

I-41/I-43/US 41 INTERCHANGE

System interchange is used to identify interchanges that connect two or more freeways. System interchange connections should be high speed and free-flow to provide all directional movements.

I-41/WIS 15 INTERCHANGE

Service interchange applies to interchanges that connect a freeway with local surface streets or arterials. Service interchange ramps may be a low speed free flow, or may require a stop condition at the connection to the local or arterial street.

Service Interchange vs. System Interchange
