## INTRODUCTION

---

### Title VI

The Wisconsin Department of Transportation (WisDOT) is committed to providing equal opportunity in all service delivery and prohibiting discrimination based upon protected group status.

Equal opportunity in service delivery means:

- Equal access to program services
- Equal benefits from program services
- Equal treatment within program services

WisDOT uses Title VI to ensure full compliance with Title VI of the Civil Rights Act of 1964 and related statutes and regulations in all program and activities. Title VI, and related statutes, require that no person in the United States shall, on the ground of race, color, national origin, sex, age, disability, low-income or limited English proficiency (LEP) be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving federal financial assistance.

Any person who believes his/her Title VI protection has been violated may file a complaint with the Wisconsin Department of Transportation. Information on WisDOT's Title VI complaint procedure is available here: <http://wisconsindot.gov/Pages/doing-bus/local-gov/astnce-pgms/transit/compliance/title6.aspx>.

For additional information regarding Title VI complaint procedures and/or information regarding WisDOT's non-discrimination obligations, please contact Taqwanya Smith, WisDOT Title VI and ADA Coordinator, Office of Business Opportunity and Equity Compliance, Phone: (608) 266-8129, Fax: (608) 267-3641 [taqwanya.smith@dot.wi.gov](mailto:taqwanya.smith@dot.wi.gov)

This annual report is available in electronic format only. It can be downloaded and printed from the Transit Section website: <http://wisconsindot.gov/Pages/doing-bus/local-gov/astnce-pgms/transit/default.aspx>.

4822 Madison Yards Way

## Purpose of the Annual Report

The Annual Report is prepared by the Wisconsin Department of Transportation (WisDOT) Transit Section to provide citizens, transportation providers, public officials and other stakeholders an overview of transit in Wisconsin. The report provides a summary of federal and state public and specialized transportation programs along with detailed operational and financial data.

## Organization of the Annual Report

The Annual Report begins with a brief overview of the Transit Section with the main part of the report being organized into two sections: Public Transit and Specialized Transit. The appendix of the report provides a county listing of both public and specialized transit service contact information. All contacts listed are current at the time of publication.

The Public Transit Section includes information on programs and services, statewide statistics, trend data, performance measures, major accomplishments and detailed fact sheets of each transit system. There are 81 public transit systems in Wisconsin, which are divided into Tier A, Tier B and Tier C. The Tier A systems are grouped by operating expenses and Tier B and C systems are grouped based on population served. These tiers will be used to present and organize information within the report. Statewide statistics and trend data are divided by tier and the fact sheets are grouped by tier and then listed alphabetically. The statistical data is comprised from quarterly ridership report submissions. Some of the data maybe be missing or incomplete due to the incomplete submission. For more information please refer to the *Fact Sheet Limitation* section below. The Specialized Transit Section includes information on programs and services, major accomplishments and detailed fact sheets. The information that is presented on the detailed fact sheets is dependent on each specialized program and is organized into statewide statistics, county or tribe.

