WIS 96  
Lawe Street – Claribel Street  
Outagamie County**

**Project ID 4075-33-00**

**Public Involvement Meeting**

**Monday, January 22, 2018  
5:00 to 6:30 p.m.  
Kaukauna City Hall**

## Welcome

The Wisconsin Department of Transportation (WisDOT) welcomes you to this public involvement meeting for the proposed reconstruction of WIS 96 from Lawe Street to Claribel Street in the city of Kaukauna, Outagamie County. Members of the project team are available to address your questions and concerns regarding this project.

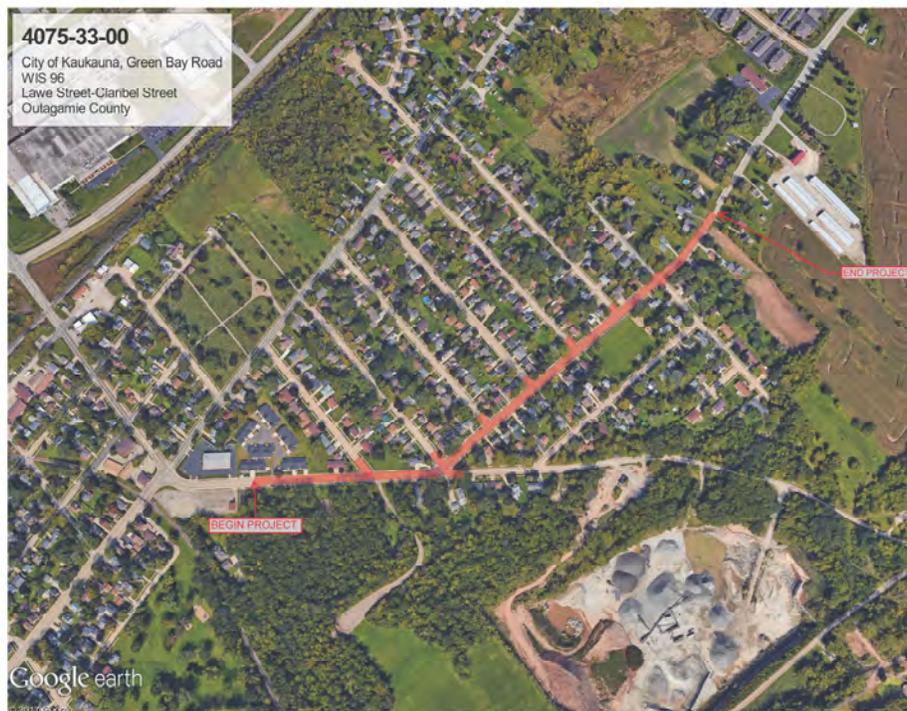

This meeting is an opportunity to exchange information helpful to our mutual understanding of the proposed project and its potential impacts. You are encouraged to meet with the project staff, view the exhibits, and discuss the proposed improvements.

## We want your comments

A public input form is attached to this handout for written comments. We appreciate your input and encourage you take a moment to complete the form and give it to a WisDOT staff member before you leave. The comment form is also a pre-paid mailer and may be folded and sent in the local mail. Please return any comments by February 5, 2018, so that we can consider them in our design.

## Project location and limits

The project is located on WIS 96 in the city of Kaukauna. The project limits run for approximately 0.55 miles from approximately 450 feet east of Lawe Street to 480 feet east of Claribel Street. Construction is currently scheduled for 2020.

## Project need

The existing pavement along this portion of WIS 96 is beginning to deteriorate and will require increased maintenance in the future. The proposed project will ensure that an acceptable roadway surface is created for the traveling public. It will also ensure that the storm sewer system will function properly in the future and that accommodations will be provided for bicycles and pedestrians.

