Frank Lloyd Wright Corridor – La Crosse to Madison

Corridor Overview
This 140-mile corridor links La Crosse to Madison and locations south and east. The corridor serves an agricultural region of the state, and provides one of the few Wisconsin River crossings in southern Wisconsin. The corridor is named after the memorial highway honoring the architectural accomplishments of Frank Lloyd Wright. The entire Frank Lloyd Wright Memorial Highway extends along US 14 from Richland Center to Madison. US 14 is also designated as the Purple Heart Memorial Highway from Richland Center to the Minnesota state line. The corridor’s topography provides some of the most scenic hill and valley landscapes in the state. The corridor serves the urban and urbanized areas of La Crosse, Madison and Richland Center.

Current Corridor Characteristics

- **Airports:**
  - Air carrier (passenger) airports: La Crosse Municipal, Dane County Regional (Madison)
  - Transport/corporate airport: Tri-County Regional (Lone Rock)
  - General utility airport: Middleton Municipal Airport - Morrey Field
  - Basic utility airports: Viroqua Municipal, Richland (Richland Center), Sauk-Prairie (Prairie du Sac), Blackhawk Airfield (Cottage Grove)

- **Highways:**
  - Primary state highway: US 14
  - Corridors 2030 Connector Route: US 14
  - Completed passing lane corridors:
    - US 14 (WIS 58 to WIS 60)
    - US 14 (WIS 130 to County Rd Y (Dane Co))
  - NHS intermodal terminals with local road connections: Port of La Crosse, Badger/Greyhound Terminal (Madison), Dane County Regional Airport (Madison)

- **Public Transit:**
  - Bus systems: La Crosse, Madison, Monona
  - Shared-ride taxi: Onalaska, Viroqua, Madison
  - Specialized transit: Available in all counties; level of service depends on location

- **Fixed Guideway Transit:** None along this corridor

- **Rail Freight:**
  - Freight rail service exists
  - Continued freight rail service and corridor preservation

- **Airports:**
  - Air carrier (passenger) airports: La Crosse Municipal, Dane County Regional (Madison)
  - Transport/corporate airport: Tri-County Regional (Lone Rock)
  - General utility airport: Middleton Municipal Airport - Morrey Field
  - Basic utility airports: Viroqua Municipal, Richland (Richland Center), Sauk-Prairie (Prairie du Sac), Blackhawk Airfield (Cottage Grove)

Future Corridor Vision

- **Airports:** Continued service, increased direct air service and infrastructure projects to support business airplane-capable airports

- **Highways:**
  - Maximized preservation and maintenance of infrastructure and continued user efficiency and mobility, including improving traffic movement, along US 14 by implementing:
    - State Access Management Plan vision
      - Tier 1: US 14 (Cross Plains municipal limit to Middleton municipal limit)
      - Tier 2A: US 14 (La Crosse municipal limit to Viroqua municipal limit, around Richland Center; and Spring Green municipal limit to Cross Plains municipal limit)
      - Tier 2B: US 14 (Viroqua municipal limit to Richland Center municipal limit; and Richland Center municipal limit to Spring Green municipal limit)
  - Candidate passing lane corridor (US 14)
  - Candidate expressway upgrade of corridor and the potential conversion of expressway-to-freeway corridor (US 14)
  - Enumerated Major project at Viroqua and Westby

- **Public Transit:**
  - Increased regional coordination and continued service
  - Fixed Guideway Transit: New service (Dane County)

- **Rail Freight:** Continued freight rail service and corridor preservation

- **Intercity Passenger Rail:**
  - New Minneapolis/St. Paul, MN – Madison – Milwaukee – Chicago, IL intercity passenger rail service
  - New intercity passenger rail services will operate within existing corridors

- **Intercity Bus:**
  - Continued existing services
  - New service:
    - New Madison – Milwaukee – Chicago, IL intercity passenger rail service
    - New Minneapolis/St. Paul, MN – Madison – Milwaukee – Chicago, IL intercity passenger rail service
    - All new intercity passenger rail services will operate within existing corridors

- **Fixed Guideway Transit:**
  - None along this corridor

- **Bicycle/Pedestrian:**
  - Major trails: Pine River Recreational Trail, Ice Age Trail (pedestrian only)
  - Accommodations, linkages and accessibility along and across some facilities

Refer to the “Corridor Map - Data Definitions and Sources” for more information.
Frank Lloyd Wright Corridor – La Crosse to Madison

About Multimodal Corridors
The Connections 2030 planning process identified statewide multimodal, intercity corridors as visual communication tools to view existing conditions, transportation features and future recommendations. These corridors collectively represent a starting point toward long-term implementation of Connections 2030 and the corridor management process.

