**Wisconsin Department of Transportation
SW Region – Madison Office**

Virtual Public Involvement Meeting # 1

May 27, 2022

Project Team

➤ WisDOT Project Team

- Matthew Lamb, SW Region Project Manager

➤ Consultant Design Team – Oneida Engineering Solutions (OES)

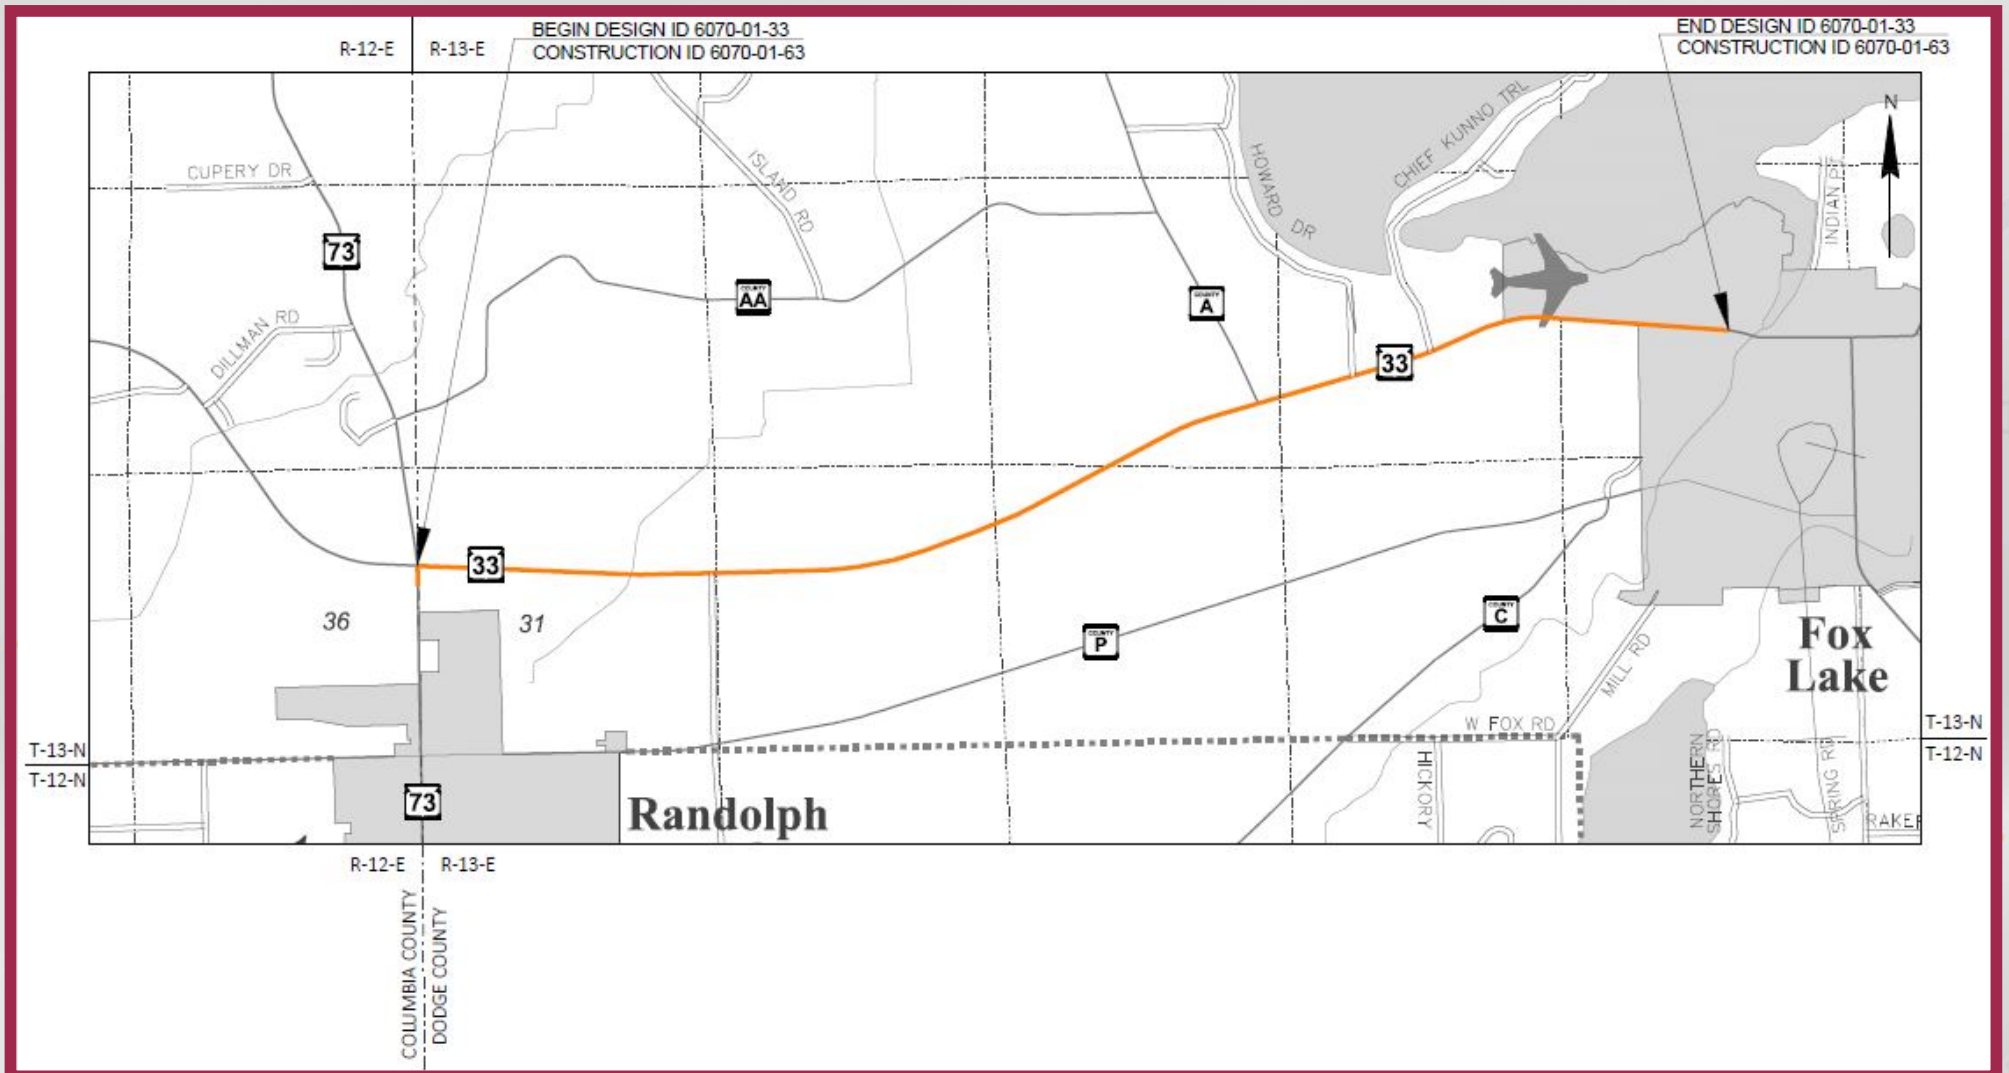

- Brett Peterson, Project Manager

Presentation Agenda

1. Project location, purpose & need, and proposed improvements
2. General project information
3. Project schedule
4. Traffic Control Staging During Construction
5. Gather input from the public

