

Wisconsin State Patrol Predictive Analytics

Colonel Charles R. Teasdale
August 23, 2017

Program Objectives

- ▶ Optimize staffing allocation
- ▶ Increase law enforcement visibility in the right locations at the right times to maximize impact on traffic safety
- ▶ Enhance incident management capability by reducing response time
- ▶ Safer roadways

Forecasting Models

- ▶ CRASH – Predict likelihood of serious injury and fatal crashes
- ▶ OWI – Predict likelihood of alcohol-involved incidents
- ▶ Incident Management – Predict likelihood of intermediate or major incidents
- ▶ CMV – Predict likelihood of commercial vehicle crashes

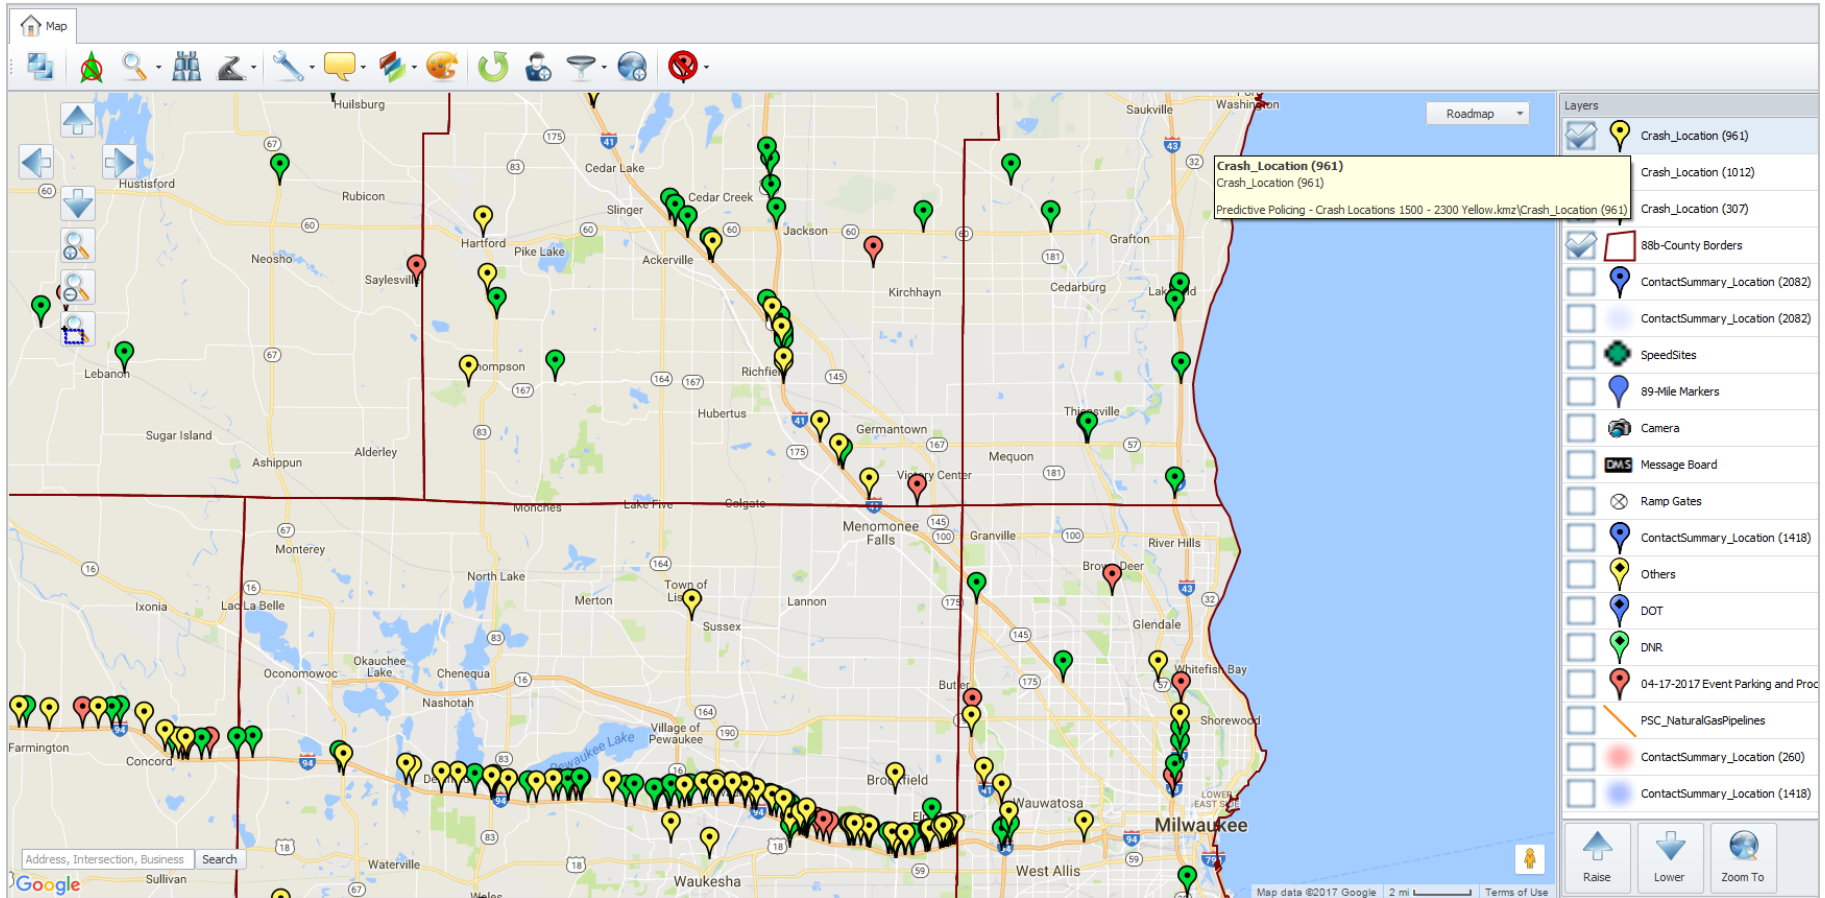

Predictive Model Overview

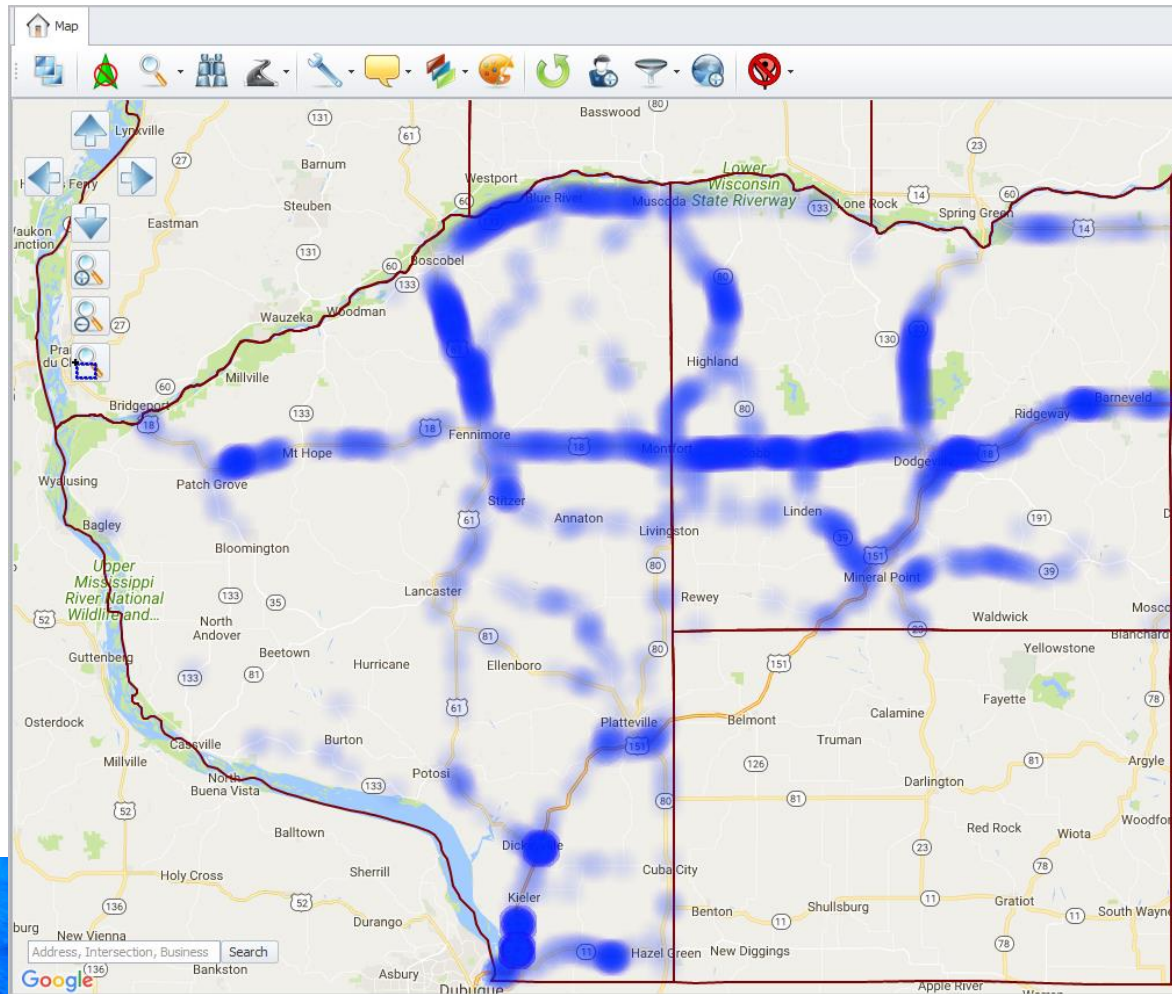

- ▶ Identifies areas of concern by time of day, day of week and geographic location
- ▶ Data is presented as a heat map, pin map and table
- ▶ Staffing is allocated accordingly

