

WIS 136 PUBLIC INVOLVMENT MEETING

Welcome to the public involvement meeting to discuss the replacement of the pavement on a 1.1 mile section of WIS 136 in Sauk County.

PROJECT PURPOSE

The purpose of this project is to replace deteriorating pavement along WIS 136 between Skillet Creek Road and County Road DL.

PROJECT IMPROVEMENT

The proposed work will include milling of the existing 4-inch pavement, and placement of 4.5-inches of new asphalt. The travel lane will be reduced slightly, and the gravel shoulder will be widened. Centerline rumble strips will be installed. The box culvert near the County DL intersection will be removed and replaced with a lengthened pipe culvert to extend the end wall further from the roadway. A pipe culvert near mid project will be removed and replaced. With the culvert replacement and lengthening, a small amount of real-estate may be acquired but the exact amount is currently unknown.

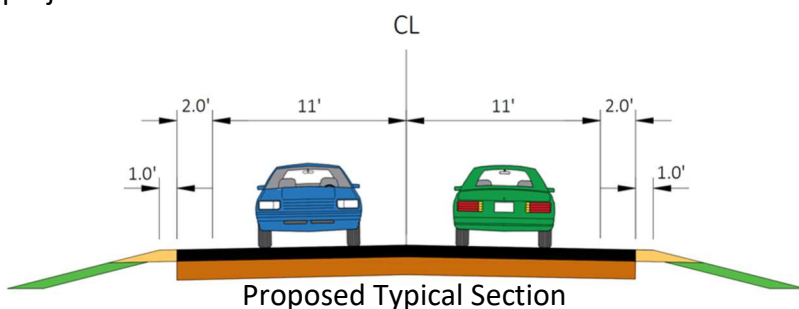

TRAFFIC CONTROL

WIS 136 will be closed to through traffic for the duration of construction activities. Access to homes and businesses will be maintained.

COMMENTS

A comment form is available for your written comments and concerns about this project. Please provide written comments by either returning them today, sending the comment form by mail or emailing the contact listed.

We appreciate your participation and comments on this project.
