

## 618 Maintenance and Repair of Haul Roads

### 618.1 Description

- (1) This section describes maintaining, repairing, and restoring public roads, streets, drainage facilities, and other components used for hauling by contractor, subcontractor, or supplier to support work for a department contract to its pre-haul condition. Public roads and streets are limited to those not a part of the State Trunk Highway System and from now on called haul roads.
- (2) The contractor's obligation under this bid item does not authorize the use of haul roads for transporting loads exceeding statutory size and weight limitations.

### 618.2 Materials

- (1) Furnish materials at least equal in quality and serviceability to those existing in the road before its use as a haul road. The engineer will determine the quantity, quality, and acceptability of materials.

### 618.3 Construction

#### 618.3.1 General

- (1) The engineer will determine the type and quality of maintenance and repair required, including the quality of materials used. If 2 or more contractors having contracts with the department transport materials over the same haul road at the same time, or at about the same time, the engineer will determine the repair and restoration obligations of the respective contractors.

#### 618.3.2 Maintenance

- (1) The engineer has the authority to order maintenance and repair work on haul roads, including dust abatement, at any time during hauling operations to ensure service to other users of the road.
- (2) The contractor may stabilize, reinforce, or strengthen existing facilities before hauling to prevent or minimize damage; and may condition the surface and perform repairs during hauling operations.

#### 618.3.3 Restoration

- (1) Upon termination of hauling operations and before final acceptance, restore haul roads, including drainage facilities and other components, to the equivalent of pre-hauling conditions.
- (2) The final repair of a haul road is subject to the engineer's approval.

### 618.4 Measurement

- (1) The department will measure Maintenance and Repair of Haul Roads for each individual project acceptably completed, measured only if the condition of the haul road after work is complete is better than or equal to the condition before work began. The department will measure the item even if no hauling was done on the road and even if no maintenance or repair work was required.

### 618.5 Payment

- (1) The department will pay for measured quantities at the contract unit price under the following bid items:

<u>ITEM NUMBER</u>	<u>DESCRIPTION</u>	<u>UNIT</u>
618.0100	Maintenance and Repair of Haul Roads (project)	EACH

- (2) Payment for the Maintenance and Repair of Haul Roads bid items is full compensation for providing, hauling, and placing required materials; and for other costs incurred by the contractor to prevent or minimize damage to the haul roads.
- (3) The department will pay for this item upon completion of all work under the contract, except the engineer may make partial payment for work performed.
