SPV.0090.01	Removing HMA Pavement Notched Wedge Longitudinal Joint Milling	LF	12,821	-12,821	0

Plan Sheets:

Revised Plan Sheets	
Plan Sheet	Plan Sheet Title (brief description of changes to sheet)
7	Typical Sections (Adjusted stationing)
8	Typical Sections (Adjusted stationing, changed mill depth)
9	Typical Sections (Changed mill depth)
11	Construction Details (Revised elevations)
12	Construction Details (Modified butt joint details)
13	Construction Details (Added construction detail for Removing Distressed Pavement Milling)
36	Miscellaneous Quantities (Various changes to 'Asphalt Paving' & 'Base Aggregate')
37	Miscellaneous Quantities (Added 611.8115 Adjusting Inlet Covers to 'Drainage')
38	Miscellaneous Quantities (Added 209.0100 Excavation Common & revised 204.0150 Removing Curb & Gutter)
41	Miscellaneous Quantities (Added drum, barricade, and sign quantity for climbing lane under 'Traffic Control', revised 'Sawing Asphalt')
126	Cross Sections (Revised elevations to fit change in profile)

Added Plan Sheets	
Plan Sheet	Plan Sheet Title (brief description of why sheet was added)
38A	Miscellaneous Quantities ('Pavement Marking' was created as its own sheet, multiple item & quantity changes)

The responsibility for notifying potential subcontractors and suppliers of these changes remains with the prime contractor.

Sincerely,

Mike Coleman

Proposal Development Specialist
Proposal Management Section

ADDENDUM NO. 01
5540-00-60 & 5540-01-70
April 8, 2020

Special Provisions

3. Prosecution and Progress

Replace paragraph six with the following:

Paving of the milled surface is required within 48 hours of the milling operation.

12. DELETED.

13. Construction Staking.

This work shall be performed in accordance with the requirements of Section 650 of the Standard Specifications, except as hereinafter modified.

Subsection 650.3.5 shall be modified to include

All construction staking curb and gutter elevations to be determined based on the existing surface. Trimming of 3 to 4 inches of compacted base course can be expected while placing curb and gutter. The milled surface shall be left ~6" short of curb and gutter flag line.

14. Handwashing Station, Item SPV.0135.01.

A Description

This special provision describes providing and maintaining a portable handwashing station at the project field office.

B Materials

Provide a handwashing station that includes a hands-free sink with foot pump-operated faucet, soap dispenser, paper towel dispenser, fresh water supply, and collection tank for gray water.

C Construction

Regularly service and maintain the handwashing station and all supplies.

D Measurement

The department will measure Handwashing Station by the month acceptably completed.

E Payment

The department will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBER	DESCRIPTION	UNIT
SPV.0135.01	Handwashing Station	MON

Payment is full compensation for providing and maintaining the handwashing station and all supplies; removing the handwashing station when it is no longer necessary; and for properly disposing of all materials.

15. Removing Distressed Pavement Milling, Item SPV.0180.01.

A Description

This special provision describes the removal and disposal of additional 2-inches of asphaltic pavement by milling in areas of distressed pavement. This will be completed in spot locations throughout the project as directed by the engineer.

B (Vacant)

C Construction

C.1 Milling

Use a milling machine designed and constructed for milling pavements without tearing or gouging the underlying surface. Space the teeth on the drum to mill a surface finish that is acceptable to the engineer. Shroud the machine to prevent discharge of any loosened material into adjacent work areas or live traffic lanes. Equip the machine with electronic devices that provide accurate depth, grade, and slope control, and an acceptable dust control system.

The milling operation is to be done in a manner to prevent damage to the remaining pavement. It should result in a reasonably uniform plane surface free of excessively large scarification marks, and with the uniform transverse slope required on the plans or directed by the engineer.

Any milled surface will not be allowed during nonworking hours. Windrowing or storing of the removed milled asphaltic pavement on the road is only permitted in connection with the continuous removal and pick-up operation. During nonworking hours, clear the road of all materials and equipment.

The removed material shall become the property of the contractor. Properly dispose of it in accordance with section 204 of the standard specifications.

C.2 Cleaning

Clean the milled surface by removing all dust, dirt, debris, or other foreign or loose material.

C.3 Pavement Prep

The cleaned milled surface will have Tack Coat applied and be filled with Asphaltic Surface.

D Measurement

The department will measure Removing Distressed Pavement Milling by the square yard, acceptably completed.

E Payment

The department will pay for measured quantities at the contract unit price under the following bid item:

ITEM NUMBER	DESCRIPTION	UNIT
SPV.0180.02	Removing Distressed Pavement Milling	SY

Payment is full compensation for removing the asphaltic surface; cleaning the milled surface; properly disposing of all materials; and for furnishing all labor, tools, equipment, materials, and incidentals necessary to complete the contract work. Tack Coat and Asphaltic Surface will be paid for separately.

swr-204-006 (20180824)

Schedule of Items

Attached, dated April 8, 2020, are the revised Schedule of Items Pages 1 – 6.

Plan Sheets

The following 8½ x 11-inch sheets are attached and made part of the plans for this proposal:

Revised: 7, 8, 9, 11, 12, 13, 36, 37, 38, 41, and 126.

Added: 38A.
