

### **15.8.1 Maintenance**

#### **15.8.1.1 New CCTV Cameras**

Once the State Traffic Operations Center Maintenance Contractor accepts the CCTV camera equipment per 15.6.2, the State Traffic Operations Center will accept the camera onto the Statewide Maintenance Contract.

#### **15.8.1.2 Existing CCTV Cameras**

If a contractor is working on an existing camera, the contractor is responsible for locates and any maintenance until seven days after the as-builts have been delivered to the State Traffic Operations Center. At that time, the State Traffic Operations Center will accept the camera onto the Statewide Maintenance Contract.

### **15.8.2 Reevaluation**

In addition to periodic camera equipment updates, cameras should be evaluated for their effectiveness. Existing camera installations should be reviewed to determine if there are locations are as beneficial as they used to be. It may be beneficial to remove cameras that are no longer necessary.
