ADDENDUM NO. 01

9286-05-71

January 6, 2020

Special Provisions

17. Notice to Contractor, Water Levels

The project site is located approximately 1.25 miles west of the Bay of Green Bay (Lake Michigan). Lake Michigan has recently been at or near record high levels and localized flooding has occurred near the lake and bodies of water connected to the lake. In addition, when prevailing winds are out of the north or northeast, the level of the Bay of Green Bay increases at the south end of the bay. Current Lake Michigan levels are approximately 0.8 feet higher than the water level at the CTH J bridge at the time the survey was conducted. It should be expected that water levels at the project site may be higher than the observed water elevation noted on the plan.