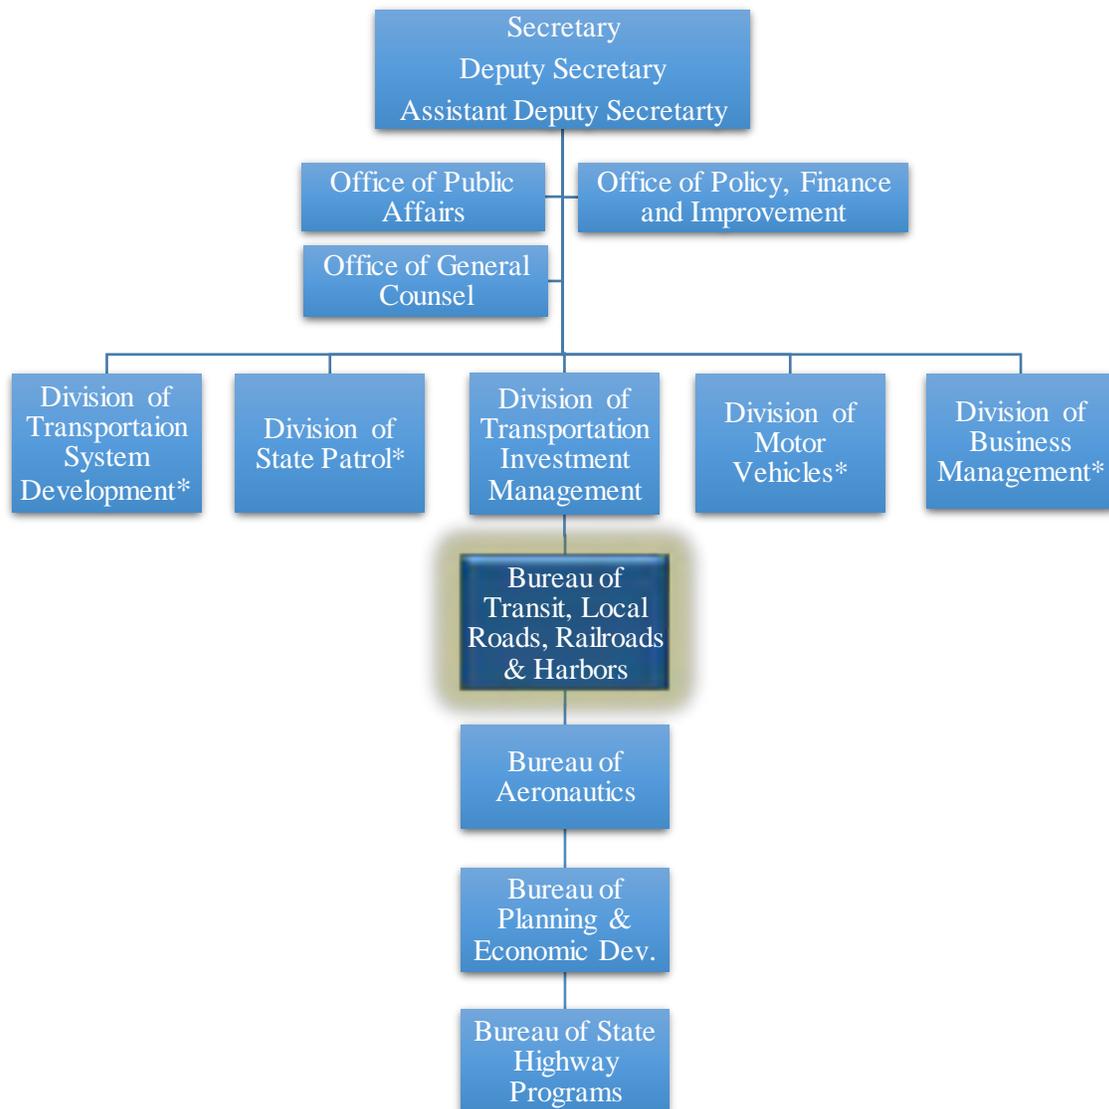

## Fact Sheet Limitation

The transit fact sheets provide overview information that was obtained from what sub-recipients have reported to WisDOT. A sub-recipient is a transit agency that receives federal or state funding for public or specialized transportation services. Some data may appear as unaudited from the sub-recipient due to incomplete data. Communities provide the overview information displayed in the transit fact sheets. The source data is incomplete due to non-submittal. For public transit systems, the hours are from the earliest time all routes begin to the latest time all routes end. There may be breaks in service and all routes may not run these hours. Detailed information can be found on the transit service website or by contacting the transit service.

## TRANSIT SECTION OVERVIEW

---

In the organizational structure of WisDOT, the Transit Section is in the Bureau of Transit, Local Roads, Railroads, and Harbors within the Division of Transportation Investment Management (Fig. 1). For additional program information and updated staff contacts, please visit our website at <http://wisconsin.gov/Pages/doing-bus/local-gov/astnce-pgms/transit/default.aspx>

\*Bureaus in Divisions are omitted for image clarity

# Public Transit

# WISCONSIN PUBLIC TRANSIT SYSTEMS 2017

Wisconsin Department of Transportation  
Bureau of Transit, Local Roads, Railroads & Harbors

