**Contact:**

Erik Emerson P.E.
Standard Development Engineer
Wisconsin Department of Transportation
Office: 608-266-2842
4802 Sheboygan Ave.
Rm 651
P.O. Box 7916
Madison, WI 53707-7916
E-mail: erik.emerson@dot.wi.gov

**General Notes:**

Immediately report any manufacturer’s modification to approved product the to Department’s contact person listed above.
Failure to report changes can cause hardware to be removed from Approved Product List.

The minimum amount of information the Department requires for review is: crash test videos, crash test reports, eligibility/approval letters, installation manuals, maintenance manuals, itemized repair cost (including labor time and material cost) for the various crash tests performed and Wisconsin P.E. stamped drawings that comply with the Department’s design guidance for crash cushions to determine if a product can be placed on the Approved Product List.

If a manufacturer submits a product without running the full crash test matrix one of the following documents is required
1. A document from a ISO/IEC 17025 (A2LA) accredited lab that provides a detailed justification for not running the full matrix of tests. This lab is to be independent of the manufacturer.
2. A P.E. stamped document that provides a detailed justification for not running the full matrix of tests. This P.E. is to be licensed in the State of Wisconsin.

Manufacturer should review information provided in WisDOT’s Construction and Material Manuals Section 6-27, and 614 of WisDOT’s Standard Specifications for more information.

The Department reserves the right to request additional information at anytime.

Providing documentation to the Department for review does not automatically grant approval of product.
