Public Involvement Meeting

**Monday, August 31, 2015
5 p.m. to 6:30 p.m.
Kaukauna City Hall
Community Room
Presentation at 5:15 p.m.**

Welcome

The Wisconsin Department of Transportation (WisDOT) welcomes you to this public involvement meeting for the proposed reconstruction of WIS 96 from Lawe Street to Claribel Street in the city of Kaukauna, Outagamie County. Members of the project team are available to address your questions and concerns regarding this project.

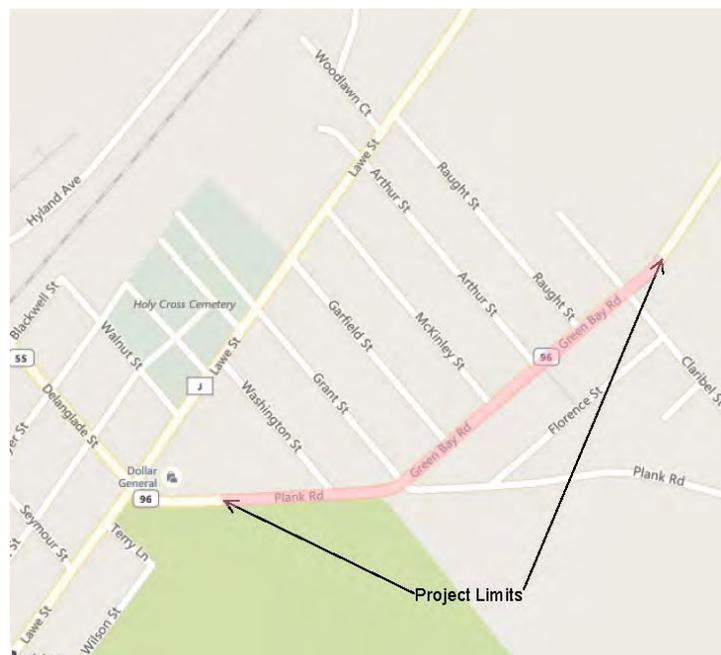

This meeting is an open forum with a short presentation at 5:15 p.m. It is an opportunity to exchange information helpful to our mutual understanding of the proposed project and its potential impacts. You are encouraged to meet with the project staff, view the exhibits, and discuss the proposed improvements.

We want your comments

A public input form is attached to this handout for written comments. We appreciate your input and encourage you take a moment to complete the form and give it to a WisDOT staff member before you leave. The comment form is also a pre-paid mailer and may be folded and sent in the local mail. Please return any comments by September 14, 2015, so that we can consider them in our design.

Project location and limits

The project is located on WIS 96 in the city of Kaukauna. The project limits run for approximately 0.5 miles from approximately 450 feet east of Lawe Street to 380 feet east of Claribel Street. Construction is scheduled for 2020.

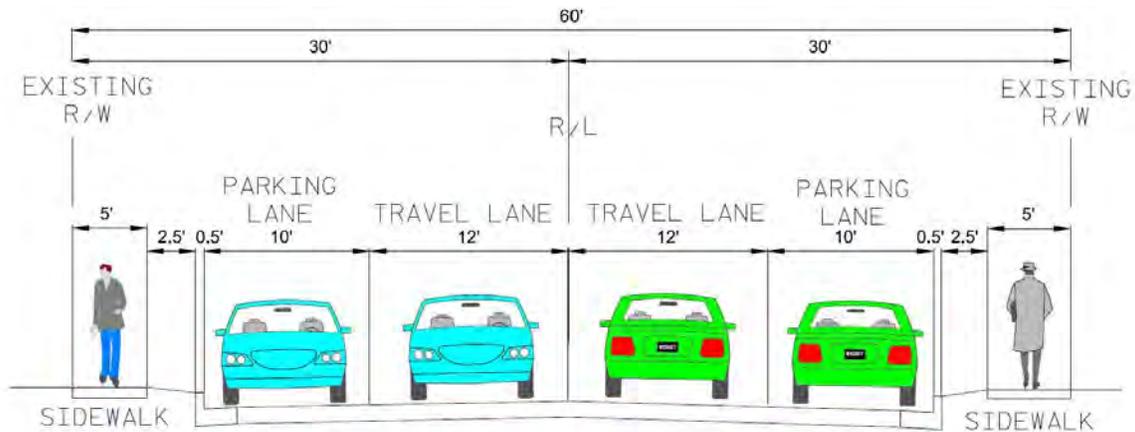

Proposed improvements

The proposed improvements for WIS 96 include:

- complete reconstruction of the existing roadway
- replacement of the existing concrete pavement, curb and gutter, sidewalks and storm sewer
- creation of on-street bicycle accommodations in conformance with the City of Kaukauna Comprehensive Plan
- correction of substandard intersection angles at Washington Street and Grant Street/Plank Road

