

## Traffic Guidelines Manual

ORIGINATOR State Traffic Engineer		3-15-10
CHAPTER 3	Markings	
SECTION 15	Comprehensive Policy	
SUBJECT 10	Push Over Marking	

### A. Purpose

This subject describes push over marking that guides the motorist to the right lane in a passing lane and truck-climbing lane.

### B. Policy

A push over marking **shall consist of a 12-foot cycle, 3-foot segment with a 9-foot gap**. This marking tapers from the centerline to the beginning of the lane line that separates the two lanes traveling in the same direction.

The marking configuration **shall extend a barrier line 500 feet** in advance of the beginning of the taper. A double barrier line *may* be needed on the centerline due to sight conditions. These pavement markings are shown on a standard detail drawing in the Facilities Development Manual. (SDD 15C 8-13c and d).
