

Traffic Guidelines Manual

ORIGINATOR State Traffic Engineer	2-2-50
CHAPTER 2	Signing
SECTION 2	Regulatory Signs
SUBJECT 50	Spacing of Reminder Signs

EMERGENCY STOPPING ONLY

The R8-7 EMERGENCY STOPPING ONLY sign **shall** be used on expressways and freeways only. The R8-7 sign *should* be placed at random intervals of about 15 miles, generally being located just beyond the signing required after an interchange.

SLOWER TRAFFIC KEEP RIGHT

The R4-3 SLOWER TRAFFIC KEEP RIGHT sign *may* be used on multiple-lane roadways to reduce unnecessary weaving. On conventional highways, it *should* be erected just beyond the beginning of a multiple-lane pavement, and selected locations where there is a tendency on the part of the motorist to drive in the left-hand lane (or lanes) below the normal speed of traffic. On freeways and expressways, the sign **shall** be erected at random intervals of about 7½ miles, generally just beyond the signing required after an interchange. It *should* not be used on the approach to an interchange or through an interchange area. Successive signs **shall** be alternated between the median and the right hand side of the roadway.
