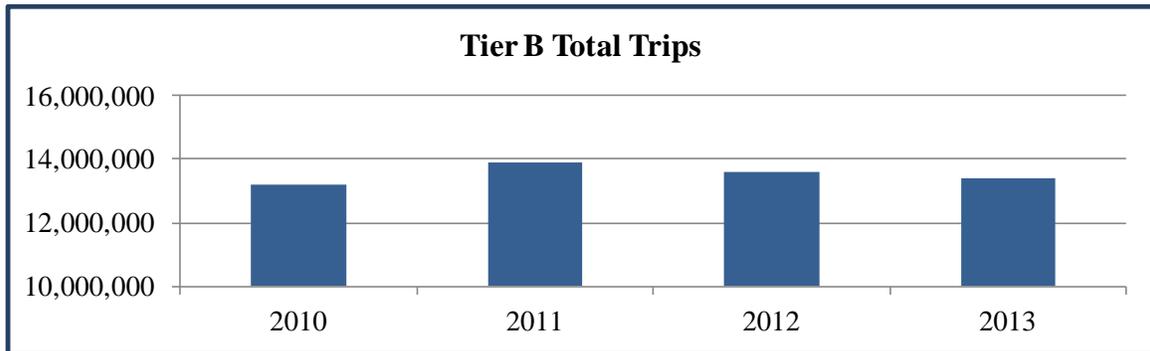

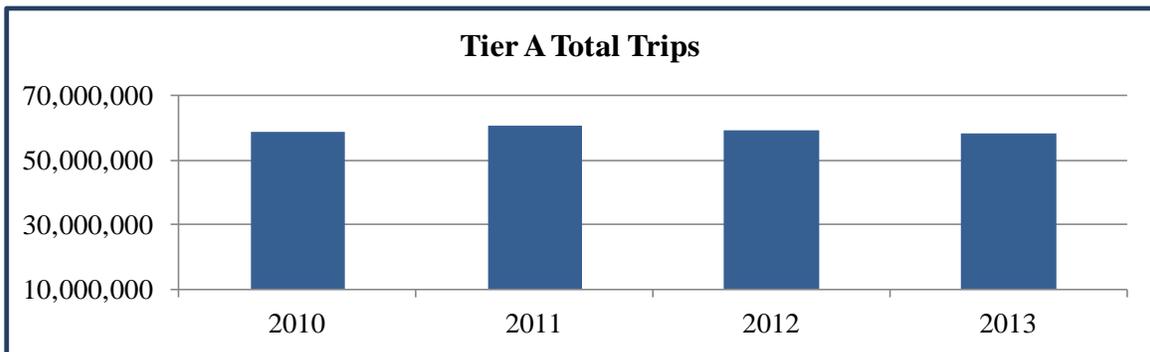

TREND DATA

The trend data graphs and charts present a four year overview of operational and financial data for Tier A, Tier B, and Tier C. The reporting periods are on a calendar year basis. Operational data presents the total trips for the years 2010-2013. Financial data includes funding in categories of revenue, federal, state and local, as well as expenses for those same years.