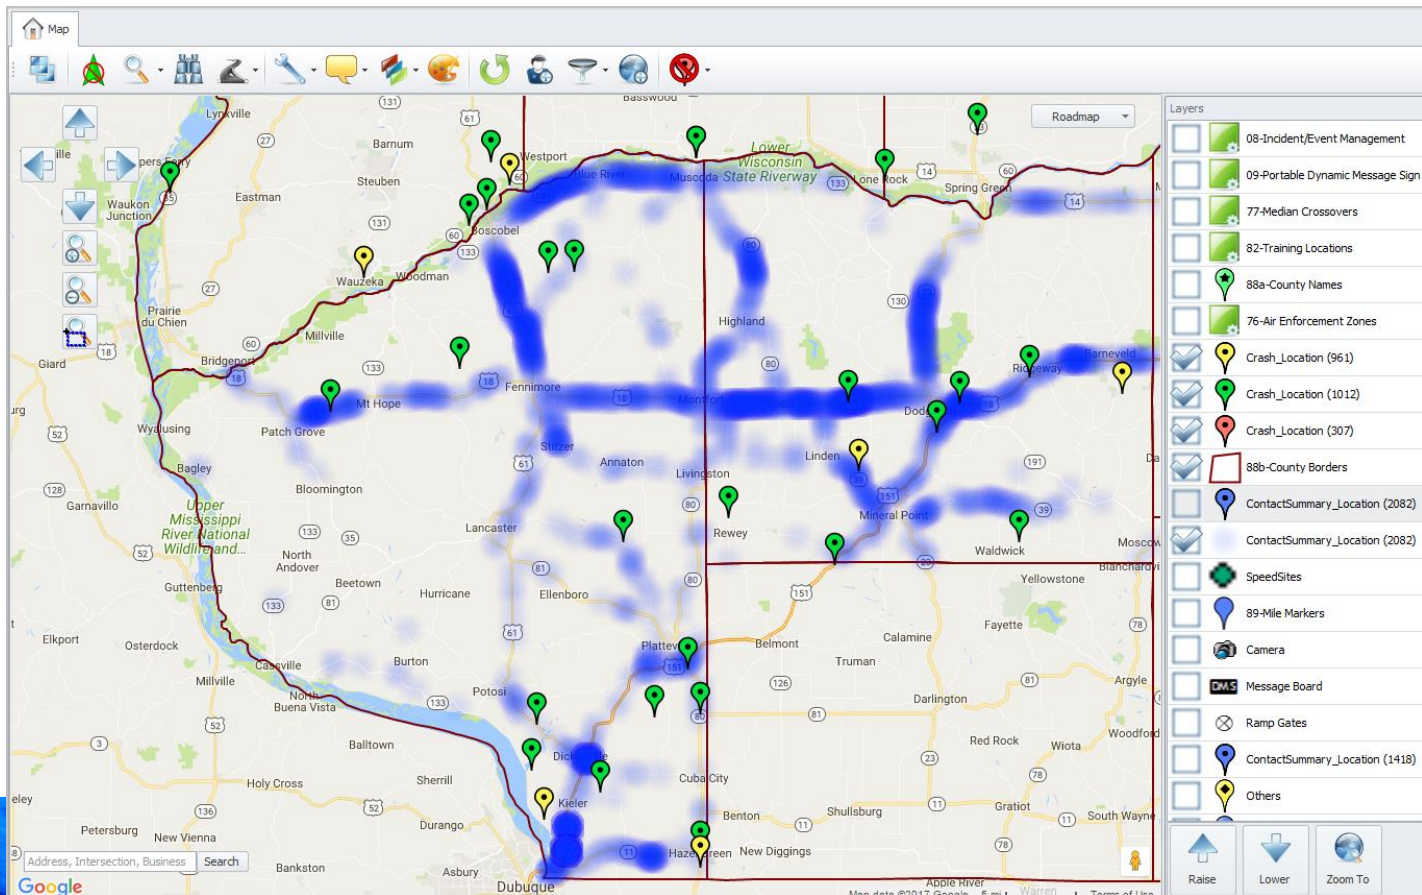

Pin Map (Traffic Crashes by Shift)

