 - 6-foot shoulders, some parking lanes throughout
 - 30-inch curb and gutter
- Safety
 - No crash flags near project intersection limits

Purpose and Need

WIS 213 Pavement

- Pavement Deterioration
 - Transverse cracking
 - Longitudinal cracking
 - Alligator cracking

Design Overview

Proposed Details

- Mill and remove 2-inches of existing asphalt pavement
- Replace with 2-inches of new asphalt pavement
- Replace all pavement markings with some adjustments
 - Existing dimensions of the roadway will remain

Design Overview

Proposed Details

- Curb Ramp Improvements
 - Shirland Ave and St Paul Ave
 - New curb ramp layouts
 - Decreased grades to meet ADA standards
 - Increased sidewalk widths
 - Inclusion of detectable warning fields

Design Overview

Proposed Details

- WIS 213 Railroad Crossing
 - New surface and signals
 - Detectable warning fields added
- Shirland Ave Railroad Crossing
 - New signals
 - Southern sidewalk will be reconstructed

Construction Traffic Impacts

Staged Under Traffic

- Traffic will still be able to access WIS 213
- Construction stages will be used to complete project
- Advanced signing and portable changeable message boards used to communicate with motorists when a change in the staging will occur
- Access to all businesses will be maintained to the greatest extent possible.

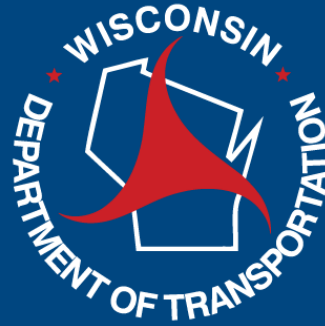

Project Details