These multimodal corridors:
• Serve critical sectors of the economy or major population centers
• Carry significant travel activity for passenger and/or freight traffic
• Show significant growth in travel or economic development
• Serve an important role for other transportation modes

Corridor selection was also influenced by local land use and development plans. Each corridor is a broad geographical band that follows a general directional flow connecting trips that may include streets, highways, rail, pedestrian, bicycle facilities and routes and transit route alignments. A corridor generally follows the directional flow of a state highway alignment. It includes parallel state and local roads, service roads and facilities for other transportation modes, such as rail, pedestrian, and transit, which influence the mobility, capacity, safety and other functional elements of the corridor.

Important Notes about What is Depicted
The map shows currently programmed and proposed future activities (as of December 31, 2007) that have significant impacts on the corridor. Not all projects or initiatives are mapped, and additional analyses, including an environmental document, will be conducted before any of the projects or activities are completed. These analyses may include studying alternatives (including a no-build/no change alternative) with public involvement opportunities as appropriate.

Resources and shifting priorities may impact WisDOT’s implementation of any proposed activity within the time frames identified. WisDOT will remain flexible in the implementation of Connections 2030 recommendations. The map and table activities on the following page reflect actions identified in:
• Connections 2030 policies
• WisDOT’s Six-Year Highway Improvement Program (2008 - 2013)
• Other WisDOT program data
• Other WisDOT plans and studies
• Metropolitan planning organizations’ (MPOs), regional planning commissions’ (RPCs) and tribal long-range transportation plans

For information on funding and implementation priorities, see those Connections 2030 chapters. For more information on transportation projects, contact the WisDOT Region Office (see Connections 2030 or www.dot.wisconsin.gov/projects/ for a map of region offices). MPO, RPC and tribal long-range transportation plans offer recommendations on all transportation modes within their boundaries.
Frank Lloyd Wright Corridor – La Crosse to Madison

Current and Proposed Future Activities

These activities may not occur in the time frame identified due to budget constraints, changing conditions or shifting priorities. Refer to the “Important Notes about What is Depicted” for more information or contact the WisDOT Region Office.

Short-Term (2008 – 2013)

US 12 Improve corridor plan from Parmenter St (Middleton) to County Rd W (Baraboo, Sauk Co)
US 14 Prepare corridor plan from US 12 to WIS 76 and from WIS 76 to WIS 80
US 14 Replace bridge over Wisconsin River
US 14 Prepare corridor plan from WIS 27 to WIS 131
US 61/WIS 131 Replace bridges over Baker Creek and Kickapoo River in Soldiers Grove
WIS 56 Reconstruct from Mahoney St (Viroqua) to US 14 and from east of WIS 131 (Viroqua) to east of River Rd (Viroqua)
WIS 56 Replace bridge east of Viola over the Kickapoo River
WIS 60 Replace bridge from Casad Rd (Town of Troy) to County Rd B (Sauk Co.)
WIS 82 Replace west bridge over Otter Creek
WIS 162 Replace bridge deck over Hohnhell Coulee Creek
P&K Plan Support proposed park and ride construction near the intersection of US 14 and WIS 78

Mid-Term (2014 – 2019)

US 12 Improve corridor plan from WIS 35 to WIS 162
US 14 Construct environmental Major project from the south end of the proposed Westby bypass to the north end of the proposed Viroqua bypass which may include bypassing Westby and Viroqua and adding lanes from Tristar Rd (Westby) to County Rd B (Viroqua)
WIS 60 Replace bridge over Badger Valley Creek if supported by environmental document
WIS 162 Replace bridge over Coon Creek if supported by environmental document
WIS 131 Replace bridge over Monny Creek if supported by environmental document
WIS 171 Replace bridge over Mill Creek if supported by environmental document

Bicycle/Pedestrian
Provide urban and rural accommodations along US 14 across the Wisconsin River (Spring Green), and from County Rd KP (Mazomanie) to US 12 (Middleton)

Bicycle/Pedestrian
Provide urban and rural accommodations along WIS 35 from La Crosse to Prairie du Chien

Bicycle/Pedestrian
Provide urban and rural accommodations along US 14 from Spring Coulee Rd (Westby) through the Viroqua city limits; and from WIS 171 (Boaz) through the Richland Center city limits.

Intercity Bus
Support new intercity bus service between La Crosse and Madison via I-90 with stops in Sparta, Tomah, Wisconsin Dells, and Milwaukee

Long-Term (2020 – 2030)

US 14 Implement the results of study, which may include constructing candidate expressway upgrades and/or converting to freeway from WIS 78 to US 12 if supported by environmental document
US 14 Replace bridge over Black Earth Creek if supported by environmental document
US 61 Replace bridge over Trout Creek if supported by environmental document
WIS 56 Replace bridge west of Viola over the Kickapoo River if supported by environmental document

Long-Term (2020 – 2030), continued

US 50 Replace bridge over Fancy Creek if supported by environmental document
WIS 60 Replace bridge over Wilson Creek if supported by environmental document
WIS 80 Replace bridge over Pine River if supported by environmental document
WIS 82 Replace east bridge over Otter Creek if supported by environmental document
WIS 130 Replace bridges (2) over Bear Creek if supported by environmental document
WIS 162 Replace bridge over Dutch Creek if supported by environmental document