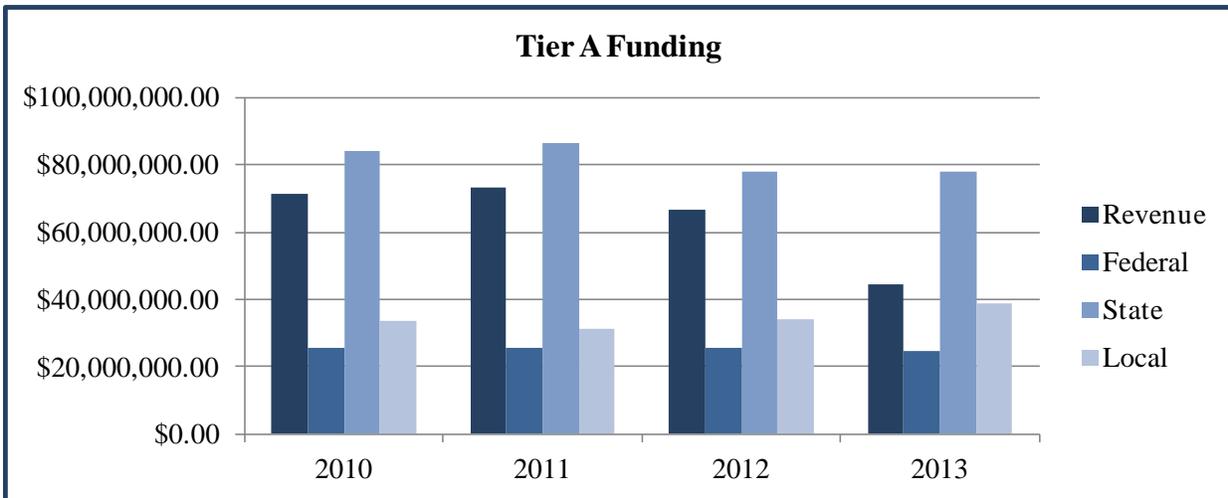

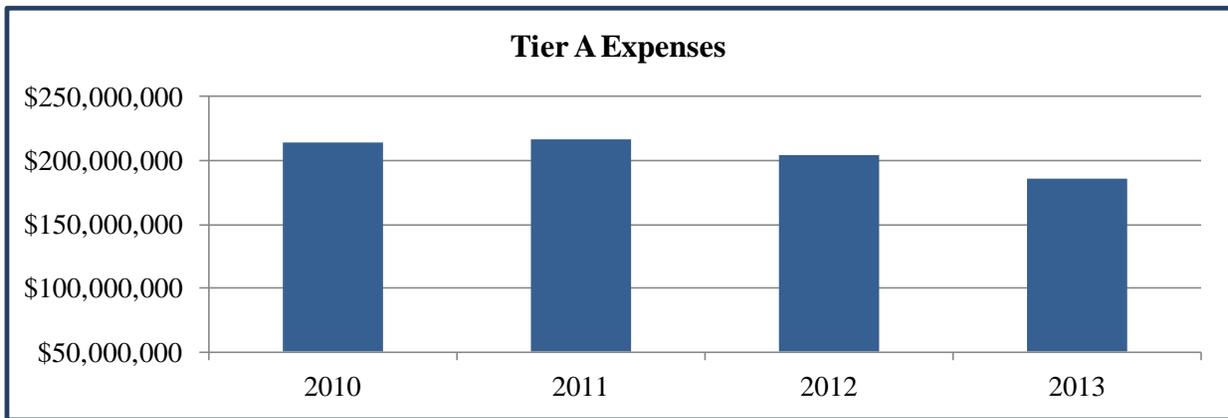

OPERATIONAL TRENDS

Tier	Total Trips			
	2010	2011	2012	2013
Tier A	59,068,834	60,822,137	59,496,398	58,555,041
Tier B	13,199,885	13,915,163	13,583,686	13,381,506

SPECIALIZED TRANSIT

INTRODUCTION

In addition to public transit, the Wisconsin Department of Transportation (WisDOT) Transit Section administers federal and state transit funds to assist with operating and/or capital expenses to support specialized transit services and programs. Specialized transit programs can provide services for seniors, disabled and low-income individuals.

FEDERAL AND STATE PROGRAMS

TRANSPORTATION FOR ELDERLY PERSONS AND PERSONS WITH DISABILITIES (5310)¹ / ELDERLY AND DISABLED TRANSPORTATION CAPITAL ASSISTANCE PROGRAM (85.22)

This program utilizes federal 5310 and state 85.22 funds to provide assistance with vehicle purchase projects that improve the mobility of seniors and individuals with disabilities.² The cost of the vehicle is split 80/20 with local paying 20 percent. Grants are awarded on a two-year application cycle. Eligible applicants include private non-profits, local units of government and operators of public transit.

NEW FREEDOM (5317)³

This is an annual competitive federal grant program intended to provide additional tools for overcoming transportation barriers to Americans with disabilities who are seeking to fully participate in society. New Freedom funds will support new public transportation services and alternative services beyond those required by the Americans with Disabilities Act of 1990 (ADA) designed to assist individuals with disabilities in accessing transportation services. Projects include: mobility management, operating assistance, volunteer driver, voucher and capital purchase. Eligible applicants include private non-profit organizations, local public bodies, and operators of public transportation services, including private operators of public transportation services.

