

Sauk City—IH-39 WIS 78

Sauk Co

Public Involvement Meeting

The in-person Public Involvement Meeting has moved online based on the most current health information from state, federal and local health departments.

Pavement Replacement

Project info

The purpose of the WIS 78 Project is to address the recycled concrete crushed aggregate that is retaining and trapping moisture causing extensive heaving and an extremely poor ride quality.

Proposed improvements include: Removing the pavement and pavement structure, curb & gutter replacement, beam guard replacement, pavement marking, signing, centerline and shoulder rumble strips.

Traffic impacts

Construction is expected to begin April of 2021. During construction, WIS 78—between Eagle View Court and Weynand Road—will be detoured for the entire project. Be sure to watch for updates and signs as construction begins.

- Local access will be maintained, however, may only be from one direction or the other
- The proposed detour route will utilize WIS 60 to IH 39/94 to WIS 78.
- Temporary driveway closures will be necessary during parts of the construction process.