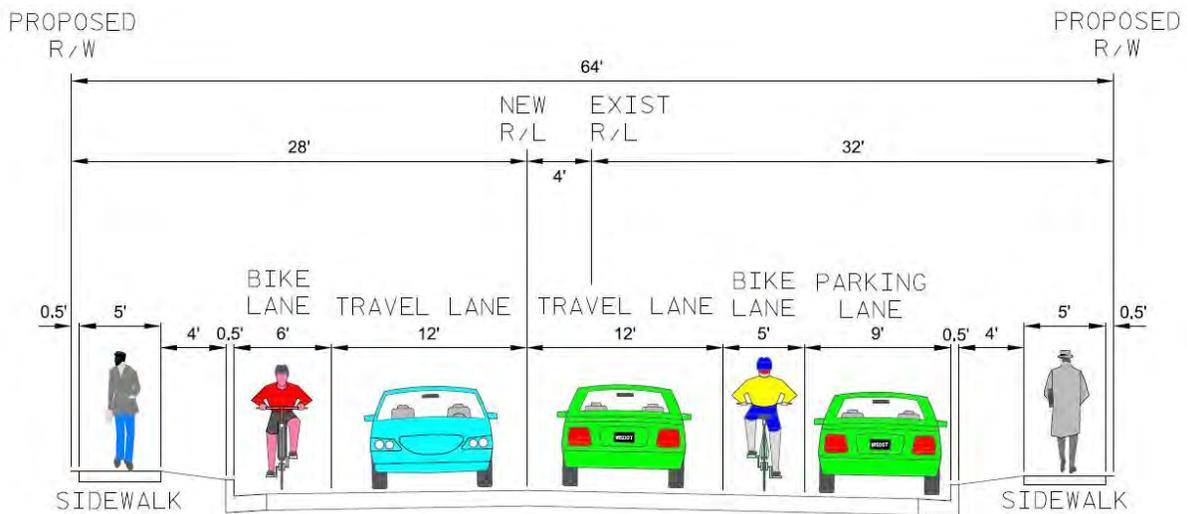

Typical roadway section

The existing WIS 96 typical section from Lawe Street to Claribel Street consists of a 44-foot wide urban roadway with one lane of traffic in each direction. It also includes two parking lanes, a 2.5-foot terrace and a 5-foot sidewalk on both sides of the road. The existing right-of-way limits extend out 30-feet from the existing centerline.

EXISTING TYPICAL SECTION WIS 96

The proposed WIS 96 typical section from just east of Lawe Street to just east of Claribel Street will consist of a 44-foot wide urban roadway with one lane of traffic in each direction. This section will include a bike lane on both the north and south sides of the street as well as a parking lane on the south side. Terrace widths will be increased to 4 feet and the proposed sidewalk width will be 5-feet. The proposed right-of-way limits are expected to extend out approximately 32-feet from the proposed centerline.

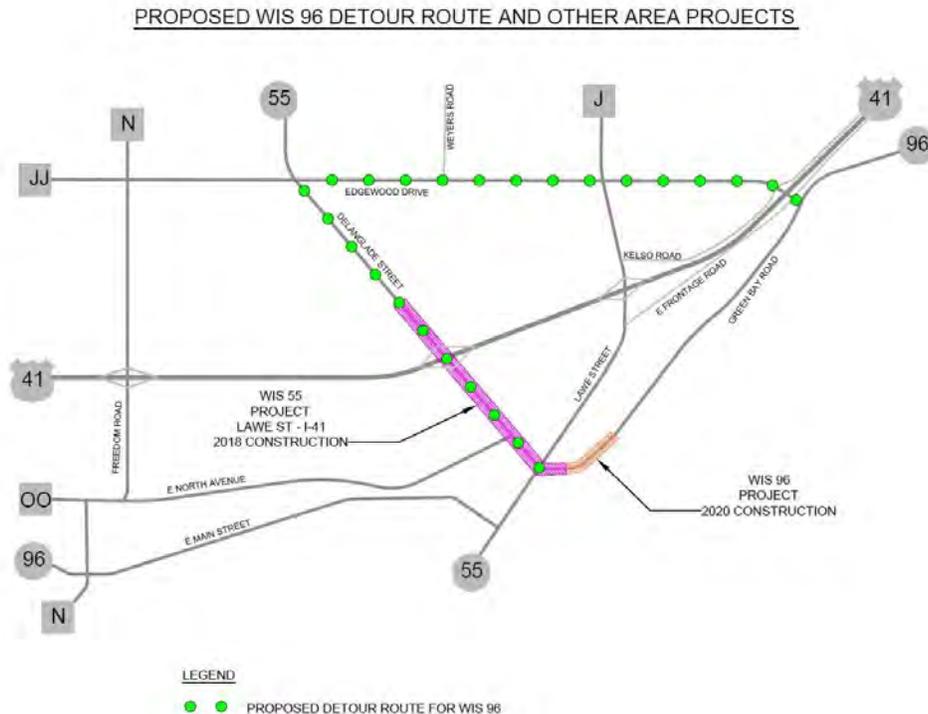

PROPOSED TYPICAL SECTION WIS 96

Right of way needs

Right of way acquisition and temporary grading easements will be required for the project. The anticipated impacts are illustrated on the project displays. The right-of-way acquisition is anticipated to begin in 2017.

Traffic control

The roadway will be closed to through traffic and a detour route will be used. Local traffic access to property owners and businesses along WIS 96 will be maintained throughout the project.

Other planned projects

Kaukauna Utilities plans to perform sanitary sewer and water main upgrades along WIS 96 in 2019. In addition, it is anticipated that there will be other utility relocation work performed tentatively in 2019, prior to the roadway reconstruction scheduled for 2020.

WisDOT is also working on plans for the reconstruction of WIS 55 from Lawe Street to I-41. The STH 55 project is currently scheduled for construction in 2018.

WIS 96 Project Contacts:
