Question	Answer	Number	Asked	Answered
Does the request for qualification (detailed below) apply to suppliers of materials-only? Upon review of the RFQ questions below (Option A and B), our nursery doesn't fall into either category. Both categories reference <i>Installation and Maintenance Contractor</i> . Our nursery is currently listed on the WDNR Native Plant Nursery List and can supply native plants, seed and other vegetative materials for WisDOT projects. We appreciate consideration to be a supplier and seek clarification if the requested prequalification statement is required.	No, suppliers are not required to be pre-certified. The RFQ for Pre-Certified contractors for Native Seed Installation and Maintenance and Woody Vegetation Installation and Maintenance is for contractor installation and maintenance of vegetation plantings only. The prime contractor is responsible for sourcing and selecting the suppliers of the materials required for the project (i.e. native seed, shrubs, and trees).	1	12/08/17	12/12/17
I cannot get my application to go through to landscapecontractorprequalification@dot.wi.gov; It keeps coming back, undeliverable.	The correct mailbox is: Prequalification@dot.wi.gov If you are having issues with a large file size being blocked, please notify the Prequalification mailbox. Alternative delivery is to fax 608-884-1220 or mail to: Kim Schauder WisDOT SW Mega Project Office 111 Interstate Blvd Edgerton WI 53534	2	12/26/17	01/03/18
Does the pre-certification requirement apply to all WisDOT projects that have native seed or woody vegetation, or does this only apply to a few select projects? In other words, will we need to be pre-certified in order to perform ANY plantings on WisDOT projects?	The precertification requirement will apply to select projects only. The pre-certified lists will not be required for all WisDOT projects to perform plantings.	3	01/04/18	01/08/18
