

Project Information Handout

**US 14
Spring Green - Madison
Deming Way Intersection
Dane County**

Project ID: 5310-02-08/78

November 2022

Purpose of the presenting project information

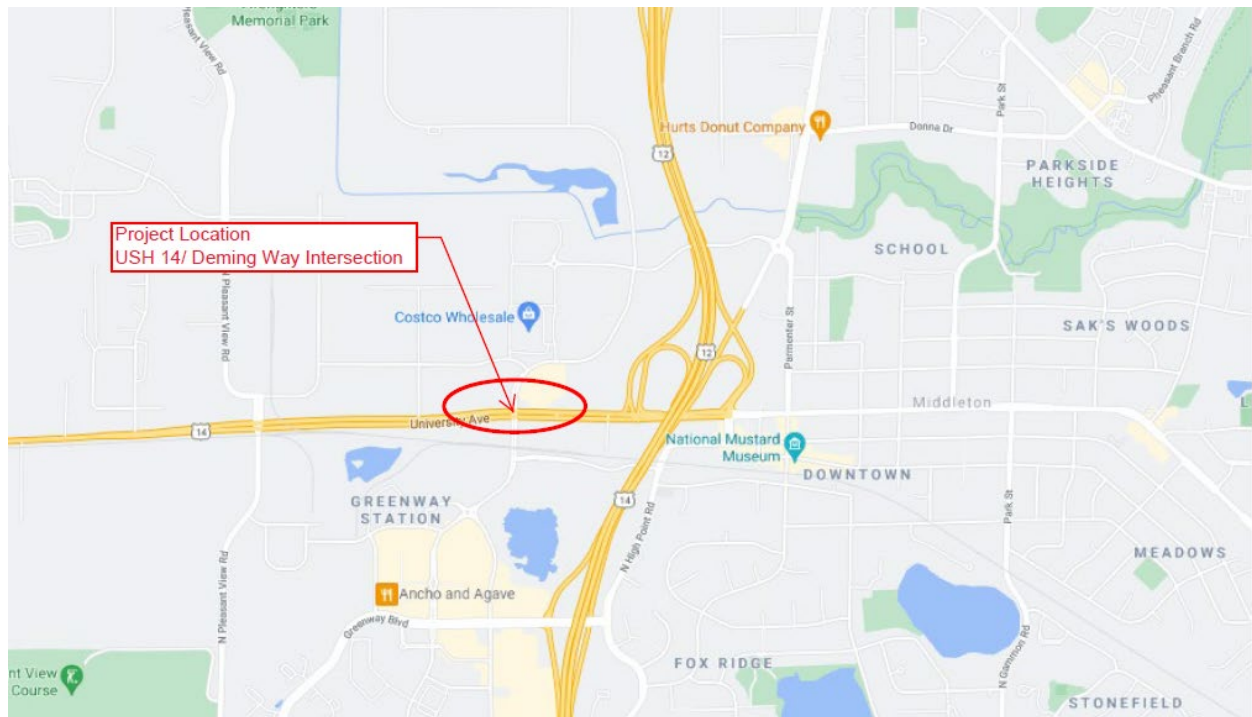

Present preliminary design concepts and obtain public input.

Project information

This existing signalized intersection has a lack of sight distance for left turners that was likely contributing to left turners failing to yield to oncoming vehicles. The signal phasing was changed to protected-only left turns on US 14 in June of 2020 to reduce these types of crashes. The proposed improvement will lengthen the left turn lanes on US 14 and Deming Way to better accommodate the signal phasing for the protected-only left turns on US 14.

An environmental document is being prepared to address potential impacts to environmental resources.

US 14 Project Location Map

Proposed traffic impacts

Construction is currently scheduled for 2024. Work would likely take place in spring and summer.

During construction, US 14 will remain open with lane closures. Access will be maintained to private residences and local businesses.

Real estate

No additional right of way is anticipated to be needed for this project.

Project update/next steps

No public involvement meetings are scheduled for this project. Following is the current project schedule.

Project information posted to WisDOT website	November 2022
Environmental document (CEC)	December 2022
Complete preliminary plans	December 2022
Complete final construction plans	Fall 2023
Construction	2024

Public input/comments

All persons having an interest in the project are encouraged to view the project information and provide input using the comment form provided on the website. Your comments will assist us in developing a project that will serve the needs of the traveling public as well as the needs of the local community. Your input is welcome and appreciated throughout the design process. Comments can be mailed or emailed to the contact shown below
