EDGE OF DECK FLASHING

The edge deck flashing is for open rail bridges and may be used for rehabilitation or new construction. Contact the regional bridge maintenance engineer for the region on whether or not to use the flashing on new bridges. Detail 1 or Detail 2, or a combination of the two, may be used for rehabilitation.

The design engineer shall provide concrete surface repair details as needed. Conceptual details are shown on this standard.

NOTES

The old item "Flashing Stainless Steel" shall include providing and installing the stainless steel flashing, silicone caulk, and 3/16" concrete screws. Flashing to be installed after protective surface treatment application.

Concrete screws shall be 410 stainless steel.

Details not to be used if clearance is an issue or debris is a concern.
