**The existence of curb and gutter does not itself mandate the vertical clearance illustrated.** That height is typically measured where there is sidewalk adjacent to the roadway or parking is permitted. In the absence of sidewalk vertical clearance is measured from the top of the curb. Offset of signs is measured from the flow line.

* 5 feet from edge of a paved shoulder or 12 feet from the edge of pavement (edge line location) or 2 feet from outside edge of gravel, whichever is greater unless directed by project engineer.

**URBAN AREA**

2' Min - 4' Max (See Note 6)

**Curb Flowline**

White Edgerline Location

**RURAL AREA** (See Note 2)

**GENERAL NOTES**

1. Signs wider than 4 feet or 20 sq.ft. or larger, shall be mounted on multiple posts. Refer to page 44-4.

2. If signs are mounted on or behind barrier wall, see 44-10 Sign Plate.

   The Double Arrow sign (W2-4D) shall be mounted at a height of 2'-3" (D). The Chevron sign (W1-8), Roundabout Chevron panel (W6-4B), Enhanced Reference Markers, Clearance Markers (W5-52), Mile Markers (D0 series), in Road Object Markers (W5-54) & End of Road Markers (W5-56) shall be mounted at a height of 4'-3" (D).

3. For expressways and freeways, mounting height is 7'-3" (D) or 6'-3" (D) depending upon existence of a sub-signal.

4. Minimum mounting height for signs mounted on traffic signal poles is 5'-3" (D).

5. Offset distance shall be consistent with existing signs or consistent throughout length of project.

6. The (D) tolerance for mounting height is 3 inches.

7. Folding signs shall be mounted at a height of 5'-3" (D) or as directed by the Engineer.
