About Connect 2050

Connect 2050 is a vision plan, setting an overall direction for our transportation system and establishing goals and objectives based on transportation-related issues, trends and comments from people like you!

Connect 2050 is:

• **LONG-RANGE**: Looks ahead to the future, in this case to 2050.

• **STATEWIDE**: Has a broad reach, its vision, goals and objectives will guide WisDOT’s decision-making for all of Wisconsin and for all people.

• **MULTIMODAL**: Sets goals and objectives that apply to all modes and means of transportation in Wisconsin, including cars, roads, transit, biking, walking, rail, aviation, and water transport.
How does the plan work?

Connect 2050’s goals and objectives will be implemented through a series of short-term actions identified in technical reports, modal plans, operational plans, business plans, and programs.
Outreach: How we connected

- 2,200+ survey responses
- 700+ virtual open house page views
- 5,000+ website page views
- 5,100 social media clicks
- 2,400+ total comments

- 400+ stakeholder webinar views
Who responded

We asked Wisconsinites to share their vision for the future of transportation during the development of Connect 2050.

Thanks to your participation, we received comments and opinions from people in all 72 counties in the state!
