 Facsimile (FAX): (608) 266-8459

NOTICE TO ALL CONTRACTORS:

Proposal #01: 1007-10-81, WISC 2016 462
Illinois State Line - Madison
CTH AB Bridge B-13-0726
IH 39
Dane County

Letting of December 13, 2016

This is Addendum No.01, which provides for the following:

Special Provisions

Revised Special Provisions	
Article No.	Description
24	Select Borrow, Item 208.1100
34	Roadway Embankment, Item SPV.0035.001

Added Special Provisions	
Article No.	Description
47	Test Pits, Item SPV.0060.008

Schedule of Items

Revised Bid Item Quantities					
Bid Item	Item Description	Unit	Old Quantity	Revised Quantity	Proposal Total
208.1100	Select Borrow	CY	800	400	1,200
SPV.0035.001	Roadway Embankment	CY	25,416	21	25,437

Added Bid Item Quantities					
Bid Item	Item Description	Unit	Old Quantity	Revised Quantity	Proposal Total
SPV.0060.008	Test Pits	EACH	0	3	3

Deleted Bid Item Quantities					
Bid Item	Item Description	Unit	Old Quantity	Revised Quantity	Proposal Total
312.0110	Select Crushed Material	Ton	800	-800	0

Plan Sheets

Revised Plan Sheets	
Plan Sheet	Plan Sheet Title (brief description of changes to sheet)
83	Updated the Earthwork Summary Table to remove Se Select Crushed Material and increase Select Borrow and Roadway Embankment. Added Test Pits.

The responsibility for notifying potential subcontractors and suppliers of these changes remains with the prime contractor.

Sincerely,

Mike Coleman

Proposal Development Specialist
Proposal Management Section

ADDENDUM NO. 01

1007-10-81

November 23, 2016

Special Provisions

24. Select Borrow, Item 208.1100.

Replace entire article language with the following:

Conform to the requirements of standard spec 208 and as hereinafter provided.

Materials

Furnish and use material that consists of granular material meeting the following requirements: Maximum particle size of 12 inches when measured from any face. The material passing the No. 4 sieve shall have a maximum of 15% by weight passing the No. 200 sieve.

As a contractor's option, the department will allow the use of select crushed material for select borrow. The material shall conform to the requirements of standard spec 312, and will be measured and paid for as Select Borrow.

Measurement

Replace standard spec 208.4 with the following:

The department will measure select borrow by the cubic yard acceptably completed in its final location using the method of average end areas, with no correction for curvature or settlement, except as follows:

1. The engineer and contractor mutually agree to an alternative volume calculation method;
2. The method of average end areas is not feasible.

If it is not possible to compute volumes of select borrow by the method of average end areas due to erratic location of isolated deposits, the department may compute the volumes by alternative methods involving three-dimensional measurements.

The department will not measure select borrow material beyond the limits of the required slopes as shown on the plans.

34. Roadway Embankment, Item SPV.0035.001.

Replace entire section titled A Description with the following:

A Description

Replace standard spec 207.1(1) with the following:

This section describes providing and placing, in embankments and in miscellaneous backfills, material obtained under the bid items in the roadway and drainage excavation or excavation for structure sections; or material obtained under Borrow as specified in standard spec 208 and modified under these special provisions.

Replace 2nd and 3rd paragraphs of section titled **E Payment** with the following:

Payment is full compensation for providing material from roadway excavation or borrow material; and for forming, compacting, shaping, sloping, trimming, finishing, and maintaining the embankments.

The department will pay for all work associated with select borrow material as specified under the Select Borrow bid item.

47. Test Pits, Item SPV.0060.008.

A Description

This special provision describes excavating test pits as directed by the engineer and as hereinafter provided. Test pits are for the purpose of locating and relieving trapped water within the existing roadway embankments.

B Materials

Conform to standard spec 205.2 for Roadway Excavation.

Conform to special provision article for Select Borrow.

