WISCONSIN * NOLLIGUE	Highway Maintenance Manual		Bureau of Highway Maintenance
	Chapter 02	Administration	August 2019
	Section 20	Eligible Costs	
	Subject 50	Equipment Storage	

1.0 Definition of Cost

Equipment storage costs are costs associated with buildings and grounds attributed to equipment storage based on a simple prorating of the total costs to equipment storage and other functional uses. The costs are reported by the county to the department on the Buildings and Grounds Operation Schedule. Also contained on that form are the allocations of area (square footage) to functions.

Storage space is defined as enclosed area where the primary function is to store rated equipment. For this purpose, storage areas do not include wash bays, sign shops or storage areas, paint booths, meeting rooms, office space or administrative space, grease rooms, lunch rooms, locker rooms, parts rooms, other inventory storage areas, equipment repair areas, hallways, drives, or circulation areas needed for non-storage access.

2.0 Charging Policy

The department will reimburse the county for the state's annual share of equipment storage costs in January. The county may recover the storage costs for other users of equipment in any manner the county deems appropriate.

3.0 Cost Sharing Policy

Storage costs are shared on the basis of a simple average of two ratios: 1) the ratio of equipment revenue generated on State Trunk Highway maintenance to all county equipment revenues, and 2) the ratio of winter maintenance equipment revenues on State Trunk Highways to all winter maintenance equipment revenues.
