Greetings Wisconsin aviation community!

The Wisconsin Department of Transportation Bureau of Aeronautics (BOA) is committed to making Wisconsin the safest, most efficient, and most networked aviation system in the nation. Our current initiatives include: enhancing airspace systems to support future growth, continuing the expansion of our airfield safety assistance program, and modernizing air traffic control and automation systems. We are also focusing on educating and preparing the workforce of the future.

Our aviation education program reaches students of all ages and offers a variety of options, including:

- Pilot training programs and courses
- Aviation degree programs in Wisconsin
- Aviation Careers Education Program (ACE)

Please visit our website for more information on our current initiatives and how you can become involved.

Bureau of Aeronautics

Aviation education and outreach is a statewide effort that is actively driven by the Wisconsin Aviation Association (WAA). The WAA is a non-profit organization that operates under the umbrella of the BOA.

The WAA website is a valuable resource for aviation enthusiasts and provides information on aviation-related events, resources, and opportunities. Please visit the website to stay up-to-date on current initiatives and events.

Visit our website for more information on our current initiatives and how you can become involved.