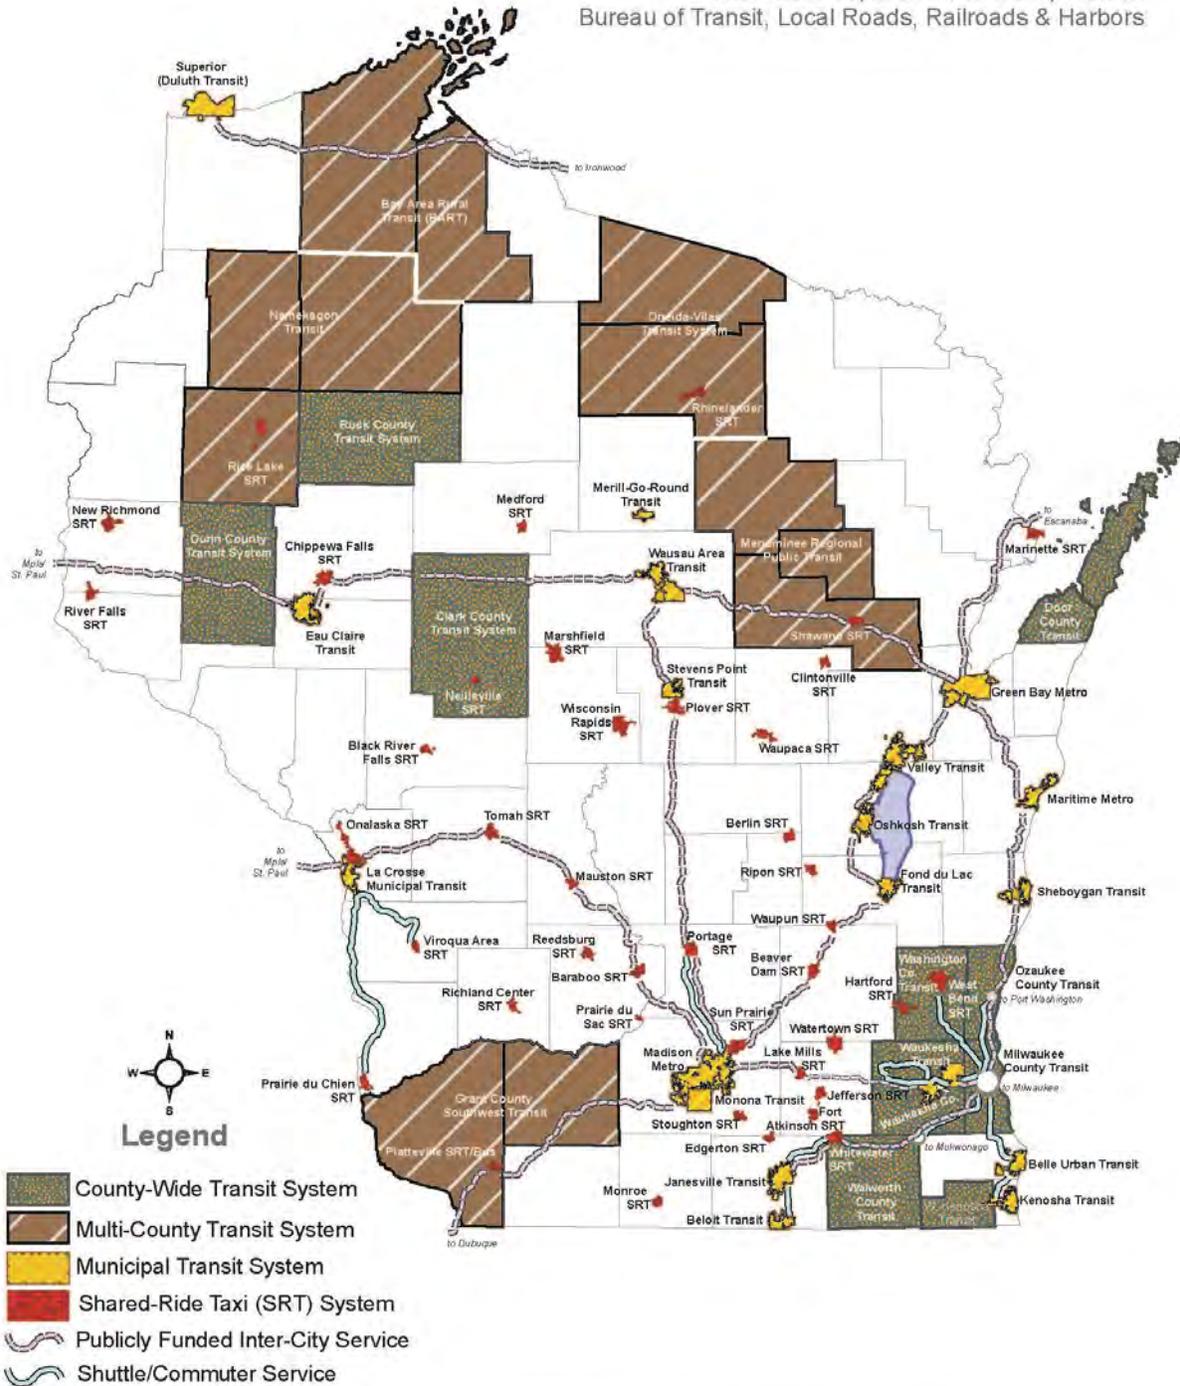

Figure 2: Wisconsin Public Transit System

## FEDERAL AND STATE FUNDING PROGRAMS

---

The Wisconsin Department of Transportation (WisDOT) Transit Section administers federal and state transit funds for capital, operating, planning and training expenses to support public bus, van and shared-ride taxi systems.

### Statewide Planning Program (5304)

This federal program aids support work and activities resulting in balanced and comprehensive intermodal transportation planning for the movement of people and goods. Examples of projects that have been funded through this program include transit development plans, feasibility studies, strategic plans, and ridership surveys. Recognized public entities in Wisconsin are eligible to apply for funds under this program. This includes, but is not limited to, cities, counties, tribes, transit commissions, metropolitan planning organizations and regional planning commissions. This program covers up to 80 percent of eligible expenses incurred on the project. The remaining 20 percent of expenses are covered locally. The local match must come from a source other than U.S. Department of Transportation dollars. Applications are reviewed for this program on a rolling basis throughout the year.

### Federal Formula Grant Program for Urbanized Areas (5307)

This federal program aids with capital expenses, including bus replacement and capitalized maintenance, for transit systems in large urbanized areas (population > 200,000). In Wisconsin, these systems include Green Bay Metro, Madison Metro, Milwaukee County Transit System and Valley Transit in Appleton. The grant amounts for each large urbanized area system are determined directly by the Federal Transit Administration (FTA). This program also provides capital and operating assistance for small urbanized areas (population 50,000 – 200,000). For the 22 small urban systems in Wisconsin, the grant amounts are determined by formula.

