

ALL INTERESTED PERSONS are notified of the availability of the WIS 23, Fond du Lac to Plymouth projects combined Limited Scope Supplemental Final Environmental Impact Statement/Record of Decision (LS SFEIS/ROD) and the proposal's impacts and effects that has been prepared and filed according to the State and National Environmental Policy Acts.

The LS SFEIS/ROD was prepared in accordance with Title 23, Part 771.125 and Part 771.130(f) of the Code of Federal Regulations (23 CFR 771.125 and 23 CFR 771.130) and Public Law 112-141, 126 Stat., Section 1319(b). The LS SFEIS/ROD, signed on October 15, 2018, is used to address issues of limited scope associated with the overall project.

The LS SFEIS was made available to the public on June 1, 2018 with a comment period that ended July 31, 2018. A public hearing was held on June 19th at UW-Fond du Lac in Fond du Lac, Wisconsin. The draft document identified the Preferred Alternative as the 4-lane On-Alignment Alternative with Corridor Preservation. The Record of Decision now identifies the 4-lane On-Alignment Alternative with Corridor Preservation as the Selected Alternative. Corridor Preservation, in accordance with provisions of Section 84.295(10) of the Wisconsin Statutes, is a planning action that officially maps right-of-way for potential future overpasses and interchanges if traffic needs require the construction of freeway access restrictions.

Those wishing to review the LS SFEIS/ROD may do so at the Fond du Lac Public Library and the Plymouth Public Library or at WisDOT's Bureau of Technical Services in Madison.

Fond du Lac Public Library
32 Sheboygan Street
Fond du Lac, WI 54935

Plymouth Public Library
130 Division Street
Plymouth WI 53073

Bureau of Technical Services, Environmental Services Section
Wisconsin Department of Transportation
4822 Madison Yards Way, 5th Floor
Madison, WI 53705

The LS SFEIS/ROD is also available for electronic view on the WisDOT WIS 23 project website:
<https://wisconsindot.gov/Pages/projects/by-region/ne/wis23exp/default.aspx>

A copy of the LS SFEIS/ROD can also be requested from WisDOT at the address listed below.

WIS 23 is part of the National Highway System (NHS) and is a rural principal arterial that connects Fond du Lac and Sheboygan in east central Wisconsin. Primary impacts from the selected alternative, 4-lane on-alignment expansion, include agricultural land acquisition; residential and small business relocations; the establishment of approximate locations and widths of right-of-way necessary for a proposed future expressway in accordance with the provisions of Section 84.295(10) of the Wisconsin Statutes; impacts for which permit application to the U.S. Army Corps of Engineers may be required pursuant to Section 404 of the Federal Clean Water Act; and encroachment on wetlands and floodplains. Any person who believes that he or she may be thus affected by the proposed improvement may obtain relocation assistance information at the department's Northeast Region Real Estate Office, (920) 492-5643.

Further information can be obtained from the following individual:
