

NOTE:

The Floodplain coordination letters in the [2025 Memorandum of Understanding between WDNR and WisDOT on Floodplain Encroachments and Waterway Crossings](#) are **for permanent increases in base flood elevation (BFE) only**. They are not for temporary impacts due to causeways or otherwise. In those cases, work with the Bureau of Structures to develop the appropriate notification letters for temporary causeways and similar impacts.

For projects with permanent increases in BFE contact the Bureau of Structures or Bureau of Project Development Drainage Engineers (bpddrainage@dot.wi.gov) as appropriate and they will provide you with an electronic version of the appropriate template letter for your situation.