¹ At the writing of this report the name has changed to “Enhanced Mobility of Seniors and Individuals with Disabilities”

² MAP-21, which went into effect October 2012, expanded this program to also include operating expenses. WisDOT will be implementing this change for the 2015 application cycle.

³ Program was repealed in MAP-21; projects that were eligible for this funding will be eligible for funding under 5310. WisDOT will be implementing this change for the 2015 application cycle.

SPECIALIZED TRANSPORTATION ASSISTANCE PROGRAM FOR COUNTIES (85.21)⁴

This program provides all 72 Wisconsin counties with financial assistance for transportation services for elderly and disabled individuals. State funds are allocated to the counties on an annual basis based on their elderly and disabled population and require a 20 percent local match. Eligible expenses include providing direct, assisting in funding or purchasing transportation service from any public or private provider, coordinating transportation services, in-service training for transportation services, purchasing equipment such as vehicles and wheelchair lifts, directly subsidizing passengers for use of transportation services, and conducting planning/management transportation studies.

TRIBAL TRANSPORTATION FOR ELDERS (85.215)

This is a state funded program that began in 2009 and provides funds to assist in tribal elderly transportation. Funds are awarded on an annual application cycle to eligible applicants, with each of the 11 federally recognized tribes in Wisconsin receiving an equal share. Eligible expenses include providing transportation services, reimbursing tribal elderly individuals for use of transportation, planning/management transportation studies, coordinating transportation services, and in-service training for transportation services.

WISCONSIN EMPLOYMENT TRANSPORTATION ASSISTANCE PROGRAM (WETAP)⁵

This program provides funding for new or expanding programs that assist in employment transportation needs for low-income workers. It began as a joint effort between WisDOT and the Wisconsin Department of Workforce Development (DWD) and combines federal Job Access Reverse Commute (JARC) funds, WisDOT Transportation Employment and Mobility (TEAM) funds and DWD Employment Transit Assistance (ETA) funds. Grants are awarded through an annual competitive grant application process. Eligible applicants include public, private and non-profit transportation providers. Examples of projects include late-night and weekend service, guaranteed ride home service, expanding fixed-route public transit, car loan programs, ridesharing, mobility management and transportation coordination, and demand-response van service.

