

# FACILITIES DEVELOPMENT MANUAL

Wisconsin Department of Transportation

## TABLE OF CONTENTS

### Chapter 14: Pavements

#### Section 14-1 General

- 14-1-1 ..... General
  - 1.1 ..... Originator
  - 1.2 ..... Objective
  - 1.3 ..... International Roughness Index (IRI)
  - 1.4 ..... Design Procedures
  - 1.5 ..... Soils
- 14-1-5 ..... Traffic
  - 5.1 ..... Traffic Information
  - 5.2 ..... Traffic Loading

#### Section 14-5 Base Course

- 14-5-1 ..... Base Aggregate Dense
  - 1.1 ..... General
  - 1.2 ..... Paving Platform
  - 1.3 ..... Design Guidance
- 14-5-5 ..... Base Aggregate Open Graded
  - 5.1 ..... General
  - 5.2 ..... Base Aggregate Open Graded Filter Layer
  - 5.3 ..... Use of BAOG
  - 5.4 ..... Stabilization
  - 5.5 ..... Edge Drains

#### Section 14-10 Pavement Design

- 14-10-1 ..... General
  - 1.1 ..... Subgrade Improvement Impact on Pavement Thickness Design
  - 1.2 ..... Policy
  - Attachment 1.1 ..... Soil Support Value vs. Design Group Index
- 14-10-5 ..... Hot-Mix Asphalt (HMA) Pavement Design
  - 5.1 ..... Basis of Design
  - 5.2 ..... Roughness Index
  - 5.3 ..... Traffic Loading
  - 5.4 ..... Soil Support
  - 5.5 ..... Design Equation
  - 5.6 ..... Structural Layer Coefficients
  - 5.7 ..... Subbase
  - 5.8 ..... Staged Construction
  - 5.9 ..... HMA Mixture Layers
  - 5.10 ..... Design Process
  - 5.11 ..... Edge and End Joints
  - 5.12 ..... Tack Coats
  - 5.13 ..... HMA Cold Weather and Multi-Season Paving
  - 5.14 ..... General Application Guidelines
  - 5.15 ..... References
  - Attachment 5.1 ..... Structural Layer Coefficients
  - Attachment 5.2 ..... Relative Strength Coefficients for Granular Subbase
  - Attachment 5.3 ..... Edge Joints
  - Attachment 5.4 ..... End Joints
  - Attachment 5.5 ..... Longitudinal Joints

- [Attachment 5.6](#)..... WisDOT Allowable HMA Mixture Types
- [Attachment 5.7](#)..... HMA Mixture Type Selection Process Examples
- [Attachment 5.8](#)..... WisDOT Asphalt Zones

- [14-10-10](#) ..... Concrete Pavement Design
  - [10.1](#)..... Standard Pavement Type
  - [10.2](#)..... Traffic Loading
  - [10.3](#)..... Modulus of Subgrade Reaction
  - [10.4](#)..... Design Equation
  - [10.5](#)..... Design Thickness
  - [10.6](#)..... Joints
  - [10.7](#)..... Filling Joints
  - [10.8](#)..... Construction Joints
  - [10.9](#)..... Tining
  - [10.10](#)..... References
- [14-10-15](#) ..... Bridge Approach Pavements
  - [15.1](#)..... General
  - [15.2](#)..... Local Roads
- [14-10-20](#) ..... Highway Ramp Design
  - [20.1](#)..... Pavement Type and Thickness
- [14-10-25](#) ..... Paved Shoulders
  - [25.1](#)..... Policy
  - [25.2](#)..... Thickness Design
  - [25.3](#)..... Type Selection
- [14-10-30](#) ..... Overlay Design
  - [30.1](#)..... General
  - [30.2](#)..... Methods of Design
- [14-10-35](#) ..... Intersections
  - [35.1](#)..... General
  - [35.2](#)..... Pavement Type Selection
  - [35.3](#)..... Pavement Design
  - [35.4](#)..... Roundabout Design Features

**Section 14-15 Pavement Type Selection**

- [14-15-1](#) ..... Process
  - [1.1](#)..... Objective
  - [1.2](#)..... Pavement Type Selection Policy
  - [1.3](#)..... Pavement Design Report
  - [1.4](#)..... Pavement Type Selection Process
  - [1.5](#)..... Pavement Design Report Approval
  - [1.6](#)..... Exception Process
  - [1.7](#)..... Documentation
- [14-15-5](#) ..... Pavement Design Report Content
  - [5.1](#)..... Introduction
  - [5.2](#)..... Report Content
- [Attachment 5.1](#)..... Pavement Design Report Outline
- [14-15-10](#) ..... Life-Cycle Cost Analysis Computation Parameters
  - [10.1](#)..... Life-Cycle Cost Analysis (LCCA) Process
  - [10.2](#)..... The LCCA Parameters
  - [10.3](#)..... The LCCA Computation

**Section 14-25 Pavement Rehabilitation**

- [14-25-10](#) ..... Concrete Pavement Rehabilitation Guidelines
  - [10.1](#)..... General
- [Exhibit 10.1](#)..... Concrete Pavement Rehabilitation Manual
- [14-25-15](#) ..... Concrete Pavement Rubblization
  - [15.1](#)..... General
  - [15.2](#)..... Why Rubblize
  - [15.3](#)..... Selecting Rubblization Projects

- [15.4.....](#) Design
- [15.5.....](#) Structure Clearance
- [15.6.....](#) Other Considerations
- [15.7.....](#) Staging
- [14-25-20.....](#) HMA Pavement Pulverization
  - [20.1.....](#) General
  - [20.2.....](#) Why Pulverize
  - [20.3.....](#) Selecting Pulverization Projects
  - [20.4.....](#) Structural Design of Pavements Over Pulverized Material
  - [20.5.....](#) How to Pulverize
  - [20.6.....](#) Pavement Design Report
  - [20.7.....](#) Pavement Widening
  - [20.8.....](#) Curb and Gutter
  - [20.9.....](#) Structure Clearance
  - [20.10.....](#) Traffic Over Pulverized HMA
  - [20.11.....](#) Tack Coat
- [14-25-25.....](#) HMA Pavement Cold In-Place Recycling (CIR)
  - [25.1.....](#) General
  - [25.2.....](#) Reasons for Cold In-Place Recycling (CIR)
  - [25.3.....](#) Project Selection
  - [25.4.....](#) Structural Design of Pavements Over CIR Material
  - [25.5.....](#) How to Construct CIR
  - [25.6.....](#) Pavement Design Report
  - [25.7.....](#) Curb and Gutter
  - [25.8.....](#) Structural Clearance
  - [25.9.....](#) Traffic Over CIR Rehabilitated Surface
  - [25.10.....](#) Surfacing
  - [25.11.....](#) Tack Coat