C Construction

All test pits shall be performed during daytime hours. The engineer must be present during each test pit.

The location of test pits shall be determined by the engineer. Contact the engineer at least 4 weeks prior to earthwork operations. Test pits shall be excavated at least 2 weeks prior to roadway excavation operations. Different timelines may be required by the engineer.

Excavate the foreslope of the existing roadway embankment beginning at the edge of the existing subgrade shoulder point at a slope of 1:1 down to the elevation of the toe of existing slope, but no lower than 1 foot above the ditch flow line if a ditch is present. Excavations shall be 10 feet wide measured parallel to the roadway shoulder. The bottom of the test pit shall be sloped to drain away from the embankment.

If water is present or seeping from the embankment, backfill with select borrow where the test pit is located on an embankment that is supporting traffic. Compact select borrow using standard compaction conforming to 301.3.4.2. If the embankment is not supporting traffic, then the test pit shall remain open and maintained until approval by the engineer. Side slopes of the test pit shall be sloped back at an acceptable stable slope to maintain the open test pit.

If water is not present or seeping from the embankment, backfill the test pit with roadway embankment or a material approved by the engineer.

D Measurement

The department will measure Test Pits by each unit, acceptably installed.

The department will measure select borrow as specified in the special provision article Select Borrow.

E Payment

The department will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBER	DESCRIPTION	UNIT
SPV.0060.008	Test Pits	EA

Payment is full compensation for all engineer approved work specified including clearing, grubbing, excavating, sloping, shaping, stockpiling, backfilling, compacting, and maintaining.

The department will pay for select borrow under the select borrow bid item. The department will pay for erosion control, if required, under the erosion control bid items.

Schedule of Items

Attached, dated November 23, 2016, are the revised Schedule of Items. All pages of the Schedule of Items are being replaced.

Plan Sheets

The following 8½ x 11-inch sheets are attached and made part of the plans for this proposal:

Revised: 83

Addendum No. 01
ID 1007-10-81
Revised Sheet 83
November 23, 2016

1) EXCAVATION COMMON IS THE SUM OF THE CUT AND EBS EXCAVATION COLUMNS. ITEM NUMBER 205.0100.

2) CUT VOLUME INCLUDES CONCRETE AND ASPHALTIC SURFACE MATERIAL.

3) EBS EXCAVATION TO BE BACKFILLED WITH SELECT BORROW.

4) MARSH EXCAVATION TO BE BACKFILLED WITH ROADWAY EMBANKMENT EXCEPT AS NOTED IN NOTE 7. THE NEED FOR MARSH EXCAVATION IS TO BE DETERMINED IN THE FIELD BY THE PROJECT ENGINEER.

5) ROADWAY EMBANKMENT = (FILL + MARSH EXCAVATION - SELECT BORROW)

6) THE MASS ORDINATE IS CALCULATED BY DIVISION. A POSITIVE QUANTITY INDICATES AN EXCESS OF MATERIAL WITHIN THE DIVISION AND A NEGATIVE QUANTITY INDICATES A SHORTAGE OF MATERIAL WITHIN THE DIVISION. STRUCTURE EXCAVATION IS NOT INCLUDED IN THIS CALCULATION. MASS ORDINATE = (CUT + MARSH EXCAVATION - FILL). THE MASS ORDINATE IS FOR INFORMATION PURPOSES ONLY AS EXCAVATION COMMON AND ROADWAY EMBANKMENT ARE NOT BALANCED FOR QUANTITY PURPOSES AND DOES NOT GUARANTEE THE QUANTITY OF EXCAVATION COMMON, AND IF IT CAN BE REUSED ON SITE.

7) SELECT BORROW IS USED IN MARSH EXCAVATION AREAS WHERE WATER IS ENCOUNTERED DURING EXCAVATION. PLACE SELECT BORROW TO AN ELEVATION 1' ABOVE THE WATER LINE.