### Federal Formula Grant Program for Rural Areas (5311)

This federal program aids with capital and operating expenses for public transportation in non-urbanized areas (population < 50,000). There are 49 bus or shared-ride taxi systems across the state that receives this type of funding. The annual funding amounts per system are equalized via formula statewide, combining grants from Federal Formula Grant Program for Rural Areas, Federal Formula Grant Program for Urbanized Areas, and the State Urban Mass Transit Operating Assistance Program.

## Rural Transit Assistance Program (RTAP)

Federal funding from the 5311 program is set aside to support this program. The funding is used to further the development of skills and abilities for persons involved in providing transit services to rural areas.

## Wisconsin Employment Transportation Assistance Program (WETAP)

The Wisconsin Employment Transportation Assistance Program (WETAP), a state and federally funded program, represents an effort to connect low-income workers with jobs through enhanced local transportation services. Lack of transportation is a significant barrier to getting and keeping jobs for low-income workers. Improving transportation services can improve the economic outcomes among these workers and the state.

The WETAP program encourages long-term solutions by providing funding for demonstration grants to cover the expenses of early start-up and development stages of an effective transportation solution. This program integrates state and federal funding (Formula Grants for Urban and Rural Areas) into one application. The goal of this program is for local areas to work together in a collaborative process to assess the transportation needs for low-income workers and develop options for addressing those needs. For purposes of WETAP funding, low-income is defined as family income that is less than 150% Federal Poverty Level.

## Bus and Bus Facilities (5339)

This is a federally funded grant program within the Moving Ahead for Progress in the 21<sup>st</sup> Century (MAP-21) Act that began in 2013. It provides capital funding to replace, rehabilitate, and purchase buses and related equipment and to construct bus related facilities. Grants are awarded to urban systems through a competitive application process with evaluation criteria based on consistency with local transit priorities, age and deferred maintenance of vehicles or facilities, and a demonstrated commitment of the local share. Eligible applicants include public agencies and private non-profits engaged in public transportation, including organizations that provide services dependent on age, disability or low-income.

## State Urban Mass Transit Operating Assistance (85.20)

The state funds from this program are combined with federal 5311 or 5307 funds to provide operating cost assistance to transit systems to alleviate local tax burdens. Eligible applicants include municipalities or counties with population greater than 2,500 and transit or transportation commissions or authorities. Non-public agencies are not eligible for these funds. The grant amounts are determined by the Tier System as defined in the state statute and described earlier in this report.

## INTERCITY BUS SERVICE

---

Intercity bus service plays an important role in Wisconsin's coordinated transportation network. The subsidized routes shown on the map (Fig. 3) not only connect large urban centers, but more importantly, stop in rural areas to ensure residents there can reach those urban areas for work-related, personal, and leisure trips (facilitating multi-modal travel via airports and rail stations), as well as trips to universities, other educational institutions, and major medical facilities.

WisDOT contracts directly with providers to operate the intercity bus routes, awarding the contract through a competitive process. The FTA requires that 15 percent of Wisconsin's funds from the Federal Formula Grant Program for Rural Areas (5311) are used for intercity bus routes unless the state certifies that intercity bus service needs are met. FTA funds cover a maximum of 50 percent of the net operating losses of those routes, plus any eligible capital costs from adjacent unsubsidized routes that feed into the overall intercity bus network.

Wisconsin began providing Intercity Bus Program funds in 2011, fully subsidizing routes listed below, as well as a Duluth to Eau Claire route so the program could cover a majority of the state.

- Duluth-Hurley (Indian Trails)
- Minneapolis-Green Bay-Milwaukee (Jefferson Lines)
- La Crosse – Madison/Milwaukee (Jefferson Lines)
- Green Bay – Madison (Lamers)
- Wausau – Madison (Lamers)
- Dubuque – Madison (Lamers)

WisDOT has a partnership with Michigan DOT to support intercity bus travel between the Upper Peninsula and the Superior/Duluth area as well as Green Bay and Milwaukee. This arrangement should help U.P. and northern Wisconsin residents meet their regional and national travel needs in the future.

Figure 3: Wisconsin Intercity Bus Routes

## STATEWIDE PERFORMANCE MEASURES

---

This section introduces two performance measures that WisDOT uses to evaluate the efficiency of the department: Mobility, Accountability, Preservation, Safety and Service (MAPSS) Performance Improvement Program and the Cost Efficiency Report.

### MAPSS Performance Improvement Program

The MAPSS Performance Improvement Program is a department-wide initiative and implemented in December 2011. It provides five core goals/performance measures to guide WisDOT in providing safe and efficient transportation. The five performance measures are defined as:

- Mobility: Delivering transportation choices that result in efficient trips and no unexpected delays.
- Accountability: The continuous effort to use public dollars in the most efficient and cost-effective way.
- Preservation: Protecting, maintaining and operating Wisconsin's transportation system efficiently by making sound investments that preserve and extend the life of our infrastructure, while protecting our natural environment.
- Safety: Moving toward minimizing the number of deaths, injuries and crashes on our roadways.
- Service: High quality and accurate products and services delivered in a timely fashion by a professional and proactive workforce.

WisDOT releases a quarterly progress report to inform the public and policymakers on the progress in meeting these goals. This quarterly progress report also provides transparency and accountability, creates results driven environment, and assists with the national performance measures that are required under MAP-21.

