For signing, the cost of which is to be billed to another party, a professional and technical project should be set up to receive charges.

With a P and T project (Series 0663-3X-XX), there will be an automated billing by BAA. An advantage is that automated billing should ensure that a billing goes out, not forgotten, and will include labor, fringe benefits, vehicle costs as well as materials. Remember to remind your crews to record that number on all their record keeping paperwork.