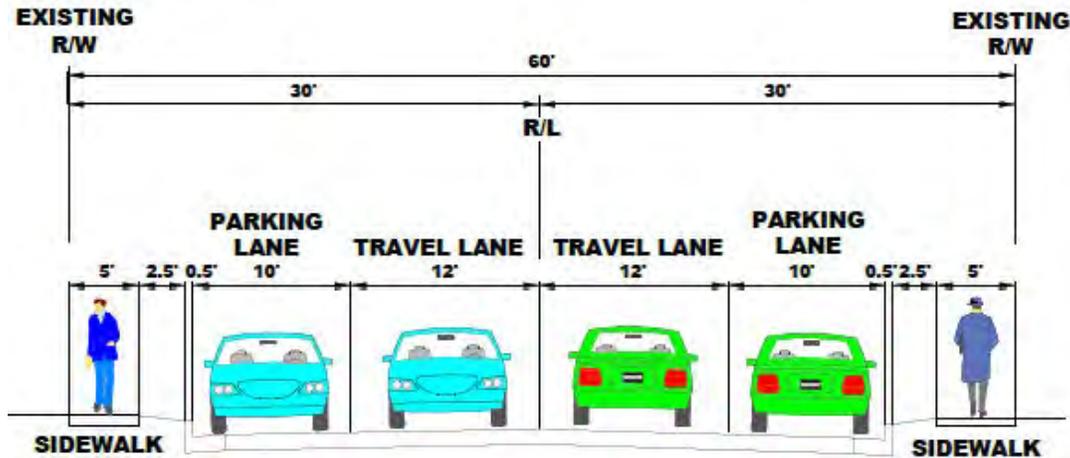

## Proposed improvements

The proposed improvements for WIS 96 include:

- complete reconstruction of the existing roadway
- replacement of the existing concrete pavement, curb and gutter, sidewalks and storm sewer
- creation of on-street bicycle accommodations
- correction of substandard intersection angles at Washington Street and Grant Street/Plank Road
- installation of a new lighting system

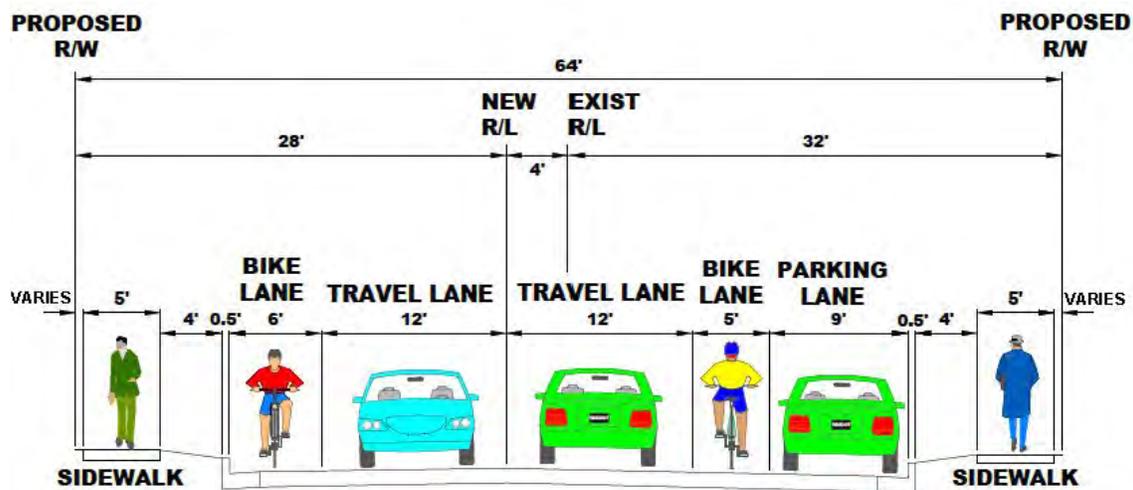

**Typical roadway section**

*The existing* WIS 96 typical section from Lawe Street to Claribel Street consists of a 44-foot wide urban roadway with one lane of traffic in each direction. It also includes two parking lanes, a 2.5-foot terrace and a 5-foot sidewalk on both sides of the road. The existing right-of-way limits extend out 30-feet from the existing centerline.

**EXISTING TYPICAL SECTION WIS 96**

*The proposed* WIS 96 typical section from just east of Lawe Street to just east of Claribel Street will consist of a 44-foot wide urban roadway with one lane of traffic in each direction. This section will include a bike lane on both the north and south sides of the street as well as a parking lane on the south side. Terrace widths will be increased to 4 feet and the proposed sidewalk width will be 5-feet. The proposed right-of-way limits will vary beyond the back of the proposed sidewalk.