In addition to the quarterly progress report, an interactive website (<http://www.mapss.wi.gov>) provides scorecards on each performance measure. These scorecards list the performance measure, how it is measured, the current reporting period, the goal, a check mark if the goal is met, the trend and comments. The Transit Section has a performance measure of transit for availability, under the mobility goal, which evaluates the percent of the population that is served by transit. The target is to have 55 percent of the state's population served by transit. In 2017, approximately 54 percent had access to transit, down two percent from 2016. The decline is attributed to transit area coverage in several urban fixed-route systems declining and a change in department data analysis that resulted in more accurate accounting.

## 2015-2016 MAJOR ACCOMPLISHMENTS

---

### Vehicles, Equipment and Technology

- In 2016, the **Beloit Transit System** published a new website with Google Transit providing new features, such as, trip building, scalable maps and active maps. The new website can be found here: <http://www.beloittransit.com/><sup>1</sup>
- **Shoreline Metro** upgraded their paratransit software to Ecolane's MDT system, which has resulted in over 30 percent reduction in revenue hours, revenue miles, vehicle in service and trips per revenue hour.<sup>2</sup>
- **Shoreline Metro** also purchased 4 new paratransit buses for revenue service.
- GPS has been installed on all **Shoreline Metro's** fix route revenue buses.<sup>2</sup>
- **Shoreline Metro** also updated their website with new features, such as, mobility-friendly interface, trip planning through Google Transit, language translation and system notifications. The new Shoreline Metro website can be found here: <http://shorelinemetro.com/><sup>2</sup>
- In early 2016, **Milwaukee County Transit** added continuously recoding onboard video systems to all new paratransit services.<sup>3</sup>
- In late 2016, **Milwaukee County Transit** installed Mobile Data Terminals in all ADA paratransit vehicles.<sup>3</sup>
- **Milwaukee County Transit** added 28 new buses in 2015, plus another 30 New Flyer buses in 2016 to their existing bus fleet.<sup>3</sup>
- In 2015, **Milwaukee County Transit** launched an online portal to purchase store value and passes as paper fares are phased out.<sup>3</sup>

### New Services

- The **Janesville Transit System** in conjunction with the Dementia Friendly Initiatives of Rock County completed the criteria to earn the designation of being dementia friendly, becoming the first transit system in the area to do so. Transit staff attended a Dementia Friendly Training taught by the Rock County Council on Aging. Staff are now equipped to better recognize, communicate and support those suffering from dementia. Staff also now can direct anyone with questions to community resources. For more information please visit: [www.co.rock.wi.us/adrc](http://www.co.rock.wi.us/adrc)<sup>4</sup>

<sup>3</sup>Information Provided by Steve Nigh, July 24<sup>th</sup>, 2017

<sup>4</sup>Information Provided by Rebecca Smith, July 20<sup>th</sup>, 2017

## New Services Continued

- In late 2016 **Walworth County** approved a new Dial-a-Ride public transit system called Wal-to-Wal. Wal-to-Wal is available to any resident in Walworth County and can be used for any trip purpose. Wal-to-Wal doesn't require a reservation and provides weekday and Saturday service between the hours of 6 a.m. to 7 p.m.<sup>5</sup>
- In May 2015, the **Northwoods Transit Connections** public transit system was created. This service was created by a three-county agreement between Oneida and Vilas County. The system operates on a weekday schedule between 7 a.m. and 5 p.m. providing service to the cities of Rheinlander, Eagle River, Minocqua and surround communities.<sup>6</sup>

## Planning

- The **Beloit Transit System** completed a Transit Development Plan in 2015 with the first phase of system changes being implemented in December of 2016.<sup>7</sup>
- In 2016 **Milwaukee County Transit** was given permission by the FTA to enter the Project Development phase for a proposed 9-mile Bus Rapid Transit Route from downtown to the Milwaukee Regional Medical Complex.<sup>8</sup>

## Facilities

- On September 27, 2016, the **Dunn County Transit Commission** held a ribbon cutting ceremony celebrating the completion of their new transit facility. The new facility is complete with a new bus wash bay, expanded bus garage capacity, driver's station, conference room, breakroom, and administrative offices.<sup>9</sup>

# Specialized Transit

## SPECIALIZED TRANSIT INTRODUCTION

---

In addition to public transit, the Wisconsin Department of Transportation (WisDOT) Transit Section administers federal and state transit funds to assist with operating and/or capital expenses to support specialized transit services and programs. Specialized transit programs can provide services for seniors, disabled and low-income individuals.