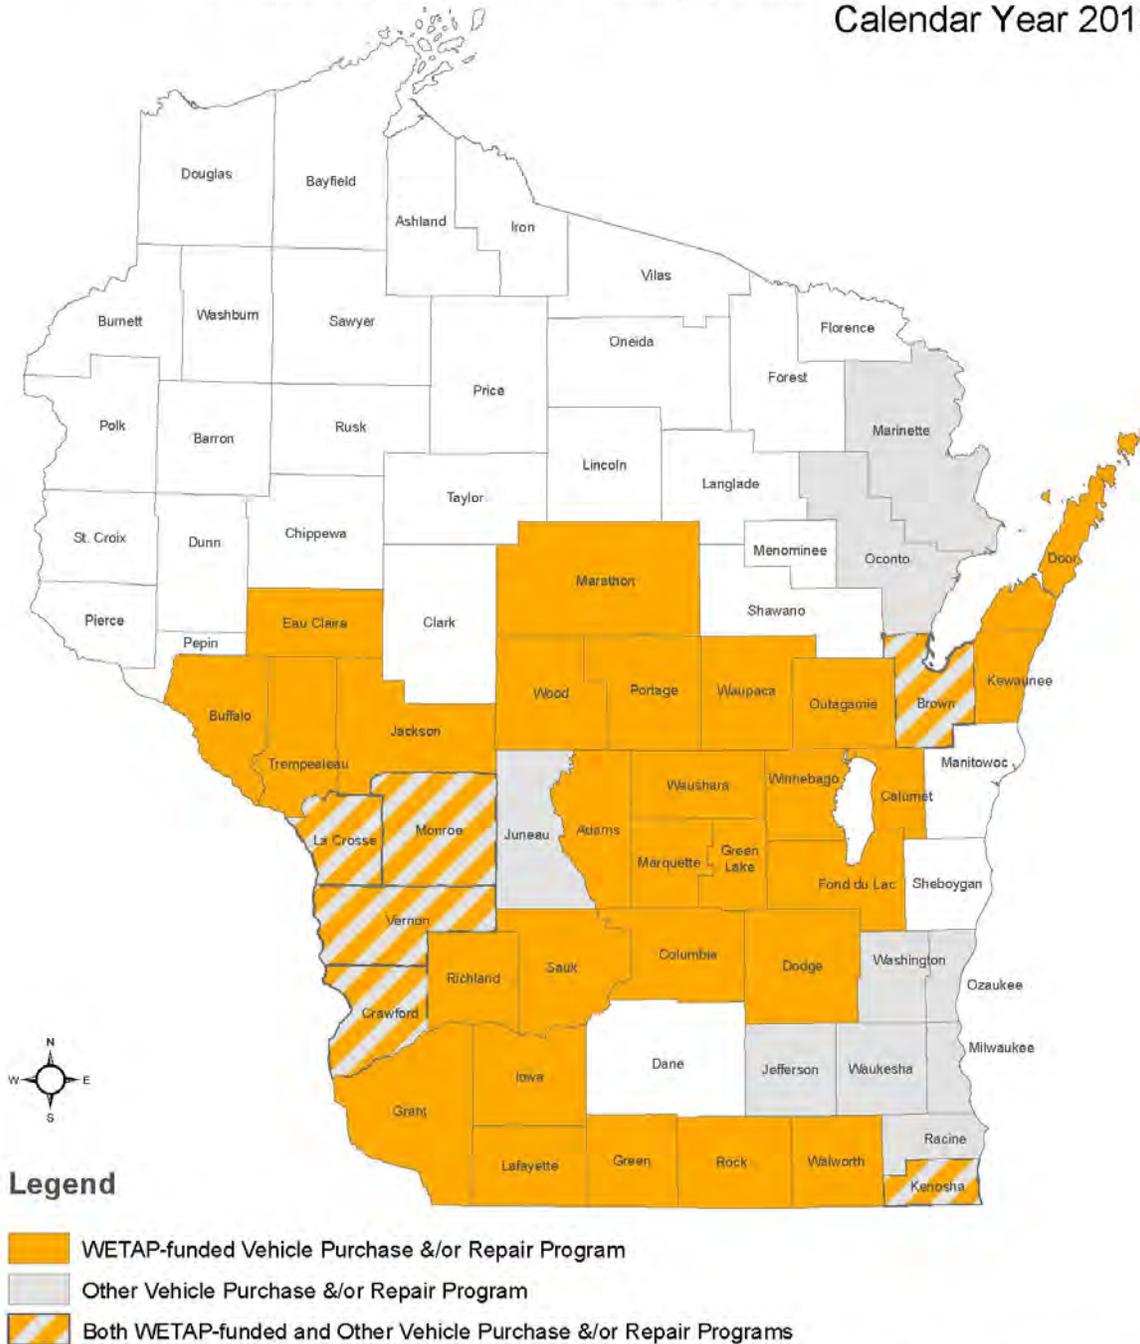

⁴ At the writing of this report the name has changed to “County Elderly and Disabled Transportation Assistance”

⁵ JARC Program was repealed in MAP-21, activities were made eligible for public federal 5311 or 5307 funds.

FEDERAL INITIATIVES

MOBILITY MANAGEMENT

Mobility management is an innovative approach to coordinating services and providers to meet individual customer needs and provide efficient transportation. Mobility managers work in a variety of agencies including ADRCs, local governments, community action programs, transit systems, human/social service agencies, independent living centers and economic opportunity councils. Tasks include inventorying existing services, indentifying customer needs, developing strategies to meet needs, coordinating financial and other resources, training staff/volunteers, promoting innovative technologies and developing trip planning systems. Funding can come from a variety of sources including New Freedom, WETAP and STRAP.

