PRELIMINARY ALTERNATIVES

Spot Improvement Concepts: WIS 35 & WIS 16 Intersection

WIS 35 & WIS 16 Intersection

The WIS 35 & WIS 16 intersection has the highest number of crashes within WIS 35 corridor limits. While recent geometric and traffic control improvements to the intersection addressed some of the crash concerns, the number of driveways and their proximity to the intersection remains a concern. The proposed access modifications in this exhibit reduce intersection crash risk.
