Section 13-15 Hydraulic Design of Culverts

13-15-1 Economic Analysis
   1.1 Introduction

13-15-5 Design Criteria
   5.1 Introduction
   5.2 Culvert Location
   5.3 Structure Size Selection
   5.4 Allowable Headwater
   5.5 Design Freeboard and Headwater-to-Depth Ratio
   5.6 Inlet Treatments
   5.7 Improved Inlets
   5.8 End Protection
   5.9 Type, Shape, and Roughness of Culvert
   5.10 Design Tail Water
   5.11 Allowable Velocity
   5.12 Depth of Flow
   5.13 Check Discharges
   5.14 References

Attachment 5.1 Entrance Loss Coefficients (Ke) for Culverts

13-15-10 Culvert Hydraulics
   10.1 Introduction
   10.2 Available Design Aids
Section 13-20 Hydraulic Design of Bridges

13-20-1 Design Methods
1.1 Definition
1.2 Type of Flow
1.3 Methods
1.4 Additional Literature

Attachment 1.1 Types of Flow Encountered at Bridges

Section 13-25 Storm Sewer Design

13-25-1 Introduction
1.1 Introduction

Attachment 1.1 Storm Sewer Design Flow Chart

13-25-5 Basic Drainage Area Information
5.1 Basic Information Needs

13-25-10 Field Drainage Information
10.1 Field Information Needs

13-25-15 Preliminary Layout of System
15.1 Background Information
15.2 Inlet Locations
15.3 Conduit Location
15.4 Standards for Storm Drain Pipe
15.5 Manholes
15.6 Outfalls

13-25-20 Design Discharge
20.1 Design Discharge Information

13-25-25 Gutter Design
25.1 Capacity
25.2 Gutter Types
25.3 Longitudinal Slopes

Attachment 25.1 Gutter Design Nomograph
Attachment 25.2 Gutter Design Example

13-25-30 Hydraulic Design of Inlets
30.1 Inlet Types
30.2 Allowable Inlet Capacities
30.3 Capacities of Grate Inlets and Combination Inlets on a Continuous Grade
30.4 Capacity of Grate Inlets in a Sag
30.5 Capacity of Curb Openings in a Sag
30.6 Spacing of Inlets on a Continuous Grade
30.7 Literature on Inlet Design
30.8 References

Attachment 30.1 Reduction Factors for Inlets
Attachment 30.2 Performance Curves for Slotted CMP Surface Drains

13-25-35 Hydraulic Design of Storm Sewers
35.1 Background Information

FDM Chapter 13 Table of Contents

Attachment 15.2...Grass Lined Channel Design WisDOT Spreadsheet Worksheet
Attachment 15.3...Grass Lined Channel Design Example (Using WisDOT Spreadsheet)
13-30-25.....Rock Riprap Lined Channels
   25.1......Introduction
   25.2......Analysis of Slopes Less than or Equal to 20 Percent
   25.3......Manning’s Roughness (for Rock Riprap Lined Channels)
   25.4......Permissible Shear Stress
   25.5......Rock Riprap Design Procedure
   25.6......Design Example (Using Equations): Riprap Channel (Mild Slope)
   25.7......Example Riprap Lined Design for Channel Slopes ≤ 20% Using the WisDOT Spreadsheet
   25.8......Additional Design Considerations
   25.9......References
Attachment 25.1......Design Example (Using Equations): Riprap Channel (Mild Slope)
Attachment 25.2......Riprap Channel (Mild Slope) WisDOT Spreadsheet Worksheet
Attachment 25.3......Instructions and Example for Riprap Lined Design for Channel Slopes ≤ 20% Using the WisDOT Spreadsheet
Attachment 25.4......Angle of Repose of Riprap in Terms of Mean Size and Shape of Stone
Attachment 25.5......Map of Areas in Wisconsin where Rounded Riprap is Predominantly Available
13-30-30.....Rock Riprap Lined Chutes
   30.1......Introduction
   30.2......Steep Slope Analysis
   30.3......Rock Chute Design Spreadsheet
   30.4......References
Attachment 30.1......Rock Chute Design Data Spreadsheet and Design Example
Attachment 30.2......Rock Chute Design - Plan Sheet
Attachment 30.3......Rock Chute Design- Construction Detail

Section 13-35 Erosion and Water Pollution Control
13-35-1......Special Hydraulic Structures
   1.1......Introduction
   1.2......Flow Control Gates
   1.3......Debris Control Structures
   1.4......Detention Basin
   1.5......Temporary Sediment Structures
13-35-5......Energy Dissipaters
   5.1......Introduction
   5.2......Riprap Blanket
   5.3......Lined Channel Expansions
   5.4......Outlet Expansion
   5.5......Literature on Energy Dissipaters
Attachment 5.1......Dissipater Limitations
Attachment 5.2......Recommended Configuration of Riprap Blanket Subject to Maximum and Minimum Tail Waters
Attachment 5.3......Culver Outlet Erosion Protection, Lined Channel Expansions
Attachment 5.4......Example Problem, Lined Channel Expansion Design
Attachment 5.5......Typical Outlet Expansion Diagram
Attachment 5.6......Length Requirements for Expanded Pipes

Section 13-40 Subgrade Drainage
13-40-1......Underdrains
   1.1......Introduction
   1.2......Descriptions
   1.3......Design Criteria
   1.4......Underdrain Conduit Installations
   1.5......Material Considerations
   1.6......Geotextile Fabric
   1.7......Selection of Type
   1.8......Construction
Section 13-45 Culvert and Storm Sewer Rehabilitation and Replacement

13-45-1 Background
  1.1 Introduction
  1.2 Design Responsibility and Coordination
  1.3 Definitions

13-45-5 Design Considerations
  5.1 Introduction
  5.2 Evaluation
  5.3 Hydraulics
  5.4 Structural Condition
  5.5 Cleaning and Verification of Clearance
  5.6 Environmental
  5.7 Safety
  5.8 Access
  5.9 Traffic

13-45-10 Culvert Rehabilitation by Sliplining
  10.1 Introduction
  10.2 Types of Sliplining
  10.3 Sliplining Materials
  10.4 Slipliner Design Considerations

Attachment 10.1 Culvert Liner Hydraulic Check

13-45-15 Other Culvert Repair and Rehabilitation Practices
  15.1 Introduction
  15.2 Invert Paving
  15.3 Cured in Place Liner (CIPP)
  15.4 Centrifugally Cast and Spray-on Liners
  15.5 Pre and Post Installation Inspection of Cured in Place Pipe Liners (CIPP), Cast, and Spray-on Liners
  15.6 Design Requirements for Cured in Place Pipe Liners (CIPP), Cast, and Spray-on Liners
  15.7 Cost Considerations for Cured in Place Pipe Liners (CIPP), Cast, and Spray-on Liners

13-45-20 Trenchless Installation of New or Replacement Culvert Pipe and Storm Sewer
  20.1 Introduction
  20.2 Environmental Considerations
  20.3 Geotechnical Considerations
  20.4 Trenchless Construction Methods

13-45-99 Resources and References
  99.1 Resources
  99.2 References
