Bridge rehabilitation work to begin along WIS 83 in Waukesha County

On Monday, September 21, the Wisconsin Department of Transportation (WisDOT) will begin rehabilitating the WIS 83 bridge over the Bark River in the village of Hartland. Located between I-94 and WIS 16, the project consists of repairing and overlaying the bridge deck, as well as overlaying the adjacent roadway segments approaching the bridge.

What to Expect

- WIS 83 will be closed to all traffic at the Bark River.
- Through-traffic will be detoured along County KE and WIS 16.
- Local access will be available up to the road closure located at the bridge. Alternative routes to nearby businesses and residences are accessible.

The project team anticipates work will be completed by mid-October. This schedule is weather dependent and subject to change. More information about this bridge project, and other structures in the area can be found at:
