Thank you for your interest in this project, we look forward to your feedback.

Purpose of this handout

The Wisconsin Department of Transportation (WisDOT) is seeking public feedback for proposed improvements on I-41 in Fond du Lac and Winnebago Counties. The purpose of this outreach is to obtain your input on the identified needs and proposed improvements along I-41 in the project limits. We appreciate your input and encourage you take a moment to review the project information and provide comment.

Project location and limits

This project is located on I-41 in Fond du Lac and Winnebago Counties between the southern limit of County D (Military Road) in Fond du Lac County and the northern limit of WIS 26 in Winnebago County.

Project purpose and need

WisDOT is proposing to improve 14.2 miles of I-41.

Pavement: Last asphalt overlay project took place in 2007-2009. Current deterioration is reducing roadway structure life and ride quality. Condition will worsen without project.

Cable barrier and guardrail: The existing cable barrier and guardrail are not up to current standards. If not replaced, they could result in a safety issue.

Drainage: Box culvert replacement is needed at north of County Z in southern Winnebago County to address flooding.

Proposed improvements

- Mill and overlay two (2) inches of asphalt along the northbound and southbound lanes
- Replace cable barrier and guardrail along I-41 mainline and ramps
- Miscellaneous structure maintenance work
- Miscellaneous culvert extension and slope flattening work
- Replace existing box culvert to improve drainage north of County Z

Schedule

- Environmental document: February 2022
- Design study: March 2022
- Utility coordination: April 2022
- Design completion: August 2023
 - Construction is currently scheduled in 2026
 - Construction may be advanced to 2024 should funding become available.
 - Please see website for schedule updates

Anticipated Traffic Impacts

I-41: The interstate will remain open to traffic during construction with the follow restrictions:

- Mainline paving, cable barrier, guardrail, and I-41 structure maintenance
 - Night work or off-peak hours
 - Maintain one lane in each direction
- Box culvert construction north of County Z
 - Construct temporary crossovers
 - Maintain 2 lanes in each direction during peak hours

Side roads: Overpass and structure work affecting off-interstate traffic

- County D, WIS 23, County OO, WIS 26
 - Work will be conducted using lane closures and/or flagging operations
- County OOO, County OO (Scott Street), County Z, Lincoln Road
 - Full closures are anticipated.

Real Estate Needs

New right of way or temporary limited easements may be required at select culvert replacement locations.

- If your property is affected, a member of our real estate staff will contact you directly.

Business planning resources

WisDOT recognizes businesses and organizations located in work zones have special needs. WisDOT's "In This Together" program is designed specifically for business and community leaders as an idea source as they plan for road construction. The In This Together program includes:

- An interactive Business Communication Guide with tips, tools and resources
- Case studies that demonstrate techniques in other communities
- Promotional samples to promote your business during construction
- Information on temporary signing for businesses in closed/detoured portions of a project.
- View [WisDOT's In This Together website](#)

Public input/comments

Your comments assist us in developing a project that will serve the needs of the traveling public as well as the needs of the local community. Your input is welcome and appreciated throughout the design process.

Attached to this handout is a prepaid comment form for written comments. You can also e-mail your comments to any of the contacts listed below or call the project contacts with comments.
