

Stoughton Road report

September 2004

Bicycle and pedestrian access

East Broadway to Larson Beach Road, Dane County

Overview

In order to maintain safe and efficient transportation for all travelers, WisDOT is constructing bicycle/pedestrian facilities along Stoughton Road (US 51) between East Broadway and Larson Beach Road.

The project also includes a segment through the beltline interchange as well as a path to connect Larson Beach Road to the cul-de-sac at the south end of Terminal Drive.

Proposed improvements include:

- Off-road bicycle/pedestrian path between Larson Beach Road and the cul-de-sac at the south end of Terminal Drive.
- Off-road bicycle/pedestrian path on the east side of Stoughton Road between South Dutch Mill Road and East Broadway. The path will extend along East Broadway to the park and ride lot.
- Bicycle lanes along the northbound and southbound lanes of Stoughton Road (US 51) between the eastbound US 12/18 ramp terminals and East Broadway.
- Improvements to median noses/islands as needed at the intersections of Stoughton Road and East Broadway and the US 12/18 westbound and eastbound ramp terminals. A paved shoulder will be added on the west side of Stoughton Road at the Vogues Road/Terminal Drive intersection.
- Construction of a retaining wall under the US 12/18 structures along the east side of Stoughton Road to accommodate the additional roadway width and bicycle/pedestrian path.

Project schedule

Final plans are being completed and construction is scheduled to begin in summer 2005.

- Public information meeting July 14, 2004
- Final plans completed Fall 2004
- Begin construction..... Summer 2005
- End construction Fall 2005
