

# Public Involvement Meeting Handout

April 2023

## WIS 69: Wittenwyler Road & County C intersections

Welcome to the public involvement meeting for the proposed improvements to WIS 69 near the village of Monticello. See Figure below for the project location.

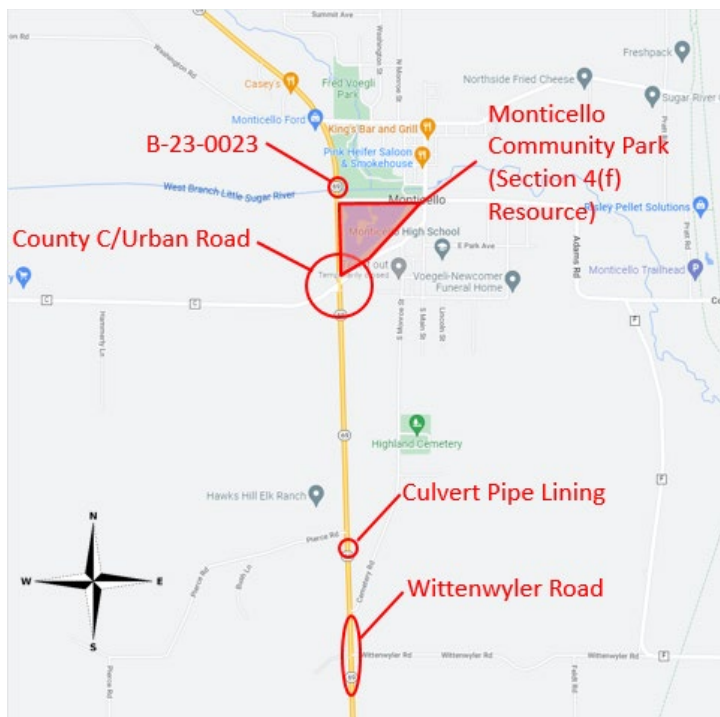

The Wisconsin Department of Transportation (WisDOT) is currently in the design phase of this project. The objective of this meeting is to provide you with updated information regarding the proposed improvements and preferred alternative. After a brief presentation, the meeting will follow an open house format.

The purpose of this project is to address safety issues at the intersections of Wittenwyler Road and County C/Urban Road intersection, address structure deficiencies at the structure over the West Branch Little Sugar River and extend the life of a deteriorating culvert.

Improvements include, but are not limited to:

- Constructing a roundabout at the County Highway C intersection
- Adding a left turn lane at Wittenwyler Road intersection
- Make improvements to the culvert pipe 350' south of Pierce Road
- Rehabilitation of bridge over West Branch Little Sugar River

This project is scheduled for construction in 2026. During construction, WIS 69 will remain open to traffic as much as possible, with temporary closures on County C, Urban Road, and Lake Avenue. Motorists can expect flagging, temporary traffic signals and lane shifts on WIS 69.