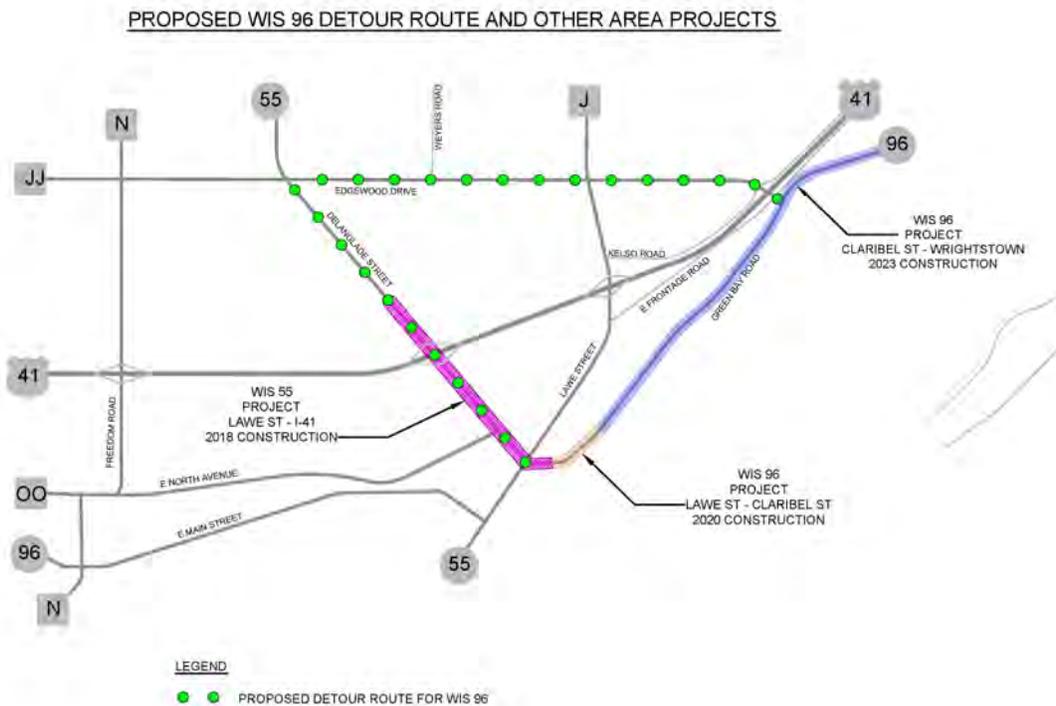

**PROPOSED TYPICAL SECTION WIS 96**

### Right of way needs

Right of way acquisition and temporary grading easements will be required for the project. The proposed impacts are illustrated on the project displays. The right-of-way acquisition will begin in the winter/spring 2018.

### Traffic control

The roadway will be closed to through traffic and a detour route will be used. Local traffic access to property owners and businesses along WIS 96 will be maintained throughout the project.

### Other planned projects

WisDOT plans to reconstruct a portion of WIS 55 from Lawe Street to I-41 beginning in the Spring of 2018. The city of Kaukauna plans to perform sanitary sewer and water main upgrades along WIS 96 in 2019 within the proposed project area. WisDOT also tentatively plans to resurface WIS 96 from Claribel Street to County Trunk D in Wrightstown in 2023.

### Schedule

Real estate acquisition is scheduled to begin following this meeting in the winter/spring of 2018. This process is expected to continue throughout 2018. Utility relocations will begin in 2019 with WisDOT construction to follow during the 2020 construction season.

### **In This Together:**

WisDOT recognizes businesses located in work zones have special needs. It's critical that customers have access to businesses and that they continue to visit them, regardless of any road work inconvenience. The In This Together program is offered to business and community leaders as an idea source as they plan for road construction in their area.

The In This Together program includes:

- Workbook
- Case studies that demonstrate techniques that have been successfully used in communities throughout Wisconsin.
- Promotional samples showing a variety of examples of how businesses have promoted their businesses during construction.