Project Location

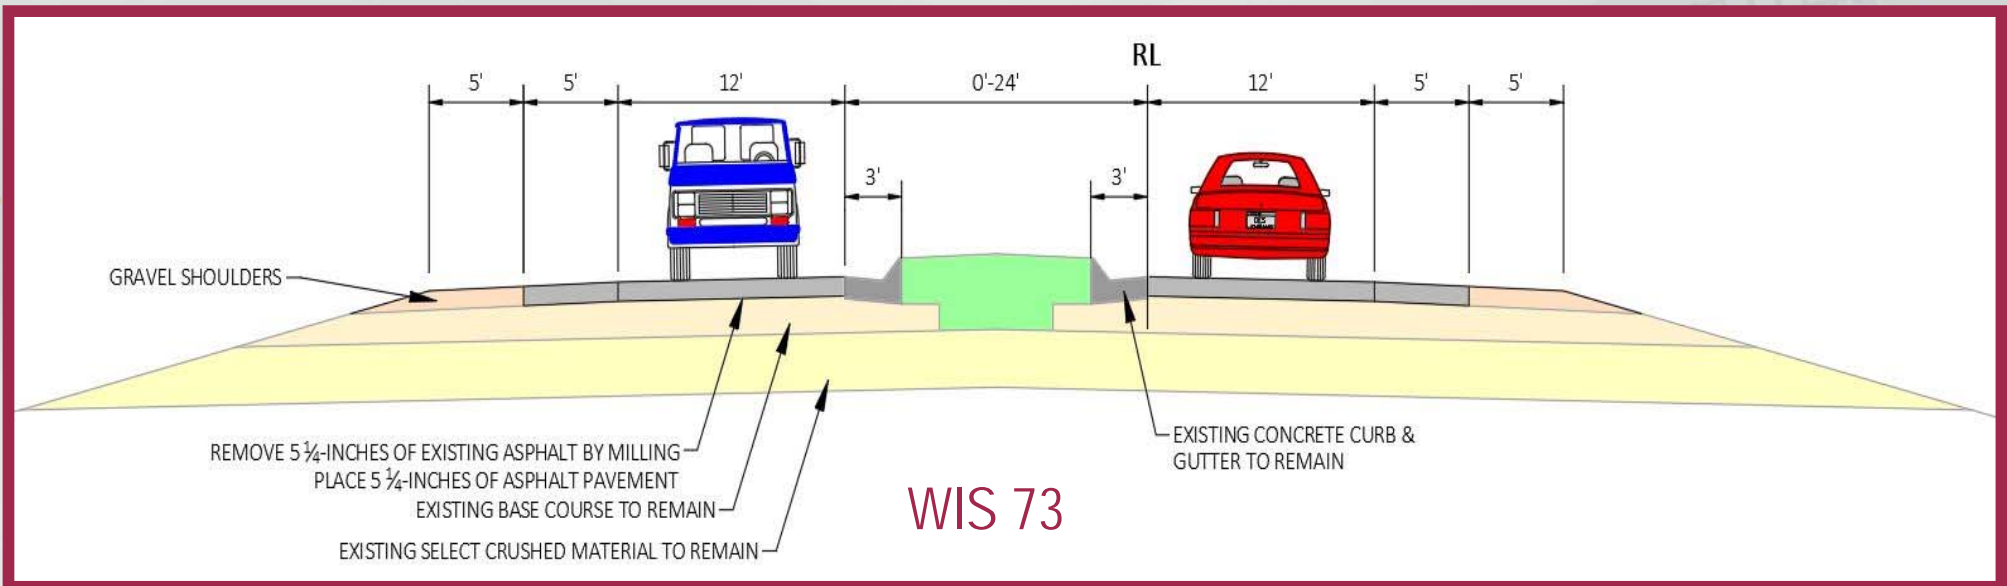

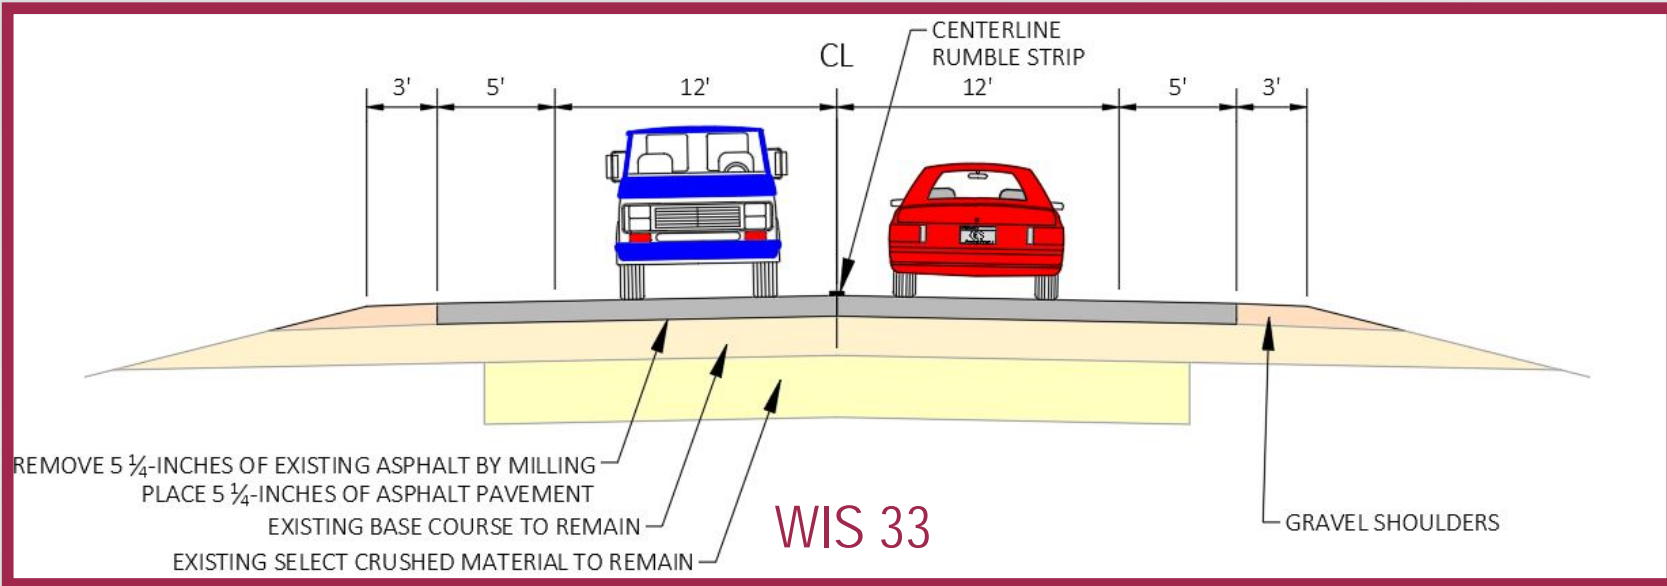

The project along WIS 33 starts at WIS 73 and ends just west of Forest Street

Project Purpose and Need

- The purpose of this project is to replace the deteriorated pavement and improve safety and operations along this corridor
- Project Need
 - The existing pavement is deteriorated and in need of replacement
 - Routine maintenance of the pavement has become costly
 - Deteriorated drainage culverts underneath WIS 33

WIS 33/WIS 73 Intersection Proposed Improvements

WIS 33 Traffic during Construction

- The highway is expected to be detoured while the culvert pipes are being replaced. The detour route has not been determined at this time. The design team will finalize the detour route during the design process.
- A flagging operation will be in place during the paving operation to keep the highway open
- Access to resident and business will be maintained as much as possible
- Emergency access will be maintained at all times during construction.

General Project Information:

- **Real Estate:** No real estate impacts are anticipated as part of the potential roadway improvements
- **Businesses:** WisDOT maintains a website titled “In This Together” that provides the business community with ideas for encouraging customers to access the businesses during construction.