TRANSPORTATION COORDINATION

Transportation coordination is a process in which human service agencies, transportation providers, consumer groups and public officials work together to improve transportation services for transportation disadvantaged individuals. It includes cooperation, coordination and sharing of resources to achieve the goals of improving transportation options and access, minimizing service duplication and facilitating cost effective transportation. Federal transit law requires that in order for projects to receive 5310, WETAP or New Freedom funding they must be derived from a locally developed, coordinated public transit-human services transportation plan. These plans need to be redone every 4 or 5 years, depending on the location in the state. WisDOT has collaborated with Regional Planning Commissions to develop a coordination planning process and toolkit in response to this requirement.

MAJOR ACCOMPLISHMENTS

New Freedom (5317)

Through funding assistance provided by the New Freedom program, the Center for Independent Living for Western Wisconsin, Inc., and North Country Independent Living have coordinated transportation services to cover an 18 county area of Northwestern Wisconsin in an effort to share valuable resources. Since 2008, the agencies have grown their coordinated programs to provide more than 143,864 one-way trips. Their volunteer driver and voucher programs have helped over 1,800 seniors and individuals with disabilities that have transportation barriers get to important destinations such as medical appointments, trips to the grocery store and social activities. The drivers have traveled over 3,794,381 miles in this very rural area, with the average one-way trip being 40 miles and taking over 90 minutes.

Coordinated Plan Development

In 2013, the Specialized Transit Program Manager worked with the regional planning commissions, county agencies, and transportation providers to develop, human services transportation coordination plans for the majority of Wisconsin counties. The plans are required for any project requesting funding under Section 5310, 5316 or 5317 and for state 85.21 funds. The plans must be updated every five years for counties in ozone non-attainment zones and were last completed in 2008. The plans require public meetings where seniors and individuals with disabilities and their advocacy groups are invited to participate in developing the plans. All county and regional plans are available for viewing on the WisDOT website.

FACT SHEETS:
5310

STATEWIDE STATISTICS

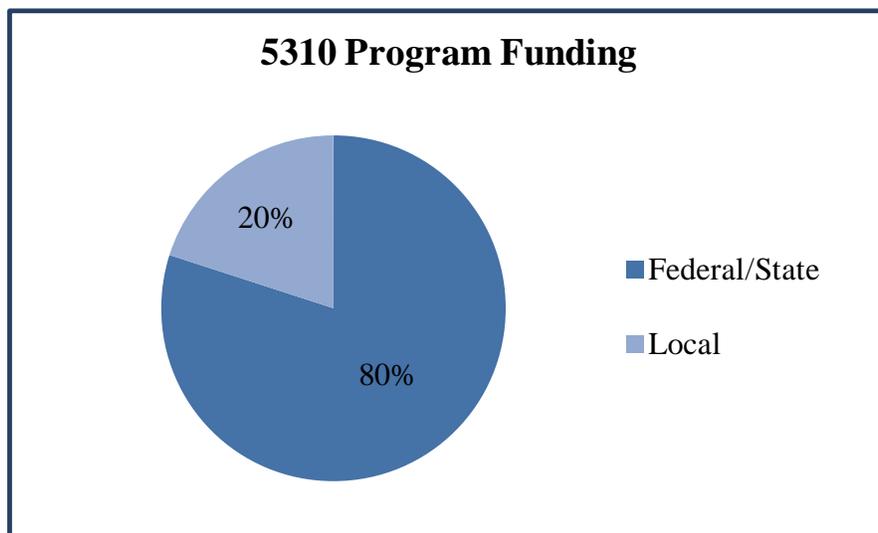

The 5310 Program statistics are presented as statewide. Operational data includes total annual one-way trips and total number of vehicles based off of information received from the 84 active sub-recipients. Financial data includes combined federal and state funding and local funding for recipients who received money in 2013, of which there are 37.⁶

OPERATIONAL STATISTICS

Sub-recipient	Operations	
	Annual One-Way Trips	# of Vehicles
Total	1,213,289	690

FINANCIAL STATISTICS

Sub-recipient	Funding		
	Total	Federal/State	Local
Total	\$3,966,131	\$3,172,905	\$793,226

⁶ Active sub-recipients include all sub-recipients with active vehicles. This is not based on what year funding to purchase the vehicle was received. Operational data includes all active sub-recipients while financial data is only for those recipients who received money to purchase vehicles in 2013.
