

WIS 23 PUBLIC INVOLVMENT MEETING

Welcome to the public involvement meeting to discuss the replacement of the pavement on a 2.8 mile section of WIS 23 in Columbia County.

PROJECT PURPOSE

The purpose of this project is to replace deteriorating pavement along WIS 23 between WIS 16 and the Adams County line at Gulch Road.

PROJECT IMPROVEMENT

The proposed work will include milling of the existing 4-inch pavement, and placement of 5-inches of new asphaltic material. The paved ditch between Valley Drive and Cynthia Lane will be removed and replaced with grass. The 7 driveway culverts and 3 side street culverts on the ditch will be replaced. The paved shoulders between Cynthia Lane and Gulch road will be widened to 5 feet. Two culverts under WIS 23 will have their end walls replaced. Construction is anticipated to take place in 2028.

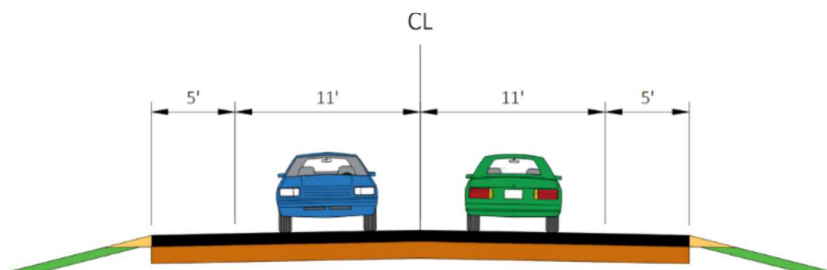

TRAFFIC CONTROL

WIS 23 will remain open to traffic, managed by flagging operations for the duration of construction. Owners of homes with driveway culvert replacement will be contacted in advance of activities that may impact access.
