Volunteer Transportation Program

Clark County Department of Social Services provides non-emergent medical transportation for persons 60 years of age or older, persons with disabilities and other approved persons who complete a Volunteer Transportation Assessment and are determined eligible. Transportation is provided by area volunteers on a first come, first serve basis.

Eligibility

The client is asked to fill out a Transportation Application. If a client is found to be eligible for services, it is then determined if the client will be responsible for a co-payment based on their financial ability. The co-payment would be a percentage of the total cost of the trip. If the client chooses not to provide financial information, they will be responsible for the full cost of the transportation.
