

Asphalt Release Agent - Approved Products

At this time, any/all products or processes are approved if meeting the requirements presented herein

The products and suppliers listed below are provided as additional reference. This listing is not intended to be exclusionary rather informational.

AS OF 1/1/2018, ALL PRODUCTS USED FOR THIS APPLICATION MUST BE TESTED AND APPROVED THROUGH AASHTO NATIONAL TRANSPORTATION PRODUCT EVALUATION PROGRAM (NTPEP).

2018 WisDOT Asphalt Release Agent NTPEP Approval Criteria:

- Asphalt Stripping Test:
 - o No stripping or discoloration can be observed for asphalt treated with both diluted and full-strength asphalt release agents.
- Mixture Slide Test:
 - o < 10 grams retained.
- Asphalt Performance Test:
 - o All test specimen must be able to withstand more than 3 pulls before 10% of the poured binder weight is retained on the plate.
 - Example of a failing asphalt performance test: If the reported test pull number (when 10% binder is retained) comes from the 1st, 2nd or 3rd pull, the test fails.

Suppliers may request WisDOT evaluation once the NTPEP testing cycle is complete. Any change to the approved asphalt release agent (in formulation or composition) requires re-evaluation of the material and the new product must receive departmental approval prior to use. NTPEP test data is acceptable only if it is less than three years old and re-approval of asphalt release agents is required every 3 years. The department assigns the expiration date based on the NTPEP test date. A written request for re-approval must be submitted to the department at least two weeks prior to the expiration date for the product to remain in the Approved Products List.

When submitting a written request for approval to the department, the following must be included:

- Company Name
- Physical and mailing addresses
- Product brand name
- Contact person's name with email address and phone number
- NTPEP product identification

Send submittal information to:

Steve Hefel
 Wisconsin Department of Transportation
 Bureau of Technical Services, Truax Center
 3502 Kinsman Blvd
 Madison, WI 53704
