

# Safety: Vehicle Crashes

Each year, the City of Madison ranks their Top 30 highest intersection crash locations. US 51 intersections are consistently ranked near the top of the list.

From 2017 to 2021, the most common crash types and their cause were:

**426** crashes on US 51 were rear end crashes

- About 60% of those rear end crashes happened at Buckeye Rd or Pflaum Rd
- High number of crashes associated with transition from freeway section to signalized intersections

**111** crashes on US 51 were angle crashes

- About 25% of the angle crashes happened at the Broadway intersection
- Broadway intersection has more left turning vehicles compared to other intersections