Intercity Bus
Support new intercity bus service between La Crosse and Madison with stops in Sparta, Tomah, Wisconsin Rapids, Stevens Point and Mosinee

Entire Planning Period

US 12 Construct candidate expressway upgrades and/or convert to freeway from County Road 2 (Sauk Co) to County Rd M (Dane Co) if supported by environmental document
US 12 Construct environmental Major project from I-90/35 (Lake Delton) to Sauk City, which may include bypassing Baraboo, adding lanes or capacity on new alignment and constructing candidate upgrades and/or converting to freeway
US 14 Construct candidate passing lanes from US 14/61 split (Readstown) to Westside Dr (Richland Center) and from WIS 60 to WIS 130 if supported by environmental document
US 14/61 Construct candidate passing lanes from County Rd P (Vermillion Co) to Alpine Dr (Town of Christiana) and from WIS 27 to US 14/61 split (Readstown) if supported by environmental document
US 61 Construct candidate passing lanes from WIS 60 to US 14 if supported by environmental document
WIS 23 Construct candidate passing lanes from US 14 to WIS 154 if supported by environmental document

Airports
Support continued preservation, maintenance and infrastructure projects at State Airport System Plan airports

Bicycle/Pedestrian
Support urban and rural accommodations and linkages to create a connected network that provides accessibility along and across facilities

Intercity Bus
Support continued intercity bus service between Madison and La Crosse via US 14 with stops in Cross Plains, Black Earth, Mazomanie, Spring Green, Lone Rock, Richland Center, Readstown, Viroqua, Westby and Coon Valley

Intercity Passenger Rail
Support continued Amtrak Eureka duVoyer service between Seattle, WA/Portland, OR and Chicago, IL with stops in La Crosse, Tomah, Wisconsin Dells, Portage, Columbus and Milwaukee

Local Roads
Support continued preservation, maintenance and infrastructure projects

Public Transit
Public Transit
Support public transit services to coordinate and expand rural transit service

Public Transit
Support continued shared ride tax service in Viroqua

Rail Freight
Support the preservation of existing freight services and corridors

Specialized Transit
Support continued service and encourage improved service coordination

State Highways
State Highways
Construct grade separations at rail crossings if supported by environmental document

State Highways
State Highways
Preserve and maintain infrastructure

State Highways
State Highways
Improve traffic movement with traffic operations infrastructure strategies
CONNECTIONS 2030 LONG-RANGE MULTIMODAL TRANSPORTATION PLAN

Corridor Map – Data Definitions and Sources

Data Definitions

Corridors 2030
- See Connections 2030 Chapter 5, Preserve and Maintain Wisconsin’s Transportation System, for more information.
- Backbone system: Multilane, divided highways interconnecting all major population and economic centers of the state and linking them to the national transportation network
- Connector system: Two- and four-lane highways directly linking other significant economic and tourism centers to the Backbone system

State Access Management Plan vision
- See Connections 2030 Chapter 8, Promote Transportation Efficiencies, for more information.
- Tier 1: By 2030, in rural areas (outside of city and village boundaries), access to the highway will primarily be at interchanges (with some existing safely spaced, locked and gated emergency vehicle driveways and a few isolated field entrances possible at select locations)
- Tier 2A: By 2030, in rural areas (outside of city and village boundaries), access to the highway will primarily be at at-grade public road intersections (with some existing safely spaced, locked and gated emergency vehicle driveways and few isolated field entrances)
- Tier 2B: By 2030, in rural areas (outside of city and village boundaries), access to the highway will primarily be at at-grade public road intersections with some existing safely spaced, lower volume private, residential, field or emergency service driveways
- Tier 3: By 2030, in rural areas (outside of city and village boundaries), access to the highway will primarily be at at-grade public road intersections with some existing safely spaced, higher volume private, residential and field or emergency service driveways
- Tier 4: By 2030, in rural areas (outside of city and village boundaries), access to the highway will be at safely spaced driveways and roads

State Airport System Plan classifications
- Air carrier (passenger)/air cargo: Designed to accommodate virtually all aircraft up to and, in some cases, including wide body jets and large military transports
- Transport/corporate: Intended to serve corporate, small passenger and cargo jet aircraft used in regional service, and small airplanes (piston- or turboprop) used in commuter air service
- General utility: Intended to serve virtually all small aviation single and twin-engine aircraft (both piston and turboprop) with a maximum take-off weight of 12,500 pounds or less
- Basic utility: Intended to serve all small-engine piston aircraft and many of the smaller twin-engine piston aircraft with a gross takeoff weight of 12,500 pounds or less

Truck volume descriptions
- Low (0 – 501 trucks per day), Medium (501 – 2,500 trucks per day), High (2,501 – 8,000 trucks per day), Very High (more than 8,000 trucks per day)

Urban/urbanized areas
- Urban areas: Areas with populations between 5,000 and 49,999
- Urbanized areas: Areas with populations of 50,000 or more

Data Sources
