

Traffic Guidelines Manual

ORIGINATOR State Traffic Engineer	2-3-45
CHAPTER 2	Signing
SECTION 3	Warning
SUBJECT 45	Icy Bridge Deck Signing

General

The Regional Traffic Engineer *may* use the BRIDGE MAY BE ICY sign (sign W8-64) on bridges which display problems caused by the formation of ice.

The use of the BRIDGE MAY BE ICY sign **shall** be based on Region discretion. The Region can be aided in this decision by checking with local maintenance and law enforcement officials to see if an ice problem exists at a bridge site. The Region can also analyze crash rates at the bridge site that are based, on ice.

The WATCH FOR ICE ON BRIDGE sign **shall** no longer be used. The existing WATCH FOR ICE ON BRIDGE signs *should* be replaced, as they wear out.
