

Thank You for attending this Public Information Meeting regarding the WIS 32 project located within Racine County.

This open house meeting is an opportunity to meet with project staff from the Wisconsin Department of Transportation and its engineering consultant team.

We Welcome Your Input

The project design team is interested in receiving your comments regarding the project, so please discuss your comments with project representatives here today or complete and return the comment sheet.

Contact Information

If at any time during the project you have any questions or would like more information about this project please contact:

Project Information

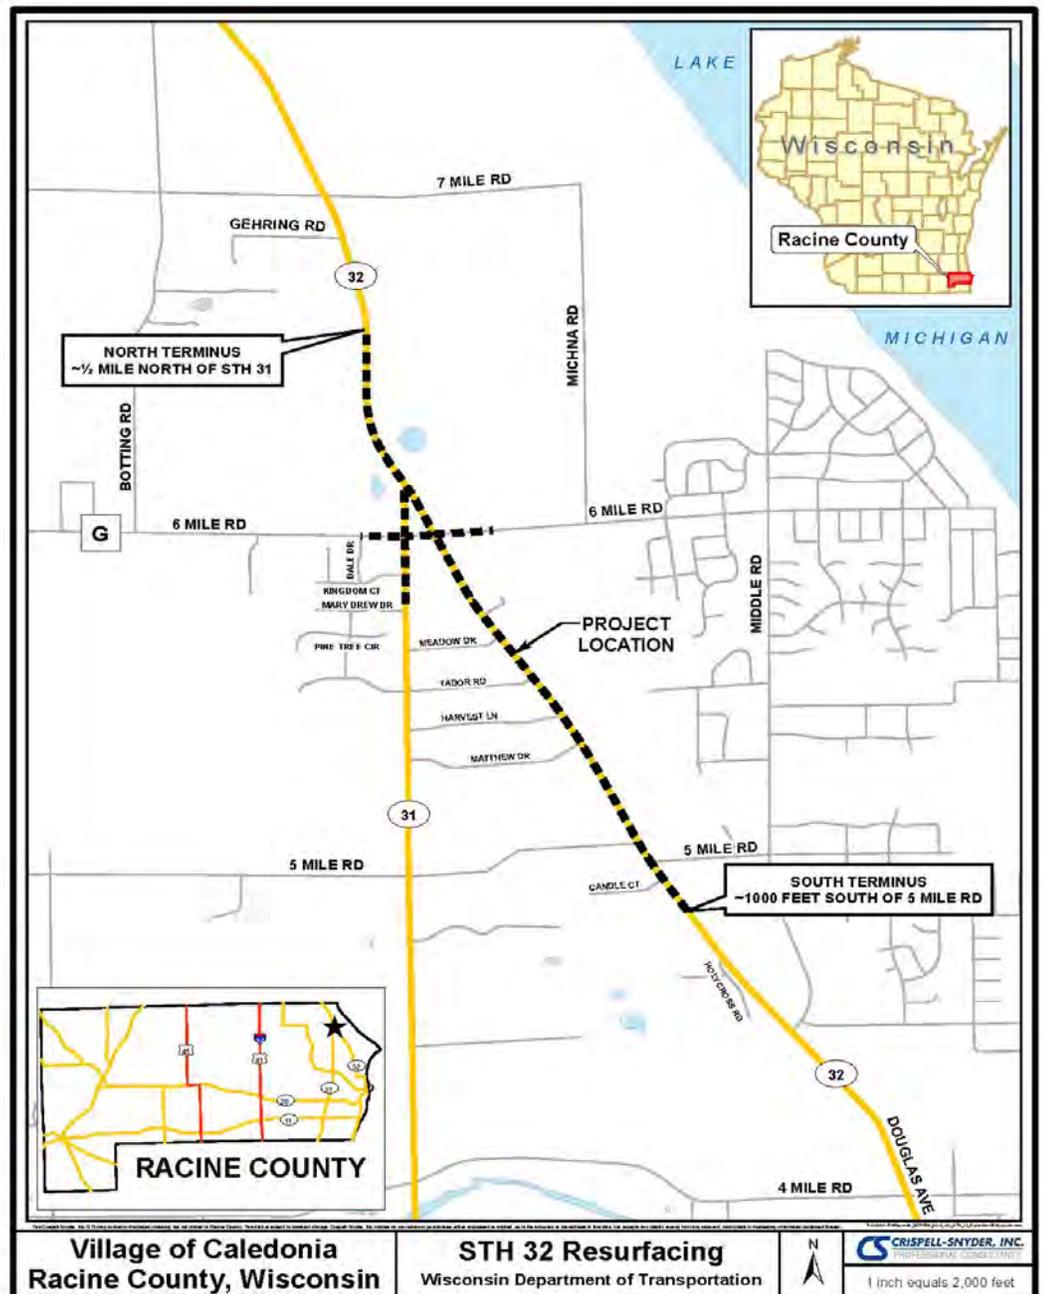

WIS 32

Racine County

I.D. 2350-09-01

Project Description

The WIS 32 project is located in Racine County within the village of Caledonia. The southern project limit is at 5 Mile Road, and the northern project limit is about ½ mile north of the intersection of WIS 32 and WIS 31. The total length of the WIS 32 project is about 1.7 miles, shown on the map below as a dashed line.

Purpose and Need

WIS 32 carries between 8,600 vehicles and 10,600 per day throughout the project length. About 6% of these daily traffic volumes are composed of trucks. WisDOT forecasts this traffic to reach between 9,600 and 12,800 vehicles per day in year 2030.

The project need is based on:

- Deteriorating pavement
- Increasing traffic volumes and queues
- Safety concerns

Project objectives include:

- Improve driving conditions
- Increase safety
- Accommodate bicycle users

Proposed Improvements

The project proposes to resurface WIS 32. There will be no change to the roadway centerline throughout the project.

The WIS 32 corridor will receive:

- Intersection improvements
- Wider paved shoulders
- Traffic signal upgrades

Construction

The project is scheduled for construction in the year 2018.

Access during Construction

The use of staged construction will be implemented for this project. Short detours may be posted for non-local traffic. Access for local traffic to and from residences and businesses within the construction zone will remain open at all times.

Don't forget to fill out a comment form. The project team reads, considers, and appreciates all comments.

Your comments are a **critical part** of the design process.

Right-of-Way

Additional highway right-of-way is required to increase safety and improve the traffic operations at the intersections of WIS 32 and 6 Mile Road, WIS 32 and WIS 31, and WIS 31 and 6 Mile Road. The right-of-way acquisition process will begin in 2014.
