Door Peninsula Corridor – Green Bay to Sturgeon Bay

Corridor Overview
This 85-mile corridor provides the principal access to one of the state’s premier recreation areas, Door County. While the highway provides access to some of the state’s largest ship building and repair facilities in Sturgeon Bay, boating and biking will continue to be major transportation modes on this corridor for both recreation and transportation. The corridor includes the urban and urbanized areas of Green Bay and Sturgeon Bay.

Current Corridor Characteristics
- **Airports:**
  - Air carrier (passenger) airport: Austin Straubel International (Green Bay)
  - Transport/corporate airport: Door County Cherryland (Sturgeon Bay)
- **Highways:**
  - Primary highway: WIS 57
  - Corridors 2030 Connector Route: WIS 57 (Green Bay to mid junction with WIS 42)
  - NHS intermodal terminals with local road connections: Washington Island Ferry, Austin Straubel International Airport, Port of Green Bay
- **Public Transit:**
  - Bus systems: Green Bay, Oneida Nation of Wisconsin
  - Shared-ride taxi: None
  - Specialized transit: Available in all counties; level of service depends on location
  - Fixed Guideway Transit: None in this corridor
- **Rail Freight:** None in this corridor
- **Intercity Passenger Rail:** None in this corridor
- **Intercity Bus:** Connections in Green Bay to intercity bus services to Milwaukee, Chicago, IL and Calumet, MI

Future Corridor Vision
- **Airports:** Continued service, increased direct air service and infrastructure projects to support business airplane-capable airports
- **Highways:** Maximized preservation and maintenance of infrastructure and continued user efficiency and mobility, including improved traffic movement, along WIS 57 by implementing:
  - State Access Management Plan vision
  - Tier 2A; WIS 57 (Green Bay to mid junction with WIS 42)
  - Tier 3; WIS 57 (Mid junction with WIS 42 to Sister Bay)
- **Candidate passing lane corridors (WIS 57)**
- **Candidate expressway upgrades and/or the potential conversion of expressway to freeway upgrades (WIS 57)**
- **Public Transit:** Increased regional coordination and continued service
- **Fixed Guideway Transit:** None in this corridor
- **Rail Freight:** None in this corridor
- **Intercity Passenger Rail:**
  - New service:
    - New Green Bay – Milwaukee – Chicago, IL intercity passenger rail service
    - All new intercity passenger rail services will operate within existing corridors
- **Intercity Bus:**
  - Continued existing services
  - New service:
    - Phase 1: Between Madison and Green Bay and between Minneapolis/St. Paul, MN and Green Bay
    - Phase 2: Between Marinette and proposed Green Bay passenger rail station; between Sturgeon Bay and proposed Green Bay passenger rail station; and between proposed Green Bay passenger rail station and Milwaukee Intermodal Station
    - Phase 3: Between Gills Rock and Green Bay with stops in Egg Harbor and Sturgeon Bay
- **Ports and Harbors:** Continued service, preservation, maintenance and infrastructure improvements (Green Bay, Sturgeon Bay, Northport, Detroit Harbor)
- **Ferry:** Continued service, preservation, maintenance and infrastructure improvements (Washington Island)
- **Bicycle/Pedestrian:** Continued and enhanced accommodations, linkages and accessibility along and across facilities

Refer to the “Corridor Map - Data Definitions and Sources” for more information.
About Multimodal Corridors

The Connections 2030 planning process identified statewide multimodal, intercity corridors as visual communication tools to view existing conditions, transportation features and future recommendations. These corridors collectively represent a starting point toward long-term implementation of Connections 2030 and the corridor management process.

These multimodal corridors:

- Serve critical sectors of the economy or major population centers
- Carry significant travel activity for passenger and/or freight traffic
- Show significant growth in travel or economic development
- Serve an important role for other transportation modes

Corridor selection was also influenced by local land use and development plans. Each corridor is a broad geographical band that follows a general directional flow connecting trips that may include streets, highways, rail, pedestrian, bicycle facilities and routes and transit route alignments. A corridor generally follows the directional flow of a state highway alignment. It includes parallel state and local roads, service roads and facilities for other transportation modes, such as rail, pedestrian, and transit, which influence the mobility, capacity, safety and other functional elements of the corridor.

