TYPE I

Composer railing type '3T'

TYPE II

Single rustication lines

TYPE III

Recessed panel

DESIGNER NOTES

These three types shown are preferred aesthetic concepts for WISDOT projects. They are used without staining. Costs are incidental to masonry bridges and not subject to CSS funding.

Only the choice of parapet, wings, and pier details shown for a given type should be used for that type.

Wings parallel to centerline of abutment or alignment parallel to plain type B.

In lieu of the combination railing type '3T', single line fencing may be used. See standard 4.04 for details.

See Bridge Manual Section 4.9 for location of use and requirements.

STANDARD 4.03

Aesthetic Concepts with Pedestrian Accommodations