## FEDERAL AND STATE FUNDING PROGRAMS

---

### Transportation for Elderly and Persons with Disabilities (5310) and Elderly and Disabled Transportation Capital Assistance Program (85.22)

This program utilizes both federal 5310 and state 85.22 funds to aid with vehicle purchase projects that improve the mobility of seniors and individuals with disabilities. The cost of the vehicle is split 80/20 with local paying 20 percent. Grants are awarded on a two-year application cycle. Eligible applicants include private non-profits, local units of government and operators of public transit.

### Specialized Transportation Assistance Program for Counties (85.21)

This program provides all 72 Wisconsin counties with financial assistance for transportation services for elderly and disabled individuals. State funds are allocated to the counties on an annual basis based on their elderly and disabled population and require a 20 percent local match. Eligible expenses include providing direct, assisting in funding or purchasing transportation service from any public or private provider, coordinating transportation services, in-service training for transportation services, purchasing equipment such as vehicles and wheelchair lifts, directly subsidizing passengers for use of transportation services, and conducting planning/management transportation studies.

### Tribal Transportation for Elders (85.215)

This is a state funded program that began in 2009 and provides funds to assist in tribal elderly transportation. Funds are awarded on an annual application cycle to eligible applicants, with each of the 11 federally recognized tribes in Wisconsin receiving an equal share. Eligible expenses include providing transportation services, reimbursing tribal elderly individuals for use of transportation, planning/management transportation studies, coordinating transportation services, and in-service training for transportation services.

### Wisconsin Employment Transportation Assistance Program (WETAP)

This program provides funding for new or expanding programs that assist in meeting employment transportation needs for low-income workers. It began as a joint effort between WisDOT and the Wisconsin Department of Workforce Development (DWD) and combined federal Job Access Reverse Commute (JARC) funds, WisDOT Transportation Employment and

Mobility (TEAM) funds and DWD Employment Transit Assistance (ETA) funds. Grants are awarded through an annual competitive grant application process. Eligible applicants include public, private and non-profit transportation providers. Examples of projects include late-night and weekend service, guaranteed ride home service, expanding fixed-route public transit, car loan programs, ridesharing, mobility management and transportation coordination, and demand- response van service.

## FEDERAL INITIATIVES

---

### Mobility Management

Mobility management is an innovative approach for managing and delivering coordinated transportation services to customers, including seniors, individuals with disabilities and individuals with lower incomes. It focuses on meeting individual customer needs through a wide range of transportation options and service providers. Mobility management also focuses on coordinating those services and providers to achieve a more efficient transportation system. Mobility managers work in a variety of agencies including ADRCs, local governments, community action programs, transit systems, human/social service agencies, independent living centers and economic opportunity councils. Tasks include inventorying existing services, identifying customer needs, developing strategies to meet needs, coordinating financial and other resources, training staff/volunteers, promoting innovative technologies and developing trip planning systems. Funding can come from a variety of sources including New Freedom, WETAP and STRAP. With the repeal of the New Freedom Program in MAP-21, projects also are eligible for funding under 5310.

### Transportation Coordination

Transportation coordination is a process in which human service agencies, transportation providers, consumer groups and public officials work together to improve transportation services for transportation disadvantaged individuals. It includes cooperation, coordination and sharing of resources to achieve the goals of improving transportation options and access, minimizing service duplication and facilitating cost effective transportation. Federal transit law requires that for projects to receive 5310, WETAP or New Freedom funding they must be derived from a locally developed, coordinated public transit-human services transportation plan. These plans need to be redone every 4 or 5 years, depending on the location in the state. WisDOT has collaborated with Regional Planning Commissions to develop a coordination planning process and toolkit in response to this requirement.