Important Notes about What is Depicted

The map shows currently programmed and proposed future activities (as of December 31, 2007) that have significant impacts on the corridor. Not all projects or initiatives are mapped, and additional analyses, including an environmental document, will be conducted before any of the projects or activities are completed. These analyses may include studying alternatives (including a no build/no change alternative) with public involvement opportunities as appropriate. Resources and shifting priorities may impact WisDOT’s implementation of any proposed activity within the time frames identified. WisDOT will remain flexible in the implementation of Connections 2030 recommendations. The map and table activities on the following page reflect actions identified in:

- Connections 2030 policies
- WisDOT’s Six-Year Highway Improvement Program (2008 - 2013)
- Other WisDOT program data
- Other WisDOT plans and studies
- Metropolitan planning organizations’ (MPOs), regional planning commissions’ (RPCs) and tribal long-range transportation plans

For information on funding and implementation priorities, see those Connections 2030 chapters. For more information on transportation projects, contact the WisDOT Region Office (see Connections 2030 or www.dot.wisconsin.gov/projects/ for a map of region offices). MPO, RPC and tribal long-range transportation plans offer recommendations on all transportation modes within their boundaries.
Door Peninsula Corridor – Green Bay to Sturgeon Bay

Current and Proposed Future Activities

These activities may not occur in the time frame identified due to budget constraints, changing conditions or shifting priorities. Refer to the “Important Notes about What is Depicted” for more information or contact the WisDOT Region Office.

Short-Term (2008 – 2013)

<table>
<thead>
<tr>
<th>Project</th>
<th>Activities</th>
</tr>
</thead>
<tbody>
<tr>
<td>WIS 57</td>
<td>Construct last portion of enumerated Major project from Kewaunee/Door county line to County Rd H (Door Co), which may include a bypass, adding lanes, and/or capacity</td>
</tr>
<tr>
<td>WIS 57</td>
<td>Prepare corridor plan from WIS 42/57 (south junction) to WIS 42/57 (mid junction); and from WIS 54/57 interchange to Oshkosh</td>
</tr>
<tr>
<td>BUS 57</td>
<td>Construct new bridge from Maple St to Oregon St (Sturgeon Bay)</td>
</tr>
<tr>
<td>Bicycle/Pedestrian</td>
<td>Support the extension of the Ahnapee State Trail to Kewaunee on the Rails-to-Trails corridor</td>
</tr>
<tr>
<td>Park &amp; Ride</td>
<td>Support proposed park and ride construction at WIS 57 and County Rd C (Door Co)</td>
</tr>
<tr>
<td>Michigan St Bridge</td>
<td>Rehabilitate Michigan St bridge</td>
</tr>
<tr>
<td>Port/Harbor</td>
<td>Develop southwest Canal Harbor for the Port of Sturgeon Bay</td>
</tr>

Data Definitions

Corridors 2030
(See Connections 2030 Chapter 3, Preserve and Maintain Wisconsin's Transportation System, for more information.)
- Backbone system: Multilane, divided highways interconnecting all major population and economic centers of the state and linking them to the national transportation network
- Connector system: Two- and four-lane highways directly linking other significant economic and tourism centers to the Backbone system

State Access Management Plan vision
(See Connections 2030 Chapter 9, Promote Transportation Efficiencies, for more information.)
- Tier 1: By 2030, in rural areas (outside of city and village boundaries), access to the highway will primarily be at interchanges (with some existing safely spaced, locked and gated emergency vehicle driveways and a few isolated field entrances possible at select locations)
- Tier 2A: By 2030, in rural areas (outside of city and village boundaries), access to the highway will primarily be at at-grade public road intersections (with some existing safely spaced, locked and gated emergency vehicle driveways and few isolated field entrances)
- Tier 2B: By 2030, in rural areas (outside of city and village boundaries), access to the highway will primarily be at at-grade public road intersections with some existing safely spaced, lower volume private, residential, field or emergency service driveways
- Tier 3: By 2030, in rural areas (outside of city and village boundaries), access to the highway will primarily be at at-grade public road intersections with some existing safely spaced, higher volume private, residential and field or emergency service driveways
- Tier 4: By 2030, in rural areas (outside of city and village boundaries), access to the highway will be at safely spaced driveways and roads

State Airport System Plan classifications
- Air carrier (passenger)/air cargo: Designed to accommodate virtually all passengers and cargo (aircraft used in regional service, and small airplanes (piston or turboprop) used in commuter air service)
- General utility: Intended to serve virtually all small aviation single and multi-engine aircraft used in regional service, and small airplanes (piston or turboprop) with a maximum take-off weight of 12,500 pounds or less
- Military transports
- Air carrier (passenger)/air cargo: Designed to accommodate virtually all passengers and cargo
