

PRELIMINARY ALTERNATIVES

Spot Improvement Concepts:

US 53 & La Crosse St Intersection improvements

US 53 & La Crosse St Intersection improvements

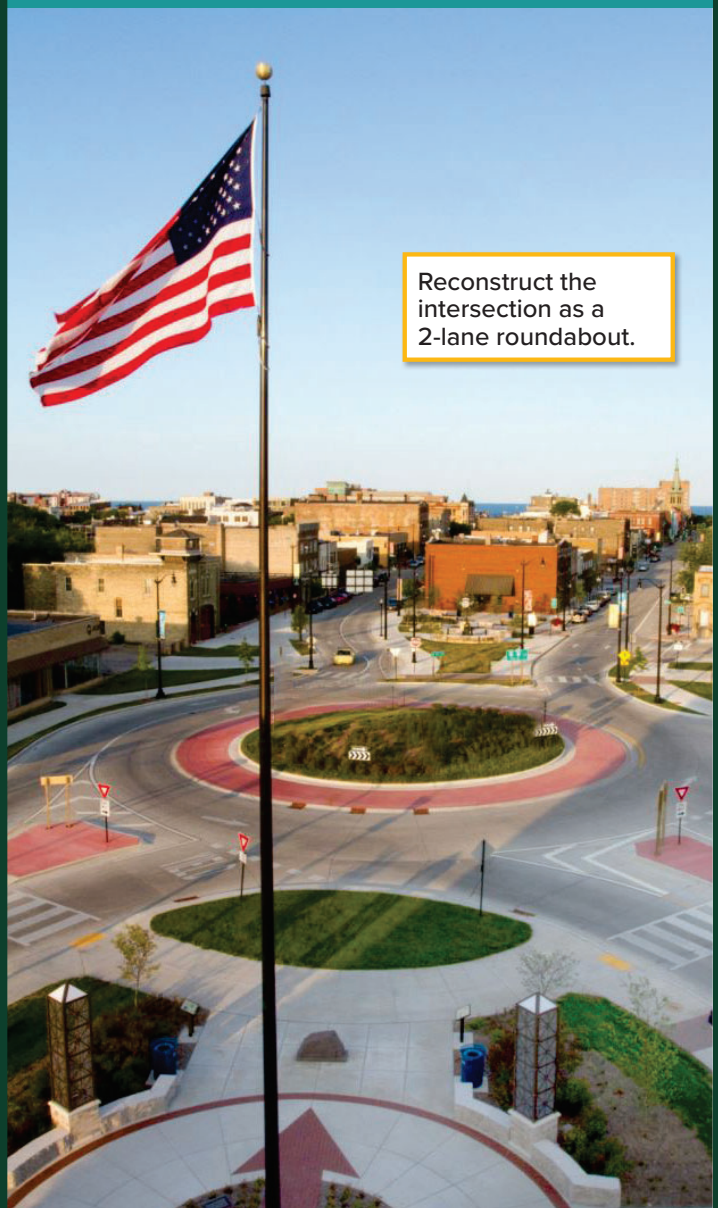

The US 53 & La Crosse St intersection currently experiences significant delay and queuing concerns. Those concerns are expected to worsen with forecasted future traffic volumes. In addition, this intersection has one of the highest crash frequencies along the US 53 & US 14/61 corridor. Two options are being considered to address these concerns:

Option 1: Turn Lane Addition

Option 2: Roundabout

Urban Roundabout Example: WIS 20/32 (7th St), Racine, WI

Property acquisition may be needed for each of the options shown.
