**Waukesha**

### Letting of January 9, 2024

This is Addendum No. 01, which provides for the following:

#### Special Provisions:

Revised Special Provisions	
Article No.	Description
7	Utilities

The responsibility for notifying potential subcontractors and suppliers of these changes remains with the prime contractor.

Sincerely,

*Mike Coleman*

Proposal Development Specialist  
Proposal Management Section

**ADDENDUM NO. 01**

**1090-09-76**

**December 26, 2023**

**Special Provisions**

**7. Utilities.**

*Add the following under "The following utility companies have facilities within the project area that need adjustments:"*:

**We Energies – Gas**

Proposed WisDOT fiber conduit crossing We Energies – Gas lines are to cross with a minimum 6" vertical distance. Less than 6" would be allowed as long as the gas main is protected by a suitable material such as rock shield. We Energies Gas is responsible for providing the required protection, and this process will take 2 days to complete. Provide a 14 day of advance notice, followed by a 3 day reminder, to inform them that the site is ready for the implementation of the required protection. For notification, contact their gas emergency line at 1-800-261-5325.

It is imperative that the highway contractor contact We Energies before removing any gas facilities, to verify that they have been discontinued and carry no natural gas. The contractor must not assume that unmarked facilities have been discontinued. At no time is it acceptable to push, pull, cut, or drill an unmarked facility without explicit consent from We Energies. Contractor must call the We Energies 24-hour Dispatch lines to arrange for this verification. Contact 1 (800) 261-5325 for gas emergencies, to identify if gas facilities are live, and gas valve box adjustments. We Energies Gas Dispatch 1 (800) 261-5325.

*Delete the following under "The following utility companies have facilities within the project area; however, no adjustments are anticipated:"*:

**We Energies – Gas**

We Energies has no relocations and/or adjustments for this project.

Proposed WisDOT fiber conduit crossing We Energies – Gas lines are to cross with a minimum 6" vertical distance. Less than 6" would be allowed as long as the gas main is protected by a suitable material such as rock shield. We Energies Gas is responsible for providing the required protection, and this process will take 2 days to complete.

It is imperative that the highway contractor contact We Energies before removing any gas facilities, to verify that they have been discontinued and carry no natural gas. The contractor must not assume that unmarked facilities have been discontinued.