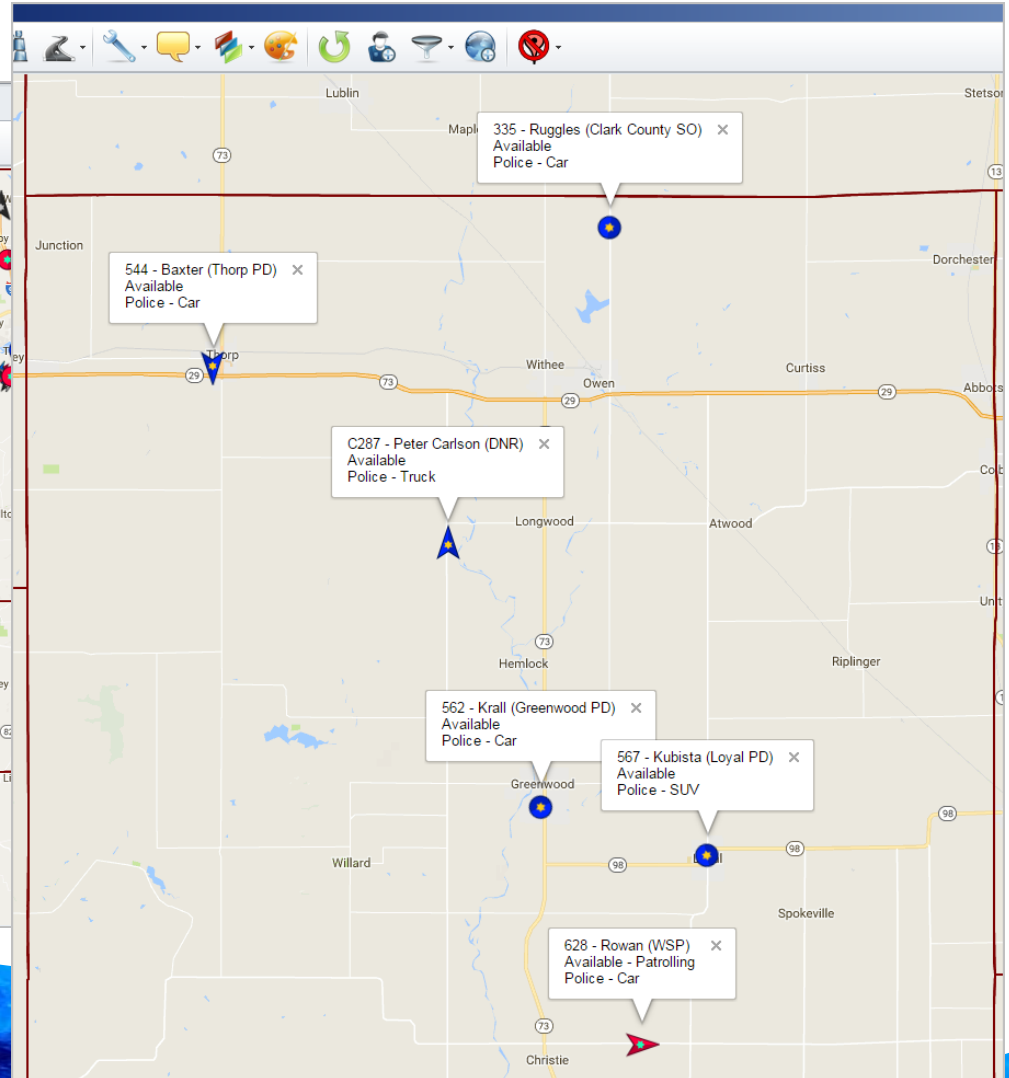

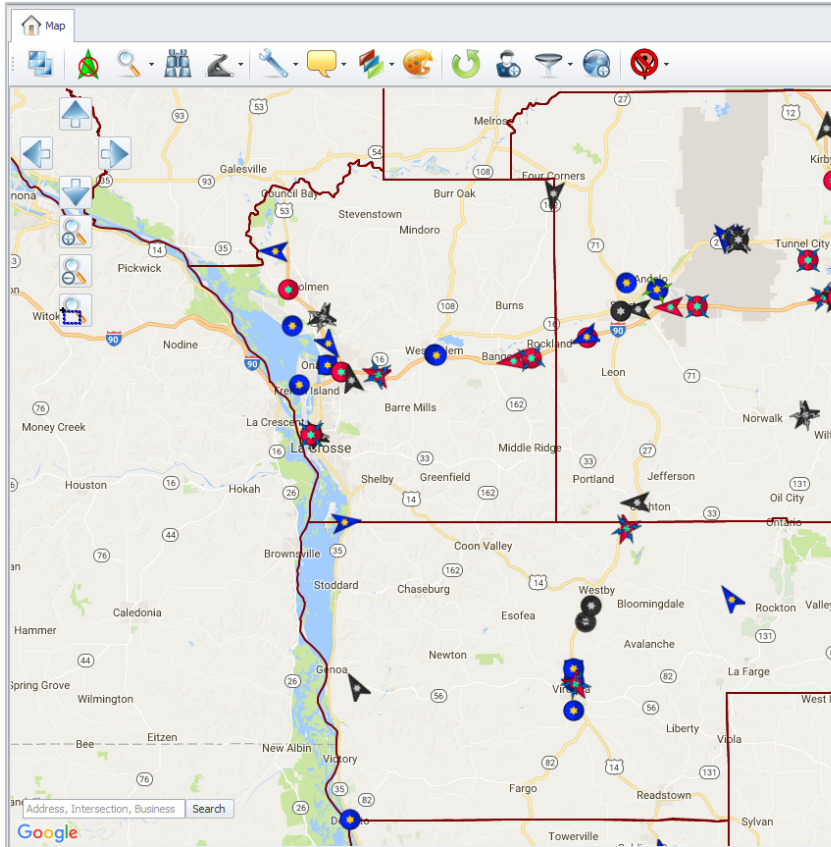

Heat Map (Traffic Stop Locations)

Combination Crash Location and Traffic Stop Location Mapping

Real Time Tracking of Deployed Resources

Combine Predictive Analytics with Mapped Data to Develop Mitigation Strategies

Heat Map

Heat Map – Alcohol/Speed

Next steps

- ▶ Fully develop predictive models for all crash types
- ▶ Utilize predictive models to enhance incident management capabilities
- ▶ Allocate staff during times and in locations they can be most effective
- ▶ Utilize predictive models to better target areas for engineering studies
